

## Vent-Axia Product Selector

**Vent-Axia**<sup>®</sup>

The UK's Leading Ventilation Company

## Products you can trust

Welcome to the 8th Edition of the Vent-Axia Product Selector. Vent-Axia can supply everything you need for any ventilation job. In this brochure, you will find the widest selection available on the market for your ventilation installation, as well as a selection of other products such as heating, cooling and hand dryers.

With the first round of ErP requirements implemented in January 2013, we are now looking forward to the next phase in 2015. You can trust the Vent-Axia team to ensure all products meet legislation requirements and our sales force is there to offer advice and provide insight into the latest legislation changes.

Building Regulations provide a benchmark for ventilation performance and efficiency, but we like to go further to deliver quality products and solutions. At only 16 dB(A) our Silent Fan provides stylish and silent ventilation without compromising on performance. Need to hear it to believe it? Email [demo@vent-axia.com](mailto:demo@vent-axia.com) to arrange a demonstration and hear for yourself just how quiet it is!

We continue to invest in our MVHR systems; during the year we launched the Horizontal Sentinel Kinetic MVHR unit. Our MVHR has also been recognised by others. As well as the Sentinel Kinetic being featured by Dwellie at Grand Designs, our Lo-Carbon Kinetic Plus E in the Best Services Product Category at this year's Housebuilder Product Awards.

Vent-Axia prides itself on being innovative, so as always, there are a number of new products included within this edition. Within our Lo-Carbon range we have added to our dMEV family with Response. Our continuous running, constant volume Response dMEV unit features an innovative digital display which provides the calibrated installed airflow and pressure of the installation meaning that there is no need to test the installation with an airflow measuring device. The humidity Response also features our hour run meter as standard.

We would also like to introduce iQ, our new intelligent Lo-Carbon fan with a unique automatic humidity sensor for moisture control. This means the fan learns to run only when it can make a difference to the indoor air quality. The visible blades give a retro feel and help to give the fan a very quiet noise level.

Don't forget our extensive heating range. From page 166 you can find the heating section which, as well as panel and storage heaters, also includes towel rails, aluminium radiators and radiant heating. We are confident that we can provide a credible alternative to your existing heating suppliers, with a brand that you can trust.

Did you know that Vent-Axia has a range of tools available on our website that can help you select the heating and ventilation products that you need? You can also sit online CPDs and book training courses; all helping to ensure the right product for the right job is installed correctly and working first time. We also have an online trade counter, frequently asked questions as well as up-to-date product availability and technical literature all at the click of a button. The Vent-Axia website really is a knowledge hub, provided to make your life easier. Visit the website today to find out more; [www.vent-axia.com](http://www.vent-axia.com). We feel this really strengthens our position as a supplier of ventilation and heating, whatever your application or need. This is all backed by a nationwide 70 strong sales team and an unrivalled technical support group based in Crawley.

Our commitment to quality and service runs right through the core of our business, through our supply chain to you; our customers. As always, we want you tell us if you think there are areas we could be better in as we continue to be the best that we can.

Vent-Axia - the First Name in Ventilation.

Lee Nurse, Marketing Director

Employing over 800 people across 4 manufacturing sites, we continue to invest in UK manufacturing.

Being in control of manufacture of the component parts including motors and mouldings all within the UK, we reduce our lead times as well as our carbon footprint.

### Vent-Axia Group Ltd

#### Crawley - Unitary plastic fan manufacture

- Our largest total manufacturing and office space with over 230,000 sq. ft. housing the Vent-Axia Head Office as well as the Group Head Office.
- Manufacturing and warehouse space totals 108,000 sq. ft.
- Manufacture of plastic ventilation ranges
- Design and test facilities for rigorous product testing including safety, airflow and climate chambers - BEAB approved
- Head Office functions including Sales Office, Customer Services, Technical Support and Marketing

#### Swindon - Lo-Carbon DC Motor manufacture

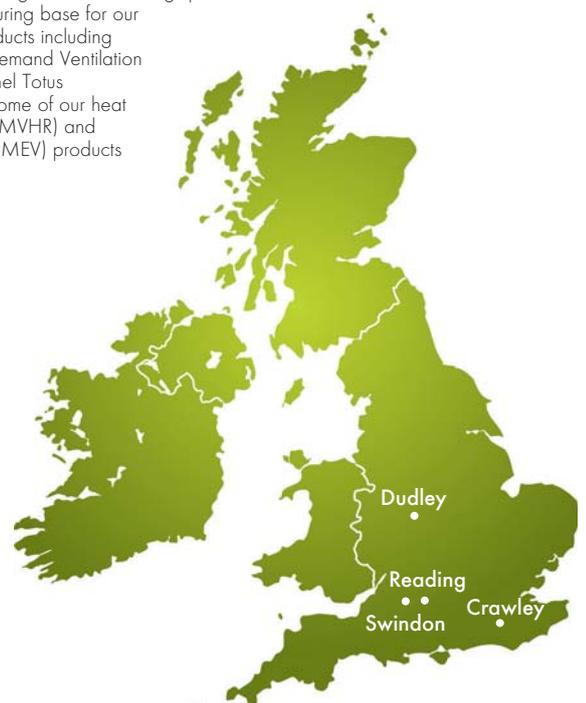

- 80,000 sq ft factory
- Over 1 million motors supplied into the HVAC market every year
- The key provider of our Lo-Carbon technology

#### Reading - Plastic Moulding and extrusion manufacture

- 50,000 sq ft injection and extrusion factory running 24 hours a day
- Over 30 injection moulding machines
- 5 extrusion lines for rigid and flexible duct

#### Dudley - Systems and Industrial manufacture

- Our largest site with 120,000 sq footage of manufacturing and warehousing space
- Manufacturing base for our metal products including Sentinel Demand Ventilation and Sentinel Totus
- Also the home of our heat recovery (MVHR) and Multivent (MEV) products

## Vent-Axia Firsts

**At Vent-Axia we have a history of innovation. When you look at our heritage, it soon becomes clear why we have been the First name in Ventilation since our inception**

**1936** - Marine engineer Joe Akester invented the unitary extractor fan 'Silent 6' made from Bakelite material. The original products featured DC motors.

**1945** - Following the Second World War, Sir Winston Churchill bought two Silent 6 fans for his Chartwell home. A copy of the cheque for £28.19s 8p is in Vent-Axia's reception area at Crawley.

**1953** - The 'X type' fan was produced in 4 sizes and the unique 'R type' controller enabled the fans to be reversed for the first time.

**1961** - Vent-Axia Standard Range was launched and applications became more varied with the first dedicated models for roof and wall mounting and even a model for commercial and military vehicles.

**1975** - The Universal fan range featured the first 'centrifugal' shutter mechanism that allowed the shutters to operate in both directions without pullcords.

**1985** - The T Series product range featured a patented DC solenoid shutter and offered unique applications like In-Line and Dark Room models. Accessories like the Direct Mount Spigot and wall terminations also enabled the fans to be used with ducting as a complete installation kit.

**1985** - Vent-Axia was the first, (in fact the only) fan company to be awarded the Royal Warrant by the Queen for supplying unit ventilation to Royal Households.

**1992** - The 16th edition of IEE regulations 'on site guide' was issued and Vent-Axia launched the first Safety Extra Low Voltage fan to meet the requirements for electrical safety in bathrooms.

**1994** - The patented LuminAir became the first fan and light combination and its IP57 protection made the unit electrically safe for shower installation.

**1997** - Domestic energy efficient ventilation began with the launch of the Lo-Carbon range featuring a DC motor and patented shutter system that used no additional power.

**2002** - Commercial fans became energy efficient with Lo-Carbon T Series launched at Interbuild in Birmingham.

**2006** - The Sentinel range was developed as the first 'Demand' ventilation system with energy efficient EC/DC motors.

**2007** - Vent-Axia launched the first complete Lo-Carbon ventilation range featuring Residential Fans, MEV, MVHR and Commercial Energy Efficient products.

**2008** - As part of the Sentinel family, Totus 'Demand' Energy Recovery became the first low energy commercial ventilation system with a 90% efficient energy recovery and EC/DC motor.

**2009** - Sentinel Kinetic becomes the first Lo-Carbon product with 90% heat recovery and cooker hood facility.

**2011** - Launch of the first 100mm Single Room Heat Recovery Unit 'Lo-Carbon Tempra'.

**2013** - Adding to the dMEV family, 'Response' is launched featuring a unique digital display showing the calibrated installed airflow and pressure of the installation. The retro feel iQ is also launched delivering intelligent humidistat control.

## Part F and L of the Building Regulations from October 2010

We would like to welcome you to what we believe is a great place to start if you want to understand the Building Regulation requirements.

Parts F and L, issued in October 2010, emphasise the effective design, installation and operation of ventilation systems. The objective is to maximise carbon reduction through correctly specified and designed systems, competent installation minimising losses of the systems, verified performance once installed and correct operation by the home owner.

This section explains how to achieve compliance, looking at the three key areas in detail: Specification and Design, Installation and Commissioning, Operation and Maintenance.

### Ventilation

There are four systems covered in the building regulations and these are as follows:

**System 1** - Intermittent fans and background ventilation

**System 2** - Passive stack

**System 3** - Continuous mechanical extract ventilation (MEV)

**System 4** - Continuous mechanical balanced ventilation with heat recovery (MVHR)

### Part F Overview

Part F, Means of Ventilation, is the document in which the performance of different systems is covered. Things like airflow rates, noise, occupiers operation etc are all covered here.

The 2010 edition has a few top level changes which may affect you. They are as follows:

#### Ventilation Rates

The ventilation rate of a given property is calculated dependant on the designed infiltration rate. Basically, how much it leaks when the wind blows (anyone who has lived in a drafty house will understand the importance that this has!). There are now two levels of ventilation based on how much they leak air. This is measured in how much air leaks from the building by its surface area and the units are  $m^3/h$  of air per  $m^2$  of building area ( $m^3/h/m^2$ ).

1. Leaky House

2. Non Leaky House

1. For properties leakier than  $5m^3/h/m^2$  infiltration.
2. For properties tighter than  $5m^3/h/m^2$  infiltration.

Basically, tighter buildings now have an increased ventilation rate.

#### Installation and Commissioning

There is guidance on good installation practice and a commissioning guide set out in a supporting document to Part F known as the Domestic Ventilation Compliance Guide. This is designed to ensure that ventilation not only delivers the required airflow, but also does it efficiently and quietly. This is designed to link in with competent persons schemes and training programmes run by the industry. See our website ([www.vent-axia.com](http://www.vent-axia.com)) for more information on our BPEC training courses which are designed to teach good installation practices.

### Part L Overview

Part L, the document covering fuel and power, is where the energy efficiency information on ventilation is covered. The 2010 document has improved the energy efficiency targets for buildings by 25%. This affects ventilation equipment as they are part of the SAP calculation and contribute to tougher Target Emission Rates (TER's) set to deliver the 25% improvement over the previous regulations. There is also an opportunity to save energy through ventilation by using SAP Appendix Q. This is a method by which energy efficient ventilation systems can be selected and the energy benefit be added back into the SAP calculation.

The drive towards Zero Carbon Homes and meeting the requirements of the Kyoto agreement will be reflected in revisions to Part L up to 2016.

See [www.vent-axia.com/legislation](http://www.vent-axia.com/legislation) for update to all legislation.

### What does this mean for ventilation?

Ventilation uses energy in two ways. Firstly, mechanical systems use electricity to power the motors and secondly there is heat loss as air is exhausted from the building which has been heated. This is dealt with by a minimum energy efficiency level for all ventilation systems in a supporting document called The Domestic Building Services Compliance Guide. There are now building and refurbishment minimums in both the amount of electricity a motor can use (minimum specific fan power (SFP)) and a minimum energy efficiency of heat exchangers in systems that can recover the heat.

We recommend that best practice is followed when designing and installing a system, as the product performance is affected by both areas. We can offer support with both elements, please contact us for further information on how we can help.

### Summary

There are now four areas for consideration when selecting ventilation.

- Airflow performance
- Minimum energy efficiency limits
- Good installation
- Use by occupiers

Scan the barcode and download our brochure for more information on Ventilation for New Build Construction.

### Things to Remember

## General Information

### Technical Advice

Free technical, installation and sales advice is available from the Vent-Axia Technical Support Centre.

### Distribution

Vent-Axia products are available from all leading industrial fan stockists. For further information, or in case of difficulty, please contact the Vent-Axia Sales Centre in Crawley.

### Sound Levels

Vent-Axia has a state of the art sound testing facility at Crawley (UK) providing sound power levels for comparison purposes tested in accordance with ISO 13347-1:2004 and ISO 13347-2:2004. This is an international standard that describes methods for determining sound power levels of fans in one-third octave bandwidths to allow comparisons to be made between different products from different manufacturers in a fair and consistent manner.

The data is not intended to equal the sound power levels experienced in any specific installation but enable the customer to compare different products and make an informed decision on their requirements.

Each installation will use different building materials that can have an effect on how sound is absorbed and/or reflected. It is therefore very difficult to predict the exact sound power levels exhibited in any given installation.

### Performance

Tested in Vent-Axia test laboratories, performance testing is carried out in a balanced chamber test duct to BS 848: Part 1. This has a booster fan to overcome the system resistance.

The volume flow is measured by a pressure drop across a calibrated orifice plate at the entry to the system.

An adjustable damper provides a variable resistance to the test fan enabling its performance characteristics to be measured. The rated figures given are at free air performance.

### BSEN ISO 9001

Vent-Axia limited is certified by the British Standards Institution to BS EN ISO 9001 Cert. No. FM1792 QAS No. 3284/37.

### Intellectual Property

Products shown in this catalogue include aspects which are protected under patent, copyright, design copyright, registered design and trademark laws. Vent-Axia will take all necessary legal action in any part of the world against any party found to be manufacturing, distributing, selling or otherwise dealing with any article which infringes the Company's rights in its products.

### Guarantee

Applicable to units installed and used in the United Kingdom.

For details of guarantee outside the United Kingdom, contact your local supplier.

Unless otherwise stated, Vent-Axia guarantees its industrial fans for the period indicated on individual pages from the date of purchase, against faulty material or workmanship in normal use.

In the event of any part being found to be defective, the appliance will be repaired, or at the Company's option, replaced, without charge, provided that:

1. The product has been installed and used in accordance with the instructions given with each unit;
2. The product has not been connected to an unsuitable electrical supply (the correct electricity supply voltage is shown on the appliance rating label attached to the unit);
3. The product has not been subjected to misuse, neglect or damage;
4. The product has not been modified or repaired by any person not authorised by the Company;
5. The application is within the specification of the unit;
6. The product is connected to Vent-Axia switch gear;
7. Thermal overload protection has been correctly connected;
8. The product has been subject to regular maintenance appropriate to the installation;
9. When returning the product under guarantee, evidence of purchase is provided.

### Conditions of sale

All sales by Vent-Axia are made only upon the terms of the Company's Conditions of Sale ([www.vent-axia.com/help/conditions-sale](http://www.vent-axia.com/help/conditions-sale)), a copy of which may be obtained upon request.

### Online Heating & Ventilation Tools

Each tool has been designed with you in mind, making it simple to use & effective to apply, visit [www.vent-axia.com/tools-services](http://www.vent-axia.com/tools-services).

#### Online Product Selector

Our fully comprehensive online product selector tool. Choose from our complete specification range to best suit your project.

#### Online CPD

Vent-Axia offers a selection of CPD material online. With the addition of a questionnaire, you can independently complete your chosen module at your own convenience.

#### Online Trade Counter

Distributors with accounts can log in or register to check our live stock system for prices & stock availability & also review your previous trade orders.

#### Online Heating Calculators

By using the Vent-Axia Online Sizing Guides, you will be able to determine which product is suitable for you, helping you to achieve thermal comfort all year round.

#### Online Axial Fan Calculator

An interactive tool to help you calculate the installed performance of an axial fan when its being tested with a vane anemometer.

# Lo-Carbon Residential Fans

## ADF System 1

Continuing our commitment to Lo-Carbon we are proud to introduce the latest additions to the range. In this section you will find Lo-Carbon solutions for any intermittent and continuous fan application.

In axial or centrifugal, wall, ceiling or window applications in bathrooms or kitchens we now have a Lo-Carbon fan offering up to 90% energy saving over the equivalent traditional fan.

We are the first manufacturer in the UK to provide such a complete offer at a price point which makes these products a real alternative.

Lo-Carbon Residential Fans

# Lo-Carbon VA100®/SELV

## Axial Bathroom/Toilet Fans

### Features & Benefits

- Meets current Building Regulations Approved Document F & L
- Suitable for wall, ceiling, panel and window mounting
- Fitted with a motorised shutter
- 5 Year Motor Guarantee
- Protected against low energy lighting circuits
- Reduces your carbon footprint
- IPX4 rated - IPX7 rated (SELV)
- Efficient long life DC motor
- Uses up to 87% less energy
- Low sound levels
- 1 of 2 speeds selectable at installation
- Low specific fan power
- SELV Models - Supplied with a remote transformer
- Datalogger as standard on all models

### Long Life Ventilation VA100

The improved Vent-Axia Lo-Carbon VA100 range features Lo-Carbon long life DC motors that are more efficient than conventional motors whilst delivering up to 87% energy savings.

### Shutters

The Vent-Axia Lo-Carbon VA100 range is fitted with a motorised shutter mechanism that uses no extra power in operation or off.

### Installation

Fitted with integral protection against low energy lighting circuits, the VA100 is a 100mm axial fan suitable for use in the bathroom or toilet. VA100 is a quick and simple to fit product with easy-wire on one line terminals. Suitable for installation in window, walls or panels/ceilings at any angle using kits available. The 100mm telescopic wall kit fit walls 225 to 360mm thick.

The range meets the requirements of the current Building Regulations for the ventilation of toilets 6l/s and bathrooms 15l/s with a 15 minute overrun timer for internal rooms on the LT, XT and HTP models.

### Models

#### Lo-Carbon VA100/SELV LP (Pullcord)

Ultra long life DC motor. Pullcord On/Off override switch with indication light. 2 speed options.

Model	Stock Ref
LP	443159

# Lo-Carbon Silhouette® 100/SELV

## Bathroom/Toilet Fans

### Features & Benefits

- Models Basic/Timer/Humidity - Installation options
- Low power consumption - Lower running costs
- Quiet running
- Fully opening and closing shutters - Improved insulation
- Meets current Building Regulations Approved Document F & L
- 1 of 2 speeds selectable at installation
- Non transparent shutters - Enhanced privacy
- Blue power indication light - Modern aesthetics
- Ball bearing motors for vertical or horizontal application
- Unique humidity sensor track - Improved response
- 5 Year Motor Guarantee
- IPX4 rated - IPX7 rated (SELV)
- Suitable for wall, ceiling, panel and window\* mounting
- SELV Transformer to BS EN 60742
- SELV Models - Supplied with a remote transformer

### Slimline Bathroom Ventilation

With a slim profile of only 17mm, Silhouette blends in with the wall surface to provide an unobtrusive installation. Silhouette has an FID performance of up to 24 l/s. Silhouette can be ceiling/panel mounted and connected to an appropriate duct run to the outside.

Safety Extra Low Voltage (SELV) is designed for areas where a fan has to be fitted within zone 1 in a room containing a fixed bath or shower according to IEE wiring regulations. The Silhouette SELV can be safely installed within the spray area. The fan is rated IPX7, control is by a mains safety isolating transformer with 12V DC SELV output, which is sited away from any source of spray and out of reach of a person using a fixed bath or shower.

### Models

# Lo-Carbon Centra®/SELV dMEV Unit

## Features & Benefits

- Building Regulations Approved Documents F and L compliant, System 3 Continuous mechanical extract
- Recognised in SAP Appendix Q - Low SFP on SAP Q
- Quietest dMEV available
- Discreet, tasteful styling
- Single fan for use in all applications
- IPX4 rated - IPX7 rated (SELV)
- Pressure detection device
- Normal and Boost speeds
- Lo-Carbon motor offering 90% energy savings and long life
- 5 Year Motor Guarantee
- Suitable for wall, ceiling, panel and window mounting
- SELV Models - Supplied with a remote transformer
- SELV Models Suitable for 'Zone 1' installation

## What is de-centralised MEV (dMEV)

The Building Regulations Approved Document F gives examples of four main methods of ventilation. System 3, Continuous mechanical extract ventilation can be achieved using a single centralised extract unit such as the Sentinel Multivent ducted to 'wet' rooms (kitchen, bathroom, en-suite and WC) or by decentralised individual fans, such as the Lo-Carbon Centra in the 'wet' rooms. The fans run continuously at near silent levels providing a simple and effective form of ventilation.

SELV (Safety Extra Low Voltage) is designed for areas where a fan can be installed within Zone 1 in a room where there is a fixed bath or shower. Ingress Protected (IP) to IPX7 Lo-Carbon Centra SELV can be fitted safely within the spray area. The separate transformer can be mounted away from the spray zone and out of reach from the bath or shower.

The Lo-Carbon Centra meets the latest requirements of the Building Regulations Approved Document F for wholehouse system ventilation.

Selection of the two normal flow rates (6l/s or 9l/s) is via a simple 'jumper' on the control board. Different methods are available for operating boost speed from a simple switched live to integral humidistat or CO<sub>2</sub> sensor. See individual models for further details.

The attractive and discreet styling of the Vent-Axia Lo-Carbon Centra will complement the décor of any new home while virtually silent operation ensures optimum ventilation is achieved without intrusive noise.

## Lo-Carbon Centra

Recognised in SAP Appendix Q Lo-Carbon Centra has a specific fan power of only 0.18 W/l/s in through-the-wall kitchen applications.

## Models

### Lo-Carbon Centra

Auto speed selection at installation. The integral air pressure sensor checks the airflow when first installed and also helps the fan to compensate for external wind pressure.

# NEW Lo-Carbon iQ

## Intelligent Axial Bathroom/Toilet Fan

### Features & Benefits

- Minimal retro design to match bathroom décor
- Extremely quiet- only 22 dB(A)
- Truly surface mountable with removable spigots
- Intelligent controls and control panel for easy and flexible set up and commissioning
- Low power consumption – only 5 W
- Easy cleaning and maintenance
- 5 year Lo-carbon motor guarantee

### Market Leading Design

With the launch of this fan, we not only spent time perfecting the operation and users experience of the fan but also worked hard on the design. We hope to have succeeded in producing a surface depth that appeals to the eye and that matches modern fittings found in today's bathrooms. The visible blades give a retro-feel and helps to give the fan a very quiet noise level.

### Silent Operation

The open impellor and the unique method of operating the motor enables a greater array of operating options including silent continuous ventilation along with adaptable speed control and flexible timer functions.

### Humidity Control

For the first time we can now introduce an intelligent, fully automatic humidity sensor for moisture control. This means the fan learns to run only when it can make a difference to the indoor air quality. The fan continually monitors and records the moisture content to allow it to map the humidity profile throughout the year. This process enables the fan to ensure that it runs only when the fan can lower the moisture content in the air. This reduces nuisance running. The fan also has two modes for moisture control, silent or boost mode which can be selected via the touch pad control.

### Control Panel

Our aim has been for the end user to be able to control and understand the basic fan functions, without

the need of reading the manual. When the fan is connected to the power supply, it also performs a self-test where all the status lamps on the control panel are tested, as well as the function of the motor. Ideal for those installing to ensure that everything works. The simple controls, along with the LED feedback make the commissioning and any readjustment, quick and easy to complete.

### LED Feedback

With many fans it is difficult to understand the exact mode that they are running in. We have now simplified this to provide a visual indicator to see what the fan is doing and which mode is currently active. The fan uses three different colours on the visible status lamp to communicate exactly what it is doing. A blue light signifies that the fan is working to evacuate moisture via the humidity sensor. A yellow light signifies that the timer is running. And a purple light signifies that the fully automatic airing function is active.

### You Chose How The Fan Works

The intelligent overrun timer can be operated in several different ways, either via the light switch, integral pull-cord or a separate switch either as a standard On/Off or as a momentary switch stopping automatically after the overrun on time. You use the control panel to easily set the required post-running time at 15 or 30 minutes, depending on your choice.

### Full surface mounted installation

With the impellor and motor assembly designed to be low profile and accessible for maintenance, spigots on the fan are completely removable. This design enables the fan to be mounted onto a wall without any spigot

so that it can be truly surface mounted. This is an ideal function if you have a duct with a smaller dimension than 100 mm or a duct that bends directly off the back of the fan not providing any depth in the wall for the spigot.

### Automatic Airing Function

The airing function means when the fan has been inactive for 16 hours, it runs an airing programme for 60 minutes to exchange the air in the bathroom. No more worries about stuffy, musty odours in the bathroom when you have been on holiday.

### Cleaning and Maintenance

For a fan to ventilate effectively, it is vital that it is kept clean and that the ductwork and grilles are free from dust that can reduce the air flowing through them. This is the first fan introduced with the ability to simply open the centre of the fan and gain free access to the duct. Using the 'swing-out' function you can easily clean and clear the fan e.g. a clogged grille on the outside of the façade. Press the snap-in catch and swing out the motor - that's it!

### Lo-Carbon 5 year guarantee

As there is an integrated power adapter in the fan we have been able to use a low voltage motor that has a life span of approximately 60,000 hours. This is about 3-5 times longer than a standard fan. The motor features extremely quiet bearings. By using a low voltage motor we can significantly limit power consumption. The fan only consumes 5 Watts, about a third of a conventional AC bathroom fan.

# Lo-Carbon Solo Plus/SELV

## Centrifugal Bathroom/Toilet Fan

### Features & Benefits

- Up to 70% energy saving
- Filterless as standard - innovative impeller design means no need for a filter
- Integral Lo-Carbon power supply
- Meets current Building Regulations Approved Documents F & L
- IPX4 rated - IPX7 rated (SELV)
- Flush or surface mountable
- Adjustable rear or side exit spigot
- Lo-Carbon Solo Plus SELV is suitable for installation over or within reach of a shower or bath
- Extremely low sound levels
- 5 Year Motor Guarantee
- Suitable for wall, ceiling and panel mounting
- SELV Models - Supplied with a remote transformer

### Long Life Ventilation

The Lo-Carbon Solo Plus range from Vent-Axia has been specially designed for through the wall and ducted applications, suitable for internal bathrooms, toilets and other small rooms. Finished in white, the Lo-Carbon Solo Plus can be flush or surface mounted, with a 2 position 100mm circular spigot for rear entry or connecting to a vertical ducting system. The powerful centrifugal impeller allows installations using 100mm ducting in straight runs, whilst still achieving 15l/s as required by Building Regulations Approved Document F.

Continuous running products, such as the Solo Plus, installed in all wet areas of a dwelling are classed as a wholehouse ventilation system and therefore only need to move the amount of air as outlined in table 5.1a and 5.1b of Building Regulations Approved Document F.

The Lo-Carbon Solo Plus has an adjustable boost speed which is set at installation variable between a wall or duct setting for boost/override operation to meet Building Regulations thus ensuring minimum

energy usage and low sound levels. All models have an optional speed for constant trickle ventilation (12l/s), selectable at installation. Depending on the model, the fan will switch from trickle (if selected) to boost via the pullcord/light switch/humidity sensor/PIR.

All models can be wall, panel or ceiling mounted and can be connected to either circular, rectangular or Vent-Axia's flat ducting. Enclosure of the electrical components is manufactured from flame retardant grade material.

### Safety Extra Low Voltage Fan (SELV)

Designed for areas where a fan has to be fitted over or within Zone 1 in a room containing a fixed bath or shower according to IEE wiring regulations (BS 7671), the Lo-Carbon Solo Plus SELV fan can be safely installed within the spray area. The fan is rated IPX7. Control is by mains safety isolating transformer unit with 12V DC SELV output, which is sited away from any source of spray and out of reach of a person using a fixed bath or shower. Controller Supply voltage 220-240V/1/50Hz. Output to fan SELV 12V DC.

# Lo-Carbon Minivent

## Ducted Bath/ Shower Fan Kit

### Features & Benefits

- Complete kit supplied
- Meets Building Regulations Approved Document F & L requirements for toilets and bathrooms at max 1.5m of ducting and 1x 90° bend
- Adjustable timer version available
- 5 Year Motor Guarantee
- 1 of 2 speeds selectable at installation

### Powerful Lo-Carbon In-Line Fan Kit

The Vent-Axia Lo-Carbon Minivent ducted bath/shower kit includes all the components necessary to install a ducted 100mm system. This simplifies fitting of an efficient ventilation system to small rooms including bathrooms, shower rooms and toilets. It is especially suitable for en-suite bathrooms.

When installed, the fan kit has ample performance to meet the Building Regulations requirements for toilets and bathrooms. The timer version should be used for internal rooms.

The kit consists of a Lo-Carbon Minivent In-Line fan, a white ceiling grille and spigot, 3 metres of flexible duct and an external louvre for soffit or wall mounting. The duct should be cut to the required length and the bend radius kept to a maximum to provide optimum fan performance.

Enclosed terminal compartment, Class 2 appliance. Supply voltage 220-240/1/50Hz.

# Lo-Carbon LED Vent-A-Light Ducted Bath/ Shower Fan Kit

## Features & Benefits

- Suitable for shower enclosure and wet areas
- Now with a 3W LED Lamp
- Provides simultaneous fan and light operation
- Meets current Building Regulations Approved Document F & L
- 1 of 2 speeds selectable at installation
- Double insulated fan
- Light assembly Class III
- 5 Year Motor Guarantee
- Supplied with white and chrome bezels

100mm Lo-Carbon axial in-line shower fan and light kit. Provides simultaneous fan and light operation. Suitable for shower enclosures and wet areas. Available with both a white and chrome bezel on light assembly. The light assembly can be held in place using fixing clips or screws.

## Typical Specification

CE marked in accordance with all the relevant EEC Harmonised Directives.

Fan double insulated and the motor is fitted with Thermal Protection. Light assembly class III.

## Electrical

12 volt DC 3W GU5.3 sealed lamp.  
Powered by an LED Driver.

Input, AC. Output - 12 volt DC. 1A.

## 'One Fan fits all' Centrifugal Fan

### Features & Benefits

- Single fan for use in toilets, bathrooms, utility rooms and kitchens
- Meets current Building Regulations Approved Document F & L for intermittent or continuous use
- Guaranteed installed performance
- Recognised in SAP Appendix Q - Low SFP on SAP Q 0.38 W/l/s
- 100mm circular spigot for easy installation and replacement of any existing fan
- Filterless technology and maintenance free
- Lo-Carbon motors offering 90% energy savings and long life
- Motor cassette cartridge for simple replacement
- Suitable for flush or surface mounting
- 5 Year Motor Guarantee
- IPX4 rated - IPX7 rated (SELV)
- Suitable for wall, ceiling and panel mounting
- Datalogger standard on HTP versions

### Lo-Carbon Quadra SELV

The Lo-Carbon Quadra SELV has been designed to meet building requirements where there is a need to fit in Zone 1 containing a fixed bath or shower according to IEE wiring regulations. The Lo-Carbon Quadra SELV can be safely installed within the spray area with the 24VDC Safety Isolating Power Supply situated away from the spray zone and out of reach of the person using the facility.

### Ventilation for any room

The Lo-Carbon Quadra offers a single fan suitable for surface or flush mounting. Low speed selectable between 6, 9 and 12l/s and high between 15, 30 and 60l/s all with through the wall or two ducted selections to ensure installed performance is met.

### Discrete

With discrete aesthetics and low noise levels due to an accurately balanced impeller, it is also one of the most

unobtrusive centrifugal kitchen fans available. The front cover design also provides no area for dirt to build up so it stays looking better for longer.

### Models

# Lo-Carbon Silhouette® 125 Bathroom/Toilet Fans

## Features & Benefits

- Models Basic/Timer/Humidity  
- Installation options
- Low power consumption  
- Lower running costs
- Quiet running
- Fully opening and closing shutters  
- Improved insulation
- 1 of 2 speeds selectable at installation
- Non transparent shutters  
- Enhanced privacy
- Ball bearing motors for vertical or horizontal application
- Unique humidity sensor track  
- Improved response
- 5 Year Motor Guarantee
- IPX4 rated
- Suitable for wall, ceiling and panel mounting

## Slimline Bathroom Ventilation

With a slim profile of only 18mm, Silhouette blends in with the wall surface to provide an unobtrusive installation. Silhouette has a FID performance up to 149m<sup>3</sup>/h. Silhouette can be ceiling/panel mounted and connected to an appropriate duct run to the outside.

## Axial Kitchen & Utility Room Fans

### Features & Benefits

- Reduces the home's carbon footprint
- Long life Lo-Carbon motor lasts up to 5 times longer than conventional motors
- Up to 60% energy saving
- Meets current Building Regulations Approved Document F & L when installed
- IP44 rated
- Low sound levels
- 5 Year Motor Guarantee
- Suitable for wall, ceiling, window and panel mounting
- Fitted with a motorised shutter
- 1 of 2 speeds selectable at installation

### Long Life Ventilation

Vent-Axia Lo-Carbon VA150 fans feature Lo-Carbon long life DC energy saving motors that last up to 5 times longer than conventional motors, whilst delivering up to 60% energy savings. The extended life of Lo-Carbon fans is due to the use of a new generation of high quality electronically controlled ball-bearing motors especially developed for this range. The motors are perfectly designed for the wet conditions of utility rooms and kitchens, extracting stale, moisture-laden air quietly and efficiently.

### Shutters

The Vent-Axia Lo-Carbon VA150 range is fitted with a motorised shutter mechanism that uses no extra power in operation or off.

### Installation

The Lo-Carbon VA150 range is suitable for installation in panels, walls or windows using the kits available. Lo-Carbon fans are quick and simple to fit using reversible grommets and easy-wire terminals, and are suitable for wall or ceiling mounting at any angle.

150mm telescopic wall kits are available with a white or brown outside grille. The kit is supplied with a telescopic wall sleeve to fit walls 225-360mm thick. Hole diameter 152mm.

Window fitting kits are available for use with all Lo-Carbon 150mm models through single or double glazed windows up to 40mm thick. Hole diameter 152mm.

## Axial Kitchen Fans

### Features & Benefits

- Stylish ultra low profile grille
- Downstream airflow guide vanes for improved pressure development
- Ball bearing motors for vertical or horizontal application
- Wall kit design meets Building Regulations Approved Document F requirements
- 5 Year Motor Guarantee
- 1 of 2 speeds selectable at installation
- IPX4 rated
- Low Specific Fan Power
- Suitable for wall, ceiling and panel mounting

### Slimline Lo-Carbon Kitchen Ventilation

The Lo-Carbon Silhouette range is designed for modern living. With a profile of only 19mm on the kitchen models, Lo-Carbon Silhouette blends in with the wall surface to provide an unobtrusive installation.

Mounted in the centre of the fan, beneath the ultra slim profile grille, are the electronics, incorporating a humidistat (HT model) for detecting a change in internal humidity or an overrun timer option that is adjustable between 5 and 30 minutes.

FID performance of 67l/s, double insulated. Power consumption only 8.2 Watts.

# VA100® SELV

## Axial Bathroom/ Toilet Fans

### Features & Benefits

- Designed for safe use in the spray area of a bathroom or shower and within reach of a person using a bath or shower
- Available with electric shutter
- Fan IPX7 rated
- SELV Transformer to BS EN 60 742
- Window, ceiling, wall or panel mounting
- Indication light
- Meets current Building Regulations Approved Document F

### Safety Extra Low Voltage Fan (SELV)

A range of fans with optional shutter, timer and humidity controlled versions to match application requirements precisely. Designed in a clean white finish and suitable for ambient temperatures up to +40°C the unit is fitted with Standard Thermal Overload Protection (S.T.O.P.).

Designed for areas where a fan has to be fitted over or within Zone 1 in a room containing a fixed bath or shower according to IEE wiring regulations (BS 7671), the VA100 SELV fan can be safely installed within the spray area. The fan is rated IPX7. Control is by mains safety isolating transformer unit with SELV output, which is sited away from any source of spray and out of reach of a person using a fixed bath or shower.

## Fan & Light Combination Unit

### Features & Benefits

- The original fan and light combination
- IPX7 rated
- Suitable for shower enclosures and wet areas - can be used within reach of a person using a bath or shower
- Safety extra low voltage (SELV)
- Easy installation
- White, Gold and Chrome bezels available

### Safety Extra Low Voltage

The revolutionary Vent-Axia LuminAir Safety Extra Low Voltage fan and light in a single ceiling mounted fitting.

The IPX7 unit is installed directly over a shower in complete safety. Vent-Axia LuminAir extracts moisture and humidity at source, preventing damaging condensation from spreading. At the same time it bathes the shower enclosure in a rich soft light - bringing any dark shower to life. Ideal for all types of bathroom and shower applications, and is particularly suitable for bedsit and en-suite shower installations.

Designed for mounting in a wide variety of ceiling thicknesses. The safety isolating transformer to BS EN 60742 is mounted in a purpose made enclosure that can be wall mounted or sited in the loft, and is designed to accept mini trunking (LuminAir L transformer - IP20 - loft mounted).

LuminAir has a 20 Watt 40° spread, preformed Dichroic Multi-Mirror™ lamp, to give a pool of soft warm light. The lamp has a long life and is simple to change.

Separate lighting transformer also supplied.

- IPX7 rated inlet assembly
- Suitable for shower enclosures and wet areas - can be used within reach of a person using a bath or shower
- Safety extra low voltage (SELV) lamp
- Easy installation
- White, Gold and Chrome bezels available

### High Performance Fan & Light Combination

LuminAir is also available in the form of a ventilation kit. The IPX7 unit is installed directly over a shower in complete safety.

Vent-Axia LuminAir extracts moisture and humidity at source, preventing damaging condensation from spreading. At the same time it bathes the shower enclosure in a rich soft light - bringing any dark shower to life. Ideal for all types of bathroom and shower applications, and is particularly suitable for bedsit and en-suite shower installations.

### Models

For applications where a more powerful system is required, the kit comprises a luminair turbo L or T mains fan and SELV light, choice of bezel, 90° bend, 6 metres of flexible duct, quick fix wall grille and four cable ties. Meets Building Regulations approved Document F performance assuming ductwork provided is fully extended and one 90° bend.

#### LuminAir Turbo SKL (Switch Live)

Provides simultaneous On and Off operation of the fan and light from the bathroom light switch.

**Stock Ref**  
**453419** - White

#### LuminAir Turbo SKT (Timer)

Switches the fan On with the light. When the light is switched Off, the fan continues to run for an adjustable fixed period to meet the Building Regulations for internal bathrooms.

**Stock Ref**  
**453422** - White

#### Optional Bezels

**Stock Ref**  
**452044** - Chrome  
**452045** - Gold

## Centrifugal Bathroom/ Toilet Fan

### Features & Benefits

- **Filterless as standard - innovative impeller design means no need for a filter**
- **Meets current Building Regulations Approved Documents F & L requirements for domestic bathrooms and toilets**
- **IPX4 rated**
- **Flush or surface mountable**
- **Adjustable rear or side exit spigot**
- **Extremely low sound levels**
- **Suitable for wall, ceiling and panel mounting**

### Bathroom and Toilet Ventilation

The Solo Plus range from Vent-Axia has been specially designed for through the wall and ducted applications, suitable for internal bathrooms, toilets and other small rooms. Finished in white, the Solo Plus can be flush or surface mounted, with a 100mm circular spigot for rear entry or connecting to a vertical ducting system. The spigot can also be adjusted for side ways exhaust enabling recessed ceiling installations within limited ceiling voids. The powerful centrifugal impeller allows for installations with longer duct runs using 100mm ducting, whilst still achieving 15 l/s as required by Document F of the current Building Regulations.

Continuous running products, such as the Solo Plus installed in all wet areas of a dwelling are classed as a wholehouse ventilation system and therefore, only needs to move the amount of air as laid down in table 1.1b of Document F.

The Solo Plus has a choice of two boost/override motor speeds set at installation, medium (17l/s) or high (22l/s), with an optional constant trickle speed (9l/s), also selectable at installation except in the P model. Depending on the model, the fan will switch from trickle (if selected) to boost (medium or high) via the pullcord/light switch/humidity sensor/PIR.

### Performance Guide

Model	Extract Performance l/s (m³/h) - FID			Watts			dB(A) @ 3m		
	Max Boost	Min Boost	Trickle	Max Boost	Min Boost	Trickle	Max Boost	Min Boost	Trickle
Solo Plus P/T/HT/TM	22 (80)	17 (61)	9 (32)	17.1	10.9	6.3	34.5	24	11.5

Tested at 240VAC @ 50Hz

All models can be wall, panel or ceiling mounted and can be connected to either circular, rectangular or Vent-Axia's flat ducting. Enclosure of the electrical components is manufactured from flame retardant grade material.

Supply voltage 220-240V/1/50Hz.

### Models

#### Solo Plus P (Pullcord)

Flush or surface mountable. Control by pullcord single speed; 1 of the 3 speeds selectable at installation.

**Stock Ref**  
**427477**

#### Solo Plus T (Timer)

## Centrifugal Bathroom/ Toilet Fans

### Features & Benefits

- 100mm high performance centrifugal extract fan for internal bathrooms, toilets and other small rooms
- High performance 24l/s
- Single speed, dual speed and overrun timer models
- Suitable for wall, ceiling, panel and window mounting
- Built-in washable filter feature
- PIR version also available
- Suitable for use with flat ducting
- Double insulated
- IPX4 rated

### High Performance Ventilation

The Solo Safety Extra Low Voltage (SELV) range of high performance centrifugal extract fans from Vent-Axia have been specifically designed for effective ducted ventilation of internal bathrooms, toilets and other small rooms. Finished in White. The Solo range can be used with 100mm diameter smooth bore duct in straight runs equal to 50m, yet still meets the 15l/s required by the current Building Regulations Document F for ventilation of bathrooms. IP44 Rated.

Models are available for surface or recessed mounting directly into standard 100mm diameter ducting. Suitable for panel, wall and ceiling installations and windows up to 25mm thick. For high rise or coastal applications, install through the wall with a Vent Cowl (Stock Ref 561403).

### Models

## Centrifugal Bathroom/ Toilet Fans

### Features & Benefits

- Suitable for installation over or within reach of a shower or bath
- Built-in washable filter feature
- Meets current Approved Building Regulations Document F
- IPX7 rated
- Transformer complies with BS EN 60742
- Two speed model available
- Suitable for wall, ceiling, panel and window mounting

### Safety Extra Low Voltage

The Solo Safety Extra Low Voltage (SELV) 12 range has been developed specifically for complete safety in the 'splash zone' of a bathroom and shower room for those rooms, usually internal, that need to have the exhaust air ducted some distance to an external discharge point. A single inlet impeller has been designed for maximum performance and minimum noise levels. The grille ensures efficient air management and incorporates a filter that can be removed for cleaning without dismantling the fan.

Suitable for wall, panel and ceiling installations and windows up to 25mm thick. For high rise or coastal applications, install through the wall with a Vent Cowl (Stock Ref No. 561403). With a powerful SELV motor and proven high efficiency centrifugal impeller, Solo SELV 12 can be used with 100mm diameter smooth bore duct in straight runs equal to 50m, yet still meets the 54m³/h (15 l/s) required by the current Building Regulations Approved Document F for ventilation of bathrooms. Solo SELV 12 can also be used with flat ducting for shorter concealed runs.

The safety isolating transformer, to BS EN 60742, is mounted in a purpose made enclosure. The enclosure can be wall mounted or sited in the loft. The enclosure will accept mini trunking.

### Electrical

Rear 20mm conduit entry for recessed wiring and side entry grommet for surface wiring.

Supply voltage to transformer/controller 220-240V/1/50Hz. Output to fan 12V SELV/1/50Hz.

To meet IEE Regulations, timer models should be isolated using a 3 pole isolator.

**3 pole isolator**

# VA140/150

## Axial Kitchen Fans

### Features & Benefits

- VA140/150 Panel models
- 2 Year Guarantee
- Thermo electric shutters to prevent back drafts
- Meets current Building Regulations Approved Document F
- IP44 rated
- Suitable for wall, ceiling, panel and window mounting

### Kitchen ventilation

VA140/150 Panel models are designed to alleviate the everyday problems that condensation and household odours may cause. Effectively extracts odours and moisture laden air from kitchens giving a healthy and fresh environment.

### Building Regulations

Specifically sized to meet the current Building Regulation requirements for powered extract ventilation in domestic kitchens. Control facility fitted as standard. The VA140/150 range is fitted with internal louvres conforming to the latest international safety standards.

Please contact our Customer Service Department for exposed site application.

# Centrif® Duo

## Centrifugal Kitchen & Utility Room Fans

### Features & Benefits

- 100mm circular spigot for speedy installation
- Humidity sensing model for automatic operation
- Suitable for both kitchen and utility rooms
- Removable grille assembly for easy cleaning
- Speed set at installation
- Meets current Building Regulations Approved Document F
- Timer model for internal rooms
- Surface or recessed installation options
- Includes washable grease filter

### Kitchen and Utility Ventilation

The Centrif Duo range is a series of 100mm centrifugal extract fans for the domestic environment. The range is designed to provide extraction levels that comply with Building Regulation requirements, with special humidity sensing variants for local authority use.

### Motor

The motor features greased-for-life ball bearings which allow the fan to be installed at any angle. Insulation is Class E. Double insulated appliance. Supply voltage 220-240V/1/50Hz.

### Fast installation

The Centrif Duo has a 100mm circular spigot. The Flush mounting kit enables the spigot to be converted to a side outlet. The spigot also encloses a built-in, spring operated back draught shutter. The Centrif Duo Range can be wall mounted using a telescopic wall fitting kit available as an accessory (requires a 115mm diameter hole). For ceiling applications the range is ducted either through a soffit outlet or roof cowl assembly. There is convenient access for wiring which can be surface or recessed.

### Humidistat control

Humidistat is selectable for either kitchen or utility speed separate to any other control to reduce nuisance noise. Boost operation by pullcord or switch live.

### Models

#### Centrif Duo P (Pullcord)

Two speed kitchen extract fan with pullcord. Choice of two speeds for boost, set at installation.

## Centrifugal Kitchen & Utility Room Fans

### Features & Benefits

- Meets current Building Regulations Approved Document F
- Optional filter available
- Easy installation
- Fan can be wall or ceiling mounted
- Suitable for both kitchen and utility rooms
- Constant trickle boost speed available on DP & HTP models

### Ultra Quick Ventilation

Centrif Duo Plus is designed to provide extraction levels that comply with Building Regulations Approved Document requirements, with special humidity sensing variants for local authority use.

The Centrif Duo Plus is for kitchens and utility rooms and large bathrooms. Surface mounting directly into standard 100mm diameter ducting, through the wall or ceiling installation.

### Fast installation

The Centrif Duo Plus has a 100mm circular spigot. The Flush mounting kit enables the spigot to be converted to a side outlet.

The spigot also encloses a built-in, spring operated back draught shutter. The Centrif Duo Plus Range can be wall mounted using a telescopic wall fitting kit available as an accessory (requires a 115mm diameter hole). For ceiling applications the range is ducted either through a soffit outlet or roof cowl assembly. There is convenient access for wiring which accommodates surface or recessed installation.

# Duet® Twin Fans

## Bathroom/Toilet

## Run & Standby Fans

### Features & Benefits

- Designed to meet Local Authority run and standby specifications
- Quiet operation
- Meets current Building Regulations Approved Document F
- Run and standby facility
- Self diagnostic check of controls
- Overrun timer as standard
- Remote PIR's or humidistat can be installed

### Bathroom ventilation

Duet is a range of run and standby fans designed to provide extraction levels that **comply with Building Regulations Approved Document F** for bathrooms and toilets and incorporates a run on timer. All models offer automatic change over on fan failure. Ultra quiet and particularly suitable for areas where unobtrusive sound levels are essential. Duet meets the requirement of Health Technical Memorandum 2025, foul extract ventilation systems 2.8. Ideal for new build and refurbishment installations.

Duet features include LED indicators showing the status of the unit, self diagnostic check of controls before the fan will start, run and standby facility, 5-25 minute run on timer and 24 hour auto fan change over. Suitable for ambient temperatures of up to +40°C, built-in dust filters.

Double insulated appliance.

Supply voltage 220-240V/1/50Hz.

Duet is suitable for use with either 100mm diameter ducting or flat ducting, for installations that need concealed ducting, with a minimal ceiling void of only 90mm required.

# Gemini Twin Fans

## Kitchen/Utility

## Run & Standby Fans

### Features & Benefits

- Suitable for kitchen and utility room applications
- Comes complete with a plug in power pack
- Duty sharing features supplied as standard
- Meets current Building Regulations Approved Document F
- Surface, flush and duct mounting versions are available
- Overrun timer as standard
- Remote PIR's or humidity sensors can be installed

### Ultra quiet ventilation

The Vent-Axia Gemini range of run and standby fans offers high performance double inlet forward curve fan motor impellers, typically suitable for high system resistance installation. In the event of failure the standby fan is operated, and visual fan failure indication (via integrated or optional remote indication light) is illuminated. The surface mounting model has a styled cover. For flush or duct mounting the power pack and back plate assembly is located within a galvanised steel casing and fitted with either a PVC cover for flush mounting or a galvanised steel cover for connection to ducts.

The Gemini range has an integrated overrun timer function fitted as standard, enabling versatile operation to **comply with the Building Regulations Approved Document F** for internal rooms and Local Authority specification. The overrun timer can be manually adjusted between 1 and 20 minutes. (Units are factory set with the timer set to approximately 20 minutes).

All models incorporate a basic power pack which includes the motor housing, power on, fan run and fan fail indication light, which allows you to install the back plate at the first fix stage and plug in the power pack when the unit is ready for use. The power pack is pre-wired and incorporates a plug in arrangement for fitting to the back plate.

### Installation

The Vent-Axia Gemini range is designed for installation in kitchens and utility rooms. Surface, flush or duct mounting models are available. The units **meet current Building Regulations Approved Document F**.

### Models

#### Gemini Surface

A surface mounted twin fan model with 100mm spigot.

# Freshvent

## Natural Vent

### Features & Benefits

- **Completely silent, all year round ventilation**
- **Complements existing ventilating fans**
- **Filtered, natural air without draughts**
- **Control of the indoor environment**
- **Helps prevent damaging condensation**
- **No energy consumption, no running costs**

### Natural Ventilation

Freshvent 100 is a range of passive ventilators that simply and naturally provide the effective ventilation needed by everyone working and living in an indoor environment. When used with positive pressure ventilation, Freshvent 100 provides an important outlet for air circulating around the house. Stale air is expelled through the unit to the outside without letting in noise and draughts.

This makes Freshvent 100 particularly suited to the 'tight' construction of new homes - and provides a stylish alternative to traditional slot/airbrick ventilators. In addition, Freshvent 100 is ideal for older properties that have been refurbished with double glazing and loft insulation. They require ventilation to combat the problems associated with condensation.

Kitchens, utility rooms, bathrooms and toilets are rooms where conventional domestic extract fans are normally found. The natural ventilation principle of Freshvent 100 is particularly suitable for 'clean' living spaces such as bedrooms, lounges and work rooms.

There are four Vent-Axia Freshvent 100 models and an extensive range of accessories available to customise the units to your exact requirements. All units are easily dismantled allowing quick access to the filter for cleaning or replacement. The high capacity of the filter results in fewer filter changes. The damper plate is insulated against condensation and noise penetration.

### Acoustic Duct Versions

Acoustically damped pipe fitted around unit to reduce external sources of noise such as traffic.

Suitable for bedrooms and other rooms where low noise levels are a priority. Comes complete with Freshvent 100 db and Freshvent 100 Thermo db versions.

### Models

#### Freshvent 100

Pullcord operated. Designed to provide filtered air from outdoors while mixing it efficiently with the air in the room. Adjustable to increase or reduce the free area and airflow to suit a particular environment.

**Stock Ref**  
**453200**

#### Freshvent 100 dB

Pullcord operated. Adjustable to increase or reduce the free area and airflow to suit a particular environment. Supplied with acoustically damped pipe for applications requiring low noise levels.

**Stock Ref**  
**453208**

#### Freshvent 100 Thermo

Thermostatically regulated, with the vent size automatically adjusting according to the temperature outside. As the temperature decreases the damper closes, opening again as the temperature rises. The built-in thermostat regulates the size of the damper opening so that it starts to close at 10°C and is completely closed at -5°C.

**Stock Ref**  
**453182**

#### Freshvent 100 Thermo dB

Thermostatically regulated, with the vent size automatically adjusting according to the temperature outside. As the temperature decreases the damper closes, opening again as the temperature rises. The built-in thermostat regulates the size of the damper opening so that it starts to close at 10°C and is completely closed at -5°C. Supplied with acoustically damped pipe for applications requiring low noise levels.

**Stock Ref**  
**453253**

All versions come with a standard general duty filter. Replacement filters are available.

#### Filter for Freshvent 100

**Stock Ref**  
**453188**

#### Filter for Freshvent 100 Thermo

**Stock Ref**  
**453197**

#### Storm Shield

May be fitted to any of the Freshvent range to prevent ingress of water and eliminate the risk of draughts and cold air surges. Closes entirely during storms. Particularly suitable for high-rise/coastal applications or anywhere exposed to high winds.

**Stock Ref**  
**453206**

Not suitable for dB models.

#### Extension Bushing

**Stock Ref**  
**453275**

Freshvent 100 Thermo dB	150	400

# Cooker Hoods

### Features & Benefits

- A choice of four styles for domestic applications
- Wall, ceiling or cabinet fixed
- Compatible with flat ducting or Vent-Axia aluminium flexible ducting
- All models are provided with a charcoal filter and washable grease filter as standard
- All models are fitted with mains lead, built-in lighting and choice of 3 speeds

### Kitchen Ventilation

Vent-Axia offers a range of cooker hoods for the removal of cooking odours and steam at source in the domestic kitchen. Each model is designed to provide the extraction levels necessary to comply with Building Regulation requirements for kitchens with ducted outlets plus models that provide higher outputs for busier kitchens.

A choice of styles is available to include wall, or cabinet fixed models to provide integrated ventilation in any modular fitted kitchen from a terraced galley kitchen to the most extensive layouts. Models are available that can re-circulate or extract with the use of ducting.

The Building Regulations for the mechanical ventilation of kitchens with open-able windows in dwellings require that extractor hoods should be capable of extracting at a rate of 30 l/s (108m<sup>3</sup>/h).

When used with ducting, the resistance of the entire system should be considered so that the required performance is achieved. Extractor hoods should not be sited where ambient temperatures are likely to exceed +50°C.

### Models

#### Genova

An cooker hood with 'flip front' glass visor designed to be wall-mounted or mounted beneath a top cabinet. Offering three speeds with extract rates of 100/160/220m<sup>3</sup>/h.

**Stock Ref**  
**120801**

#### Napoli

An integrated cooker hood designed to accept a kitchen cupboard door-panel in matching height and finish to existing units. Offering three speeds with extract rates of 120/170/220m<sup>3</sup>/h.

**Stock Ref**  
**120811** (White)  
**436084** (Silver)

#### Rimini/Milano/Roma

The Rimini (500mm width), Milano (600mm width) and Roma (900mm width) are stainless steel chimney cooker hoods with an extending chimney to fit varying ceiling heights. Offering three speeds with extract rates of 340/420/460m<sup>3</sup>/h.

**Stock Ref**  
**427166** - Rimini  
**120841** - Milano  
**120851** - Roma

### Dimensions (mm)

Model	W	D	H
Genova	600	470	150
Napoli	600	275	450
Rimini	500	500	1115
Milano	600	500	1115
Roma	900	500	1115

Extractor hoods are not suitable for use above an eye level grill.

Must be mounted between 760mm and 900mm above the hob.

# Vent-Axia® basics

**Basic**

**Stock Ref**  
**432504**

The kit consists of a 100mm axial in-line fan 3 meters of flexible ducting, an exterior grille, light transformer and 12V 35W dichroic halogen light assembly. IP44 rated.

**Timer**

**Stock Ref**  
**432505**

# Eclipse

## Bathroom & Kitchen Axial Fan

### Features & Benefits

- Wall or Ceiling mountable
- Integral back draught shutter mechanism
- Meets current Building Regulations Approved Document F
- 100mm and 150mm size options
- Fixing kits available
- Fan IP44 rated -100mm
- Fan IPX4 rated -150mm

### Bathroom ventilation

The Eclipse range of circular axial fans is designed to be installed in kitchens and bathrooms. Its simple design provides an unobtrusive fitting that is sympathetic with most interiors.

# dMEV, MEV & PIV Systems

## What is MEV & dMEV?

The current Building Regulations Approved Document F gives examples of four main methods of ventilation. System 3, continuous mechanical extract ventilation can be achieved using a single centralised extract unit such as the Sentinel Multivent ducted from 'wet' rooms (kitchen, bathroom, en-suite and WC) or by decentralised individual fans (dMEV) in the 'wet' rooms. The fans run continuously at near silent levels providing a simple and effective form of ventilation.

The Centra meets the latest requirements of the current Building Regulations Approved Document F for wholehouse system ventilation.

## Lo-Carbon Response

The continuous running, constant volume Response dMEV unit features an innovative digital display. The unique display (patent pending) provides the calibrated installed airflow and pressure of the installation meaning that there is no need to test the installation with an airflow measuring device.

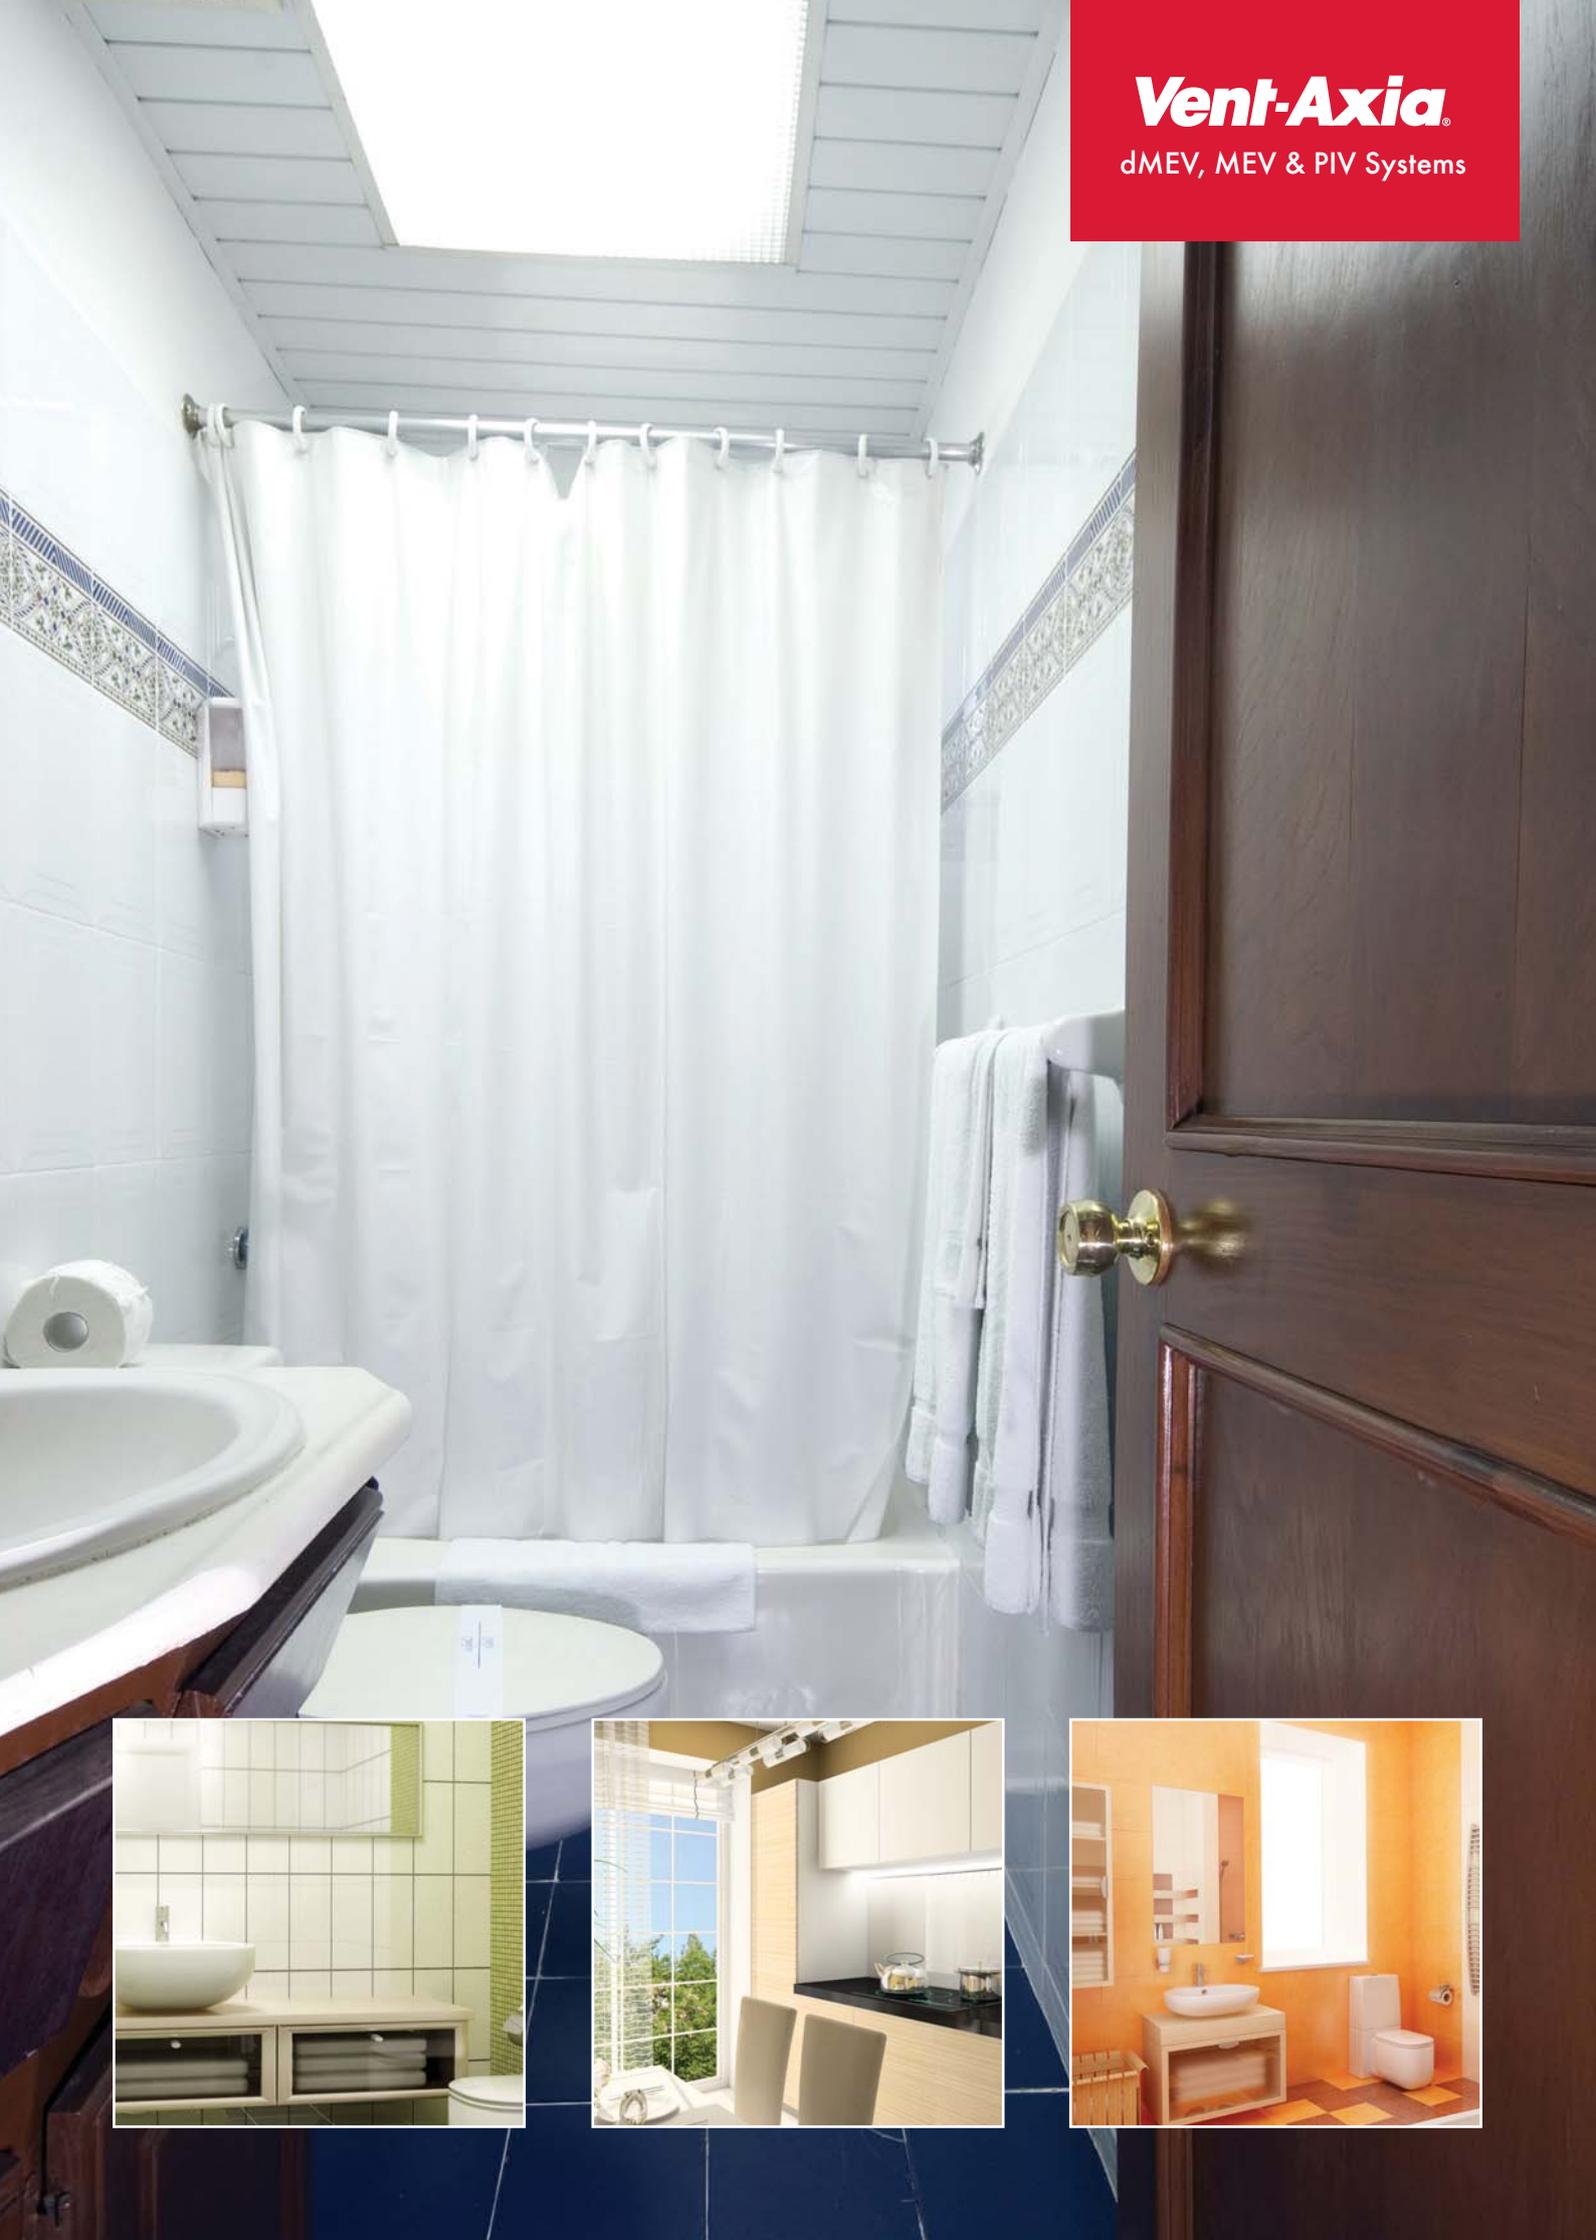

Quiet running and with high pressure development, the Response is best in class.

	NEW Lo-Carbon Response dMEV Unit	56-57
	Lo-Carbon Centra/SELV dMEV Unit	58-59
	Lo-Carbon Multivent MEV Unit	60
	Multivent MEV Unit	61
	Lo-Carbon Sentinel Multivent & Controllers	62-64
	Lo-Carbon Multivent MVDC-MS/MSH MEV Unit	65
	Lo-Carbon Pozidry Positive Pressure Unit	66-67
	Lo-Carbon Pozidry Compact Positive Pressure Unit	68-69

**Vent-Axia**

dMEV, MEV & PIV Systems

# Lo-Carbon Response

## dMEV Unit

### Features & Benefits

- Recognised in SAP Appendix Q
- Constant volume
- Display showing airflow and system pressure (Patent pending)
- Switched live connection for external switches/sensors
- 220-240V input
- 6l/s or 8l/s trickle speed selection
- 13l/s boost speed
- IPX4 rated
- Multi-orientation grille – grille can be rotated by 90/180 degrees to suit ceiling configuration requirements
- New comfort control option (patent pending)

### Lo-Carbon Response

Continuous running, constant volume dMEV unit with switched live (LS) and innovative digital display. Quiet running and with high pressure development, the Response is best in class.

### The New Response fan from Vent-Axia

Following the introduction of the new Domestic Ventilation Compliance Guide within Part F 2010, and the requirement to test the installed airflow of extract fans, the new Response fan from Vent-Axia provides the easiest install available.

The unique display (patent pending) provides the calibrated installed airflow and pressure of the installation meaning that there is no need to test the installation with an airflow measuring device.

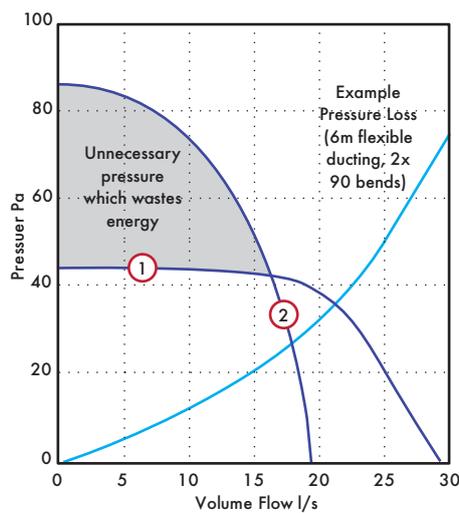

The constant volume technology automatically adjusts the speed of the fan to ensure the desired airflow is delivered. With the new silent higher pressure axial impellor this can meet the requirements of many domestic installations without the need to use a centrifugal fan.

### Axial, rather than centrifugal?

Using the new high pressure silent axial impellor has enabled the fan to not only develop great installed performance over duct runs, but to do it in the most energy efficient way. Response can provide excellent pressure whilst still maintaining the energy efficiency and not wasting energy on high pressure at low air volumes.

Configuration	Location	Alternative Centrifugal Fan SFP	Vent-Axia Response SFP	Saving
In room	Kitchen	0.38	0.17	55%
	Wet Room	0.29	0.18	38%
Through Wall	Kitchen	0.36	0.13	64%
	Wet Room	0.28	0.15	46%

Existing centrifugal fans often develop pressure but the actual installed air flows can mean that the pressure is of no use as the airflow falls below the requirement. This enables the fan to save up to 64% of the specific fan power (SFP) of the SAP Appendix Q data for existing centrifugal alternatives.

- ① Vent-Axia Lo-Carbon Response Fan
- ② Competitor Product

### Side view of airflow display

Be confident that the Response is delivering the right performance with our innovative digital display showing the airflow and system pressure of the installed product.

# Lo-Carbon Centra®/SELV dMEV Unit

## Features & Benefits

- Building Regulations Approved Documents F and L compliant, System 3 Continuous mechanical extract
- Recognised in SAP Appendix Q - Low SFP on SAP Q
- Quietest dMEV available
- Discreet, tasteful styling
- Single fan for use in all applications
- IPX4 rated - IPX7 rated (SELV)
- Pressure detection device
- Normal and Boost speeds
- Lo-Carbon motor offering 90% energy savings and long life
- 5 Year Motor Guarantee
- Suitable for wall, ceiling, panel and window mounting
- SELV Models - Supplied with a remote transformer
- SELV Models Suitable for 'Zone 1' installation

## What is de-centralised MEV (dMEV)

The Building Regulations Approved Document F gives examples of four main methods of ventilation. System 3, Continuous mechanical extract ventilation can be achieved using a single centralised extract unit such as the Sentinel Multivent ducted to 'wet' rooms (kitchen, bathroom, en-suite and WC) or by decentralised individual fans, such as the Lo-Carbon Centra in the 'wet' rooms. The fans run continuously at near silent levels providing a simple and effective form of ventilation.

SELV (Safety Extra Low Voltage) is designed for areas where a fan can be installed within Zone 1 in a room where there is a fixed bath or shower. Ingress Protected (IP) to IPX7 Lo-Carbon Centra SELV can be fitted safely within the spray area. The separate transformer can be mounted away from the spray zone and out of reach from the bath or shower.

The Lo-Carbon Centra meets the latest requirements of the Building Regulations Approved Document F for wholehouse system ventilation.

Selection of the two normal flow rates (6l/s or 9l/s) is via a simple 'jumper' on the control board. Different methods are available for operating boost speed from a simple switched live to integral humidistat. See individual models for further details.

The attractive and discreet styling of the Vent-Axia Lo-Carbon Centra will complement the décor of any new home while virtually silent operation ensures optimum ventilation is achieved without intrusive noise.

## Lo-Carbon Centra

Recognised in SAP Appendix Q Lo-Carbon Centra has a specific fan power of only 0.18 W/l/s in through-the-wall kitchen applications.

## Models

### Lo-Carbon Centra

Auto speed selection at installation. The integral air pressure sensor checks the airflow when first installed and also helps the fan to compensate for external wind pressure.

# Lo-Carbon Multivent MEV Unit

## Features & Benefits

- Fitted with four extract 100 or 125mm diameter spigots allowing quick connection to ducts
- Option of wall, ceiling and loft mounting
- Quiet operation suitable for continuous operation
- Can extract from a number of rooms, depending on the dwelling
- Wireless Controller available

The Lo-Carbon Multivent continuous mechanical extract ventilation range is designed for the simultaneous ventilation of separate areas in the home or as a multi-point extractor system for a wide range of commercial applications.

In the home the system is usually located in the loft or airing cupboard with ducts taken to the bathroom, kitchen and utility room to remove water vapour at source and from toilets to remove odours.

Lo-Carbon Multivent is ideal for a range of commercial multipoint extract applications such as toilets, fitting rooms, and kiosks. The units can be installed at any angle and where the ambient air has a high humidity content condensate drains are provided.

The Lo-Carbon Multivent H version incorporates a built-in humidity sensor to switch between two of the three speeds. A Wireless Controller is available for use with the Lo-Carbon Multivent H with three speed options offering total control of the systems.

# Lo-Carbon

# Sentinel® Multivent

## MEV Unit

### Features & Benefits

- Reduces your carbon footprint
- Recognised in SAP Appendix Q
- Specific fan power 0.16 W/l/s (K+1)
- Suitable for use with external sensors and controllers
- Wireless control option
- Ultra quiet - acoustically lined for low noise levels
- Complies with Building Regulations ADF and ADL
- Manufactured in the UK from re-cyclable materials

Sentinel Multivent continuous mechanical extract ventilation, C-MEV is designed for the simultaneous ventilation of separate areas in the home or as a multipoint extraction system for a wide range of commercial applications. The units can be installed at any angle. Where the ambient air has a high humidity content condensate drains are provided.

### In support of Sentinel Multivent, Vent-Axia offers:

- Practical advice on product selection and installation
- Guidance on solutions to meet legislation requirements
- Project management and site deliveries
- After sales support and maintenance information

### The need to improve efficiency

Sentinel Multivent has been designed to meet the exacting demands of developers, installers and users offering advanced control options and easier installation and commissioning.

- Demand Control - enables precise ventilation rate, is set in 1% increments based on property size
- Integral LCD display allows the installer to select appropriate low, normal and boost speeds to meet demand
- Manual and automatic control options

- Integral adjustable overrun timer and delay on timer
- Plug-n-Play automatic sensor detection
- Switched live and SELV connections
- Dry Out setting - Option set at installation, Sentinel Multivent will run on boost for 1 week to assist in removing moisture
- Optional Wireless Control - up to 4 controllers on any one system
- Energy efficient EC/DC motors - 1/3 less energy lost to heat than a conventional AC motor
- Low Specific Fan Power (SFP) making it one of the most efficient products on the market

### Legislation

- Meets Building Regulations Approved Document F (System 3)
- Recognised in SAP Appendix Q up to kitchen + 6 wet rooms
- Meets carbon footprint reduction targets
- Lowest SFP figures of any demand control MEV system

### The need for better health

Removal of pollutants, such as moisture, carbon dioxide and external fumes are all important factors in maintaining indoor air quality, helping to create a healthier living environment.

- The integral humidity sensor (Sentinel Multivent H) increases fan speed in proportion to relative humidity levels, saving energy and reducing noise
- The sensor also reacts to small but rapid increases in humidity, even if the normal trigger threshold is not reached. This unique feature ensures adequate ventilation, even for the smallest wet room
- Night time relative humidity increment setback feature suppresses nuisance tripping as humidity gradually increases with falling temperature
- Acoustically lined - low noise levels only 18.1 dB(A) @ 3m

Sentinel Multivent H	445655

### SAP Appendix Q

In order to make the right choice, developers and contractors should refer to Building Regulations ADL1a, SAP 2009 and Appendix Q.

SAP Appendix Q was launched in June 2006 to reward innovative ventilation manufacturers by testing and listing energy efficient products that assist in helping developers meet their Target Emission Rates (TER).

SAP is the underpinning methodology behind the Energy Performance Certificates and is used to demonstrate compliance with Building Regulations for Dwellings - Approved Document L (England and Wales), Section 6 (Scotland) and Approved Document F (Northern Ireland). Appendix Q specifically relates to wholehouse ventilation systems and lists a number of Vent-Axia Mechanical Ventilation solutions which offer an improved SAP rating over and above the default for these product types.

### SAP Appendix Q Test Results

Exhaust Terminal	Fan speed setting	Total flow rate	SFP (W/l/s)
K + 1	32%	21	0.16
K + 2	39%	29	0.16
K + 3	49%	37	0.17
K + 4	59%	45	0.21
K + 5	68%	53	0.24
K + 6	77%	61	0.29

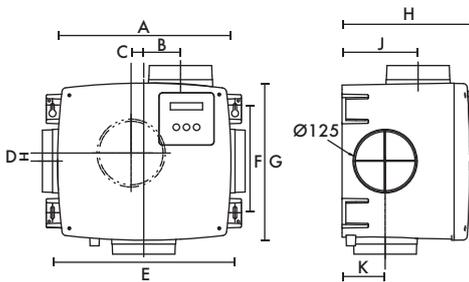

To assist developers and contractors Vent-Axia can provide detailed scheme designs together with installation guidance and training.

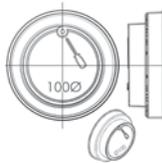

### Your Carbon Footprint

The Carbon Footprint is a measure of the amount of carbon dioxide (CO<sub>2</sub>) emitted through the burning of fossil fuels. From a residential and commercial building perspective, it is the amount of carbon generated when you consume a kilowatt of electricity. Reducing a building's carbon footprint will ultimately reduce electricity bills and save money for every individual household or business. It will also help meet the UK target for the reduction of emissions, as well as allowing you to help the environment.

## Controllers and Sensors

Sentinel Multivent can be used with a wide range of Vent-Axia controllers and sensors. Ranging from integral humidistats, through to wireless controllers to wired remote sensors.

### Integral Humidistat

- Simple Plug-n-Play installation
- Eliminates the need for additional controllers or sensors
- Reacts to any rapid increases in relative humidity or relative humidity above 60%
- Future proof - can be fitted after installation
- Self programming

**Stock Ref**  
**437598**

### Wireless Transmitter Controller Receiver Kit

- Manual boost
- Adjustable overrun timer
- Easy wireless installation
- Reduces installation time
- Future proof - add more controllers at any time

**Stock Ref**  
**439352**

### Wireless Transmitter Controller

- Additional controller for 439352
- A maximum of 4 controllers can be used per system
- Can be connected to other accessories (eg Humidistat) to send a boost signal wirelessly

**Stock Ref**  
**437827**

### Ambient Response Humidity Sensor

- Pullcord override and indication light
- Changeover relay switch
- Operating range: 30% - 90%RH
- Ambient operating temp. 5°C to 40°C
- 220-240V AC
- Will fit single gang box for surface mounting

**Stock Ref**  
**563550**

### Ecotronic Humidity Sensor

- Set point adjustable
- Maximum switching load 1 Amp inductive
- Pullcord override indicator
- Ambient operating temp. 0°C to 40°C
- Supply voltage 220-240V

**Stock Ref**  
**563532**

### Air Quality Sensor

- Ambient operating temp. 0°C to 50°C
- DEMKO approved
- Surface mounted
- 1 - 25 min O/R timer
- Supply voltage 220-240V

**Stock Ref**  
**563506**

### Visonex PIR Sensor

- Fits any UK single gang mounting box
- Adjustable timer overrun (5-25 mins)
- Range of detection up to 10 metres
- Designed to meet IP43
- Ambient operating temp. range 0°C to 50°C

**Stock Ref**  
**459623**

### CO<sub>2</sub> + Temp Room Sensor

- 240V DC
- 0 - 2000ppm CO<sub>2</sub> working range
- 0 - 50°C working range
- Auto-calibrating NDIR CO<sub>2</sub> absorption sensor
- Thin film platinum temperature sensor for high accuracy

**Stock Ref**  
**433257**

### Ventwise

- Automatically boosts fan when temperature of the supply pipe to a shower or bath increases
- Automatically boosts fan when electric hob is switched on
- Can be used in conjunction with manual override input
- Adjustable overrun timer
- Two sensor options available

**Stock Ref**  
**435960**

# Lo-Carbon Multivent MVDC-MS/MSH MEV Unit

**Vent-Axia**  
dMEV, MEV & PIV Systems

## Features & Benefits

- Best in class Specific Fan Power
- Reduces your carbon footprint
- Recognised in SAP Appendix Q
- Fitted with four extract 125 or 100mm diameter spigots allowing quick connection to ducts
- Complies with Building ADF (System 3)
- Option of wall, ceiling and loft mounting
- Improved controllability
- Switched Live Boost connection
- Fully variable normal and boost speeds
- Ultra quiet - acoustically lined for low noise levels
- Integral humidistat (H version)

With growing concerns about accurate ventilation of properties, the Lo-Carbon Multivent MVDC range offers the option of 'Close Control' both in the residential and the commercial sectors. With a DC motor the multi speed Lo-Carbon Multivent is one of the most efficient central extract units in the UK.

The units have two fully variable speeds for trickle and boost, with a switched live (LS) activation for the boost speed. An additional third speed (purge) is available using a second switched live connection.

An acoustic lining is included as standard, ensuring minimum noise levels.

The potentiometer controlled speed selector allows accurate setting of airflow, ensuring exactly the right ventilation rate. This feature also reduces noise, and energy consumption.

# Lo-Carbon

# PoziDry

## Positive Pressure Unit

### Features & Benefits

- Selectable air capacities to suit floor area up to 150m<sup>2</sup>
- Uses latest Lo-Carbon technology motor for low running costs
- Ultra low sound level
- Lo-Carbon PoziDry comes complete with ceiling diffuser, flexible duct and worm drive clips
- Standard 5 year guarantee
- Up to 5 year maintenance free G4 filter
- IPX2
- SFP of 0.22W/l/s

### Positive Pressure Ventilation

For controlling condensation particularly in the refurbishment sector, the Vent-Axia Lo-Carbon PoziDry offers a quick and simple solution. A loft mounted positive input fan draws fresh air from atmosphere, filters it and pushes it into the dwelling via a ceiling mounted diffuser. Stale air in the property is forced out through the natural forms of ventilation, such as window mounted trickle vents.

#### Without heater

##### Stock Ref

444075

#### With integral heater

##### Stock Ref

444766

### Installation

It is simply installed out of sight in the loft space. It can be suspended from a roof beam or be floor mounted, with a purpose-designed diffuser normally located over the stairwell of a conventional two storey dwelling or in the main hall of a bungalow. The Lo-Carbon PoziDry is set to the appropriate speed at installation based on the size of the dwelling, providing positive pressure input ventilation. Background ventilation openings provide the exhaust points.

### Performance

The robust construction of the Lo-Carbon PoziDry features a specially developed Lo-Carbon DC fan/motor arrangement which runs quietly and delivers incredibly low running costs. The Lo-Carbon PoziDry uses a sensor to monitor the temperature in the loft, automatically adjusting the air volume when necessary. 'Trickle' speed is automatically selected when the ambient loft temperature is up to 18°C. 'Normal' is automatically selected when the ambient loft temperature is between 18 and 27°C.

If the ambient loft temperature exceeds 27°C, the Lo-Carbon PoziDry will automatically switch to standby (no airflow). The standby power consumption is 2W.

In the case of the integral 500W heater version, the heater element is automatically activated when necessary and tempers the supply air to 10°C. Can be used for air replacement in conjunction with an extract fan.

### Filter

The unit includes a filter with up to 5 years maintenance intervals to reduce the number of call outs needed throughout its life span.

### Time Elapsed Meter

The unit includes a time elapsed meter to enable precise running information.

### Speed Control

With selection of 2 of 6 speeds available up to 50l/s, the unit is suitable for houses up to 360m<sup>3</sup>.

### Heater

An optional comfort heater is available for operation when the incoming air temperature becomes low.

### Typical Specification

The unit should be mounted in the loft space with a diffuser in self-extinguishing ABS positioned at the top of the stairwell. The unit meets the EMC and low voltage directives.

### Motor

The electronically controlled DC motor is manufactured with long life ball bearings and is fitted with Standard Thermal Overload Protection (S.T.O.P.). Suitable for ambient operating temperatures of -25°C to +40°C. For complete peace of mind, the Vent-Axia Lo-Carbon PoziDry is backed by a 5 year guarantee.

### Twin Spigot Kit

An additional kit to allow an extra circular diffuser to be installed near the PoziDry unit.

# PoziDry Compact

## Positive Pressure Unit

### Features & Benefits

- Ultra low sound level
- Selectable air capacities to suit volumes of up to 34 l/s or floor area up to 100m<sup>2</sup>
- Extremely low running costs - from less than one pence per day
- Washable, high capacity filter
- Round to rectangular duct adaptor included
- 5 Year Guarantee
- Ideal for flats

### Positive Pressure Ventilation

For those properties that do not have a loft, Lo-Carbon PoziDry Compact provides an easy to install solution. A duct mounted unit that can be fitted in a number of locations around a single floor flat or apartment.

Air is drawn into the Lo-Carbon PoziDry Compact unit via an external inlet and through a short length of duct. The specially developed fan/motor assembly (using the Lo-Carbon DC motor technology) draws the air through an integral, high capacity, washable filter. The backward curved impeller guarantees increased efficiency, lower sound levels and better performance.

The fresh, filtered airflow passes along the ducting and terminates on an internal wall with a discreet grille. This directs the airflow upwards where the incoming air mixes with the warm air that gathers at ceiling height.

The system automatically provides fresh, tempered airflow into the home. Creating an environment where the damaging effects of condensation find it hard to exist benefits both the occupants and the structure of the home.

Can be used for air replacement in conjunction with an extract fan. G4 filter as standard.

	HR300	76

**Vent-Axia**

Single Room dMVHR

# Lo-Carbon Tempra/SELV

## Single Room Heat Recovery Unit

### Features & Benefits

- Fits in 100mm diameter hole – ideal for refurbishments
- Up to 84% heat recovery
- Available in 2 wall depths: 320mm and 460mm
- Reduces the home's carbon footprint
- Choice of control options
- Summer setting
- Helps prevent noise ingress
- Continuous running or intermittent extract
- Meets current Building Regulations Approved Documents F and L
- Low SFP of 0.3W/l/s
- IPX4 rated

### Through-The-Wall Mounted Heat Recovery Unit

The Vent-Axia Lo-Carbon Tempra is designed to fit in 100mm diameter hole and is suitable for refurbishment, kitchen, bathroom, toilet or utility applications. The unit meets the performance requirements for continuous extract fans under the current Building Regulations Approved Document F.

The Tempra is available in three models, a P version with pullcord control, a T version with overrun timer and an HTP version with built-in pullcord, overrun timer and humidistat. Two spigot lengths are available; 320mm and 460mm.

The manual summer setting allows the unit to be set to extract only, helping to prevent a dwelling becoming too warm in hot summer conditions.

### Performance

Tempra can be set to run continuously at 6 l/s or 9 l/s, boosting up to 15 l/s, recovering heat from extracted air and returning it to the dwelling. The unique, compact heat exchanger has a temperature efficiency up to 84%, saving energy and reducing your carbon footprint. For intermittent extract the Tempra is set to 15 l/s.

The Tempra is also designed so that the replacement air being introduced is at a reduced rate ensuring that the room being ventilated is still under a slight negative pressure. This ensures that

fresh air is brought into the room from the rest of the house preventing humid air migrating to the rest of the house.

The Lo-Carbon ECDC motor with twin impellers consumes as little as 3.2 Watts on trickle rate and runs almost silently at only 20dB(A).

### Typical Installation

The unique heat exchanger design allows the Tempra to be fitted in a 100mm diameter hole, allowing it to replace standard 100mm extract fans while giving all the benefits of heat recovery. Maximum wall thickness is 460mm.

A longer version of the Tempra is available, designed for installations where the wall thickness is between 321mm and 460mm. 460mm models are identified by an 'L'.

### Heat Exchange (what is heat recovery?)

# Lo-Carbon HR25

## Single Room Heat Recovery Unit

### Features & Benefits

- Reduces the home's carbon footprint
- Designed for installations in bathrooms, toilets and utility areas
- 84% temperature based heat recovery
- Up to 90% energy saving
- Controls condensation and eliminates mould
- Choice of control options
- Long life DC motors
- IP24 rated

### Long Life Ventilation

The Vent-Axia Lo-Carbon HR25 range of through-the-wall heat recovery units are suitable for fitting through a 152mm (6") circular hole and are designed for use in bathrooms. Available in 2 lengths, a standard version suitable for wall thicknesses of up to 310mm and an extended version suitable for wall thicknesses of up to 425mm. The Vent-Axia Lo-Carbon HR25 is available in 2 models, a standard version with pullcord control and a H version with an integral humidity sensor.

### Performance

The units are fitted with a 24V DC motor and are supplied with a state of the art Switch Mode Power Supply (S.M.P.S.). This has the ability to operate at only 2 Watts power consumption on normal setting. A 5m cable is provided for fixed wiring of the unit to the S.M.P.S.

### Maintenance

Apart from removing odours, providing fresh air and recovering heat, this appliance extracts airborne impurities such as dust, dirt and grease. Filters should be replaced every six months or as conditions necessitate.

### Models

#### Lo-Carbon HR25

The HR25 is fitted with a pullcord switch which operates the twin speed control function.

# HR200WK

## Single Room Heat Recovery Unit

### Features & Benefits

- Single room domestic heat recovery ventilation unit
- 3 speed motor
- Integral washable filter
- Up to 75% heat recovery
- Saves energy - controls condensation
- Low noise

### Heat Recovery Ventilation

The Vent-Axia HR200WK is a heat recovery ventilation unit specifically designed for use in domestic kitchens and utility rooms to meet the Building Regulations. The unit is also suitable for light commercial requirements up to 220m<sup>3</sup>/h (50l/s). The compact, self contained unit is designed for through-the-wall mounting.

The three speed, external rotor motor has two matched impellers to ensure a controlled air flow through the unit, with exceptionally economical 25 Watt low speed power consumption.

### Easy Installation

The HR200WK fits through walls up to 335mm thick requiring a fixing hole 250mm square. The internal grille has washable, polymeric foam supply and extract filters. Only the neat internal twin grille visible from the room. A wall extension sleeve is available for walls up to 550mm thick.

### Heat Exchanger

The highly efficient, polymeric heat exchanger cube is washable. The compact cube interleaves outgoing moist warm air with incoming fresh air and allows the heat from one to warm the other without the two air streams mixing. Up to 75% of the heat, which would otherwise be lost, is transferred to the intake air, ensuring energy saving ventilation.

### Electrical

HR200WK 220-240V/1/50Hz Class 1 earthed appliance. The 3 speed motor, can be wired to operate On/Off for any one of the three speeds. Alternatively, an Ambient Response Humidity Sensor or simple changeover switch can be used to provide switching between any two speeds, giving permanent trickle ventilation and automatic changeover to a higher speed during periods of high moisture generation. Also the 3 speed controller enables the unit to be switched from permanent trickle to either medium or boost speed.

### Extension Wall Sleeve

# HR300

## Single Room Heat Recovery Unit

### Features & Benefits

- Designed for continuous operation, providing up to 70% heat recovery
- Controls condensation and eliminates mould
- Speed controllable
- Quiet operation
- Washable filters

### Heat Recovery Ventilation

The HR300 provides ventilation with heat recovery. It is ideal for light commercial applications including function rooms, offices, classrooms etc. The HR300 unit comes complete with an integral shutter.

### Performance

The HR300 unit is designed for continuous operation providing up to 70% heat recovery. Effectively lowering internal relative humidity the HR300 unit controls condensation and eliminates mould.

Fresh, pre-warmed air from outside is continually provided to the room with simultaneous extraction of stale moist air and smells. Heat is transferred via a unique plastic heat exchanger from outgoing air to the fresh air supply with no cross contamination, maintaining internal temperatures and providing a fresh environment.

The unit is fully controllable for speed using a small dedicated speed controller. Automatic ON/OFF control or switching to boost is easily achieved using sensors/timers e.g. humidistat. For summer operation the heat exchanger can be removed and replaced with a plastic divider board to provide positive cooling to rooms.

### Installation

The HR300 unit requires a 380mm x 280mm hole. Units should be level and square in the wall. The unit should be fitted so that it overhangs by minimum of 50mm on the inside, and a minimum of 70mm on the outside. An extension sleeve is available for walls up to 650mm thick.

### Maintenance

Filters should be cleaned by washing every six months or as conditions necessitate. Replacement filters can be purchased in packs of two

# MVHR units for residential & commercial

A complete range of Mechanical Ventilation with Heat Recovery (MVHR) units for residential and commercial applications, including many that are recognised in SAP Appendix Q.

## Sentinel Kinetic®

The first of our new generation of MVHR systems incorporating a range of features. Small enough to fit into a kitchen cupboard with integrated digital controls for easy installation it is designed with developers, specifiers and installers in mind. With 90% efficiency and low specific fan powers designers will also see a reduction in their dwelling emission rate.

# Lo-Carbon Sentinel Kinetic® Range Overview

## Mechanical Ventilation with Heat Recovery

### Features & Benefits

- Manufactured in the UK
- Building Regulations ADF and ADL compliant
- Recognised in SAP Appendix Q. Specific Fan Power down to 0.4 W/l/s
- Up to 94% heat recovery whilst controlling condensation
- Programmable Summer bypass
- Horizontal and/or vertical duct outlets
- Integrated digital controller for simple and accurate commissioning
- Lightweight for easy installation
- External condensate connection
- Plug and play controls; Humidistat, Ventwise, Wireless remote
- BMS connectivity
- LS inputs/(Light Switch)
- Volt-free inputs
- Self diagnosis for simplified fault finding
- Adjustable delay On/delay Off timer

### The Sentinel Kinetic Range incorporates:

- A wholehouse heat recovery system with up to 94% energy efficiency
- An easily accessible heat recovery cube protected by two removable G3 filters
- Two Lo-Carbon energy saving EC/DC fans which ensure long life (typically over double the life of AC motors) and lowest possible energy use
- Fully insulated construction with built in condensation drain
- Specifically designed for new build constructions with a high level of insulation

The Lo-Carbon Sentinel Kinetic meets the latest requirements of the Building Regulations ADF and ADL for wholehouse system ventilation: System 4. Continuous mechanical supply and extract with heat recovery. The Lo-Carbon Sentinel Kinetic models have three fully adjustable speeds and a purge setting (maximum flow). Provided with the unit is a digital controller that can be used to preset the speeds to any required airflow within the performance range.

### Integral Humidity sensor

The integral humidity (models with H suffix) sensor increases speed in proportion to relative humidity levels, saving energy and reducing noise. The sensor also reacts to small but rapid increases in humidity, even if the normal trigger threshold is not reached. This unique feature ensures adequate ventilation, even for the smallest wet room. The night time relative humidity setback feature suppresses nuisance tripping as humidity gradually increases with falling temperature.

### Optional F5 supply filters

#### Kinetic B, BH & Cooker Hoods Filter

For sensors see Accessories & Controllers section.

## Sentinel Control

The Sentinel controller is the most advanced system available, providing Demand Control Ventilation (DCV), minimising energy consumption and noise levels, and optimising ventilation performance. Sentinel controlled units may be set to operate fully automatically or with varying levels of manual intervention.

## BMS (Building Management System) Options

There are two levels of BMS available: Basic Output and full Electronic BMS.

Basic Output provides a 5 volt output from the LED terminals on the controller. This output occurs whenever a message appears on the digital display, for example; 'Check Filters' or a fault code. The output can also be converted to volt-free with the addition of an optional Opto-Coupler.

Electronic BMS: A full range of two-way digital signals are available through the RJ11 connector on the control board. The BMS system provider will translate this signal to extract the desired data. Contact Vent-Axia to discuss your specific requirements.

## LED Alarm

MVHR units are often installed in lofts or other locations where they are difficult to monitor. The optional remote LED alarm illuminates when any message is visible on the MVHR unit display panel. The LED alarm can be installed in any convenient location within the dwelling allowing end users to see that the unit requires attention.

## Control Inputs

Five volt-free pairs of switch terminals for sensor inputs allow boosting from a full range of Vent-Axia controllers - humidistats, PIR, timers.

Two terminals with 0-24V outputs allow 0V to 10V proportional control by sophisticated controllers such as CO<sub>2</sub> sensors and proportional humidistats.

The optional Ventwise controller senses a temperature rise in a bath/shower hot water supply and/or current in a cooker/hob electrical circuit to activate boost, ensuring additional ventilation when needed.

Switched-live for boosting via light switches (220-240 V AC) or manual Normal/Boost switches. This connection has the advantage of Delay-On and Delay-Off facility. Delay-On enables you to prevent the Boost airflow between 0 and 10 minutes, after a light switch has been activated. Delay-Off allows the Boost airflow to continue after a light switch is turned off to ensure rapid clearance of humidity. This timer is adjustable between 0 and 25 minutes.

The units can be boosted incrementally via the on board controller or the Wired Remote Controller: One press = 30 minutes, two presses = 60 minutes, three presses = continuous.

## Optional Controls

### LED Alarm with 15 metre cable

### Additional wireless boost switch (max 3 switches)

Stock Ref  
**437827**

### Ventwise Controller (also requires sensors, see Accessories & Controllers section)

Stock Ref  
**441780**

## Purge setting

The unit can be set to maximum flow (100%) by pressing and holding the Boost button on the unit itself or optional wired controller for five seconds. Purge will continue for two hours unless cancelled by pressing the Boost button again.

## Summer Bypass

An internal damper is activated when the outside temperature is less than the room temperature. The damper opens allowing cooler fresh air to bypass the Heat Recovery Cell and reduce the internal temperature towards the preset 'Comfort Temperature'. When the inside air temperature reaches the preset 'Comfort Temperature' the bypass damper closes.

## Frost Protection

In order to prevent frost forming inside the unit in winter conditions, the Kinetic range employs a sophisticated frost protection strategy that modifies the airflows ensuring heat recovery continues down to -20°C. Below this temperature, the units will operate as 'extract only' fans. If balanced ventilation is required at low temperatures, a duct pre-heater should be used.

## System Cooker Hood Range

System canopy hoods are a motorless hood with extract being provided by the MVHR unit. When the Boost button on the canopy is activated, the MVHR unit goes to boost setting and the summer bypass opens preventing cooking by-products entering the heat exchanger cell.

## Wired Remote Controller

Standard with horizontal units, optional extra with vertical units. Supplied with 15 metres of cable (max length), the Wired Remote Controller duplicates all the features of the on-board control panel, allowing commissioning, diagnosis and user control. Flush mounting, suitable for a single gang pattress box 16mm deep.

### Wired Remote Controller

- Standard with horizontal units, optional extra with vertical units
- Supplied with 15 metres of cable (max length), the Wired Remote Controller duplicates all the features of the on-board control panel, allowing commissioning, diagnosis and user control
- Flush mounting, suitable for a single gang pattress box 16mm deep

**Stock Ref**  
**443283**

### Ambient Response Humidity Sensor

- Pullcord override and neon indicator
- Changeover relay switch
- Operating range: 30% - 90%RH
- Ambient operating temp. 5°C to 40°C
- 220-240V AC
- Will fit single gang box for surface mounting

**Stock Ref**  
**563550**

### Visonex PIR Sensor

- Fits any UK single gang mounting box
- Adjustable timer overrun (5-25 mins)
- Range of detection up to 10 metres
- Designed to meet IP43
- Ambient operating temp. range 0°C to 50°C

**Stock Ref**  
**459623**

### Momentary Push Switch

- Compatible with Sentinel Kinetic range, the momentary switch boosts the unit for 30 minutes
- 85 x 85 x 10mm (H x W x D)

**Stock Ref**  
**448929**

### Ecotronic Humidity Sensor

- Set Point adjustable
- Maximum switching load 1 amp inductive
- Pullcord override indicator
- Ambient operating temp. 0°C to 40°C
- Supply voltage 220-240V

**Stock Ref**  
**563532**

### CO<sub>2</sub> + Temp Room Sensor

- 240V DC
- 0 - 2000ppm CO<sub>2</sub> working range
- 0 - 50°C working range
- Auto-calibrating NDIR CO<sub>2</sub>
- Thin film platinum temperature sensor for high accuracy

**Stock Ref**  
**433257**

### Normal Boost Switch with Light Indicator

- Single gang switch with LED illumination when in the Boost condition
- 85 x 85 x 10mm (H x W x D)

**Stock Ref**  
**449060**

### Wireless Transmitter Controller Receiver Kit

- Manual boost
- Adjustable overrun timer
- Easy wireless installation
- Reduces installation time
- Future proof - add more controllers at any time

**Stock Ref**  
**439352**

### Air Quality Sensor

- Ambient operating temp. 0°C to 50°C
- Min - Max mode or direct damper control
- Surface mounted
- 1 - 25 min O/R timer
- Supply voltage 220-240V

**Stock Ref**  
**563506**

### Ventwise

- Automatically boosts fan when temperature of the supply pipe to a shower or bath increases
- Automatically boosts fan when electric hob is switched on
- Can be used in conjunction with manual override input
- Adjustable overrun timer
- 3 sensor inputs

**Stock Ref**  
**441780**

### Wireless Transmitter Controller

- Additional controller for 439352
- A maximum of 4 controllers can be used per system
- Can be connected to other accessories (eg Humidistat) to send a boost signal wirelessly

**Stock Ref**  
**437827**

### Normal Boost Switch

- A single gang switch to boost from low to high speeds on heat recovery systems
- 85 x 85 x 10mm (H x W x D)

**Stock Ref**  
**455213**

### Normal Boost Switch - Stainless Steel

- A single gang switch to operate normal/boost functions on MVHR systems
- Brushed stainless steel finish
- 90 x 90 x 18 (H x W x D)

**Stock Ref**  
**437320**

### Isolator Relay Controller

- Allows fan unit to be isolated from other mains circuit when used with TIM2 trickle/boost switch or light switch control

**Stock Ref**  
**442030**

# Lo-Carbon Sentinel Kinetic®

## MVHR Unit

### Features & Benefits

- Recognised in SAP Appendix Q
- Ultra quiet
- Lightweight for easier installation
- Horizontal duct option for space-saving installations
- Fits within a 290mm deep kitchen cupboard
- Integrated digital controller for simple and accurate commissioning
- Plug and play controls; Humidistat, Ventwise, Wireless remote
- BMS connectivity
- LS inputs/(Light Switch)
- Volt-free inputs
- Self diagnosis for simplified fault finding
- Adjustable delay On/delay Off timer

### Easy Installation

The Sentinel Kinetic models can be mounted vertically in a roof space, hallway cupboard or kitchen or within a kitchen cupboard. When mounted in an unheated area ducting should be insulated. Ducting can be attached to the unit horizontally, vertically or both. Minimum internal depth of kitchen cupboard: V, B & BH models 290mm.

### V&B/BH Models

**Left (L) or right (R) hand installation.** The unit is supplied with duct spigots to outside on the right hand side. These can be reversed on site by simply removing the control panel, rotating the unit 180 degrees and re-attaching the control panel.

**Horizontal and vertical spigots:** The combination of spigot options allows installation in confined locations. If vertical and horizontal connection is required on the same outlet/inlet, additional spigots can be supplied.

The condensate drain can be taken out through the back, side or bottom of the unit. Using the fittings supplied, the final condensate connection is made outside the unit and can be completed after installation.

### Integral Humidity Sensor

The integral humidity sensor increases speed in proportion to relative humidity levels, saving energy and reducing noise. The sensor also reacts to small but rapid increases in humidity, even if the normal trigger threshold is not reached. This unique feature ensures adequate ventilation, even for the smallest wet room. The night time relative humidity setback feature suppresses nuisance tripping as humidity gradually increases with falling temperature.

# Lo-Carbon Sentinel® Kinetic

## Consultants Specification

### Operation

The supply and extract ventilation unit shall be a Sentinel Kinetic as manufactured by Vent-Axia and shall be sized as indicated on the drawings and shall be in accordance with the particular specification.

Supply air to the room shall be pre-heated by the extract air via the integrated composite plastic counterflow heat recovery cell. The Sentinel Kinetic shall automatically vary the ventilation rate via EC/DC motors, as it receives signals from one of the optional interconnected sensors. When a signal is received, the fans shall either vary their speed proportionally or on a trickle and boost principle.

The unit shall have the facility to commission the supply and extract fans individually via in-built minimum and maximum speed adjustment, or alternative wired remote control unit. The fans themselves shall have independent, infinitely variable speed control.

### Unit specification

The unit shall be manufactured with an ABS Outer case construction, and incorporate a reversible core to allow for left or right hand mounting.

The unit shall have a high efficiency composite plastic counterflow heat exchanger, supply and extract filters, automatic summer bypass, (B/BH) integral minimum and maximum infinitely variable speed controls with fascia mounted failure indication. The unit shall have low energy, high efficiency EC/DC fan/motor assemblies with sealed for life bearings. The impellers shall be high efficiency forward curved centrifugal type.

The unit shall have a heat exchanger cell with a thermal efficiency of up to 92% when tested to EN 308. This shall be protected by G3 grade synthetic filters on supply and extract. Complete with a condensate drip tray and drain connection.

The unit shall be constructed with a removable Core allowing full maintenance access. The removable Core shall provide access to the following:

- ✓ Supply and extract filter
- ✓ Heat exchanger
- ✓ Access to the electrical connections

Access shall be provided for wiring termination and setup/ commissioning. The backlit LCD user interface therein shall be removable for remote mounting if required.

Units shall be as manufactured by Vent-Axia Ltd.

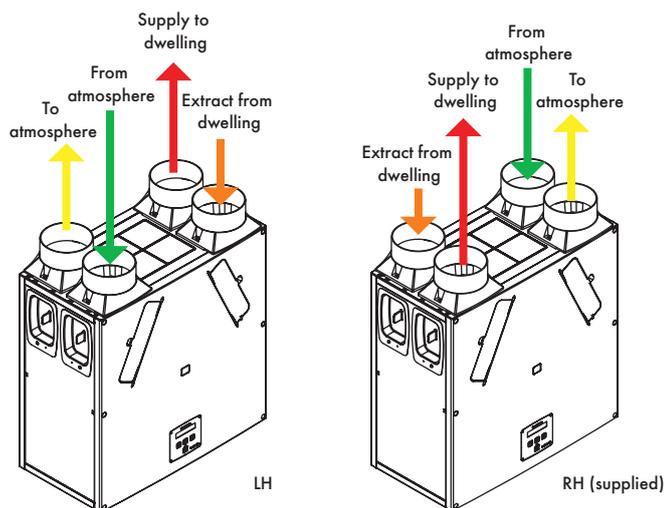

### Standard controls

All Sentinel Kinetic units shall incorporate the following functions integrally mounted, pre-wired and factory fitted by the manufacturer:

- ✓ Integral infinitely variable fan speed control on supply and extract
- ✓ Integral min/max ventilation control/set point
- ✓ Integral BMS interfaces - control and status indication
- ✓ Heating interlocks
- ✓ 0-10V proportional speed adjustment
- ✓ Volt free contacts
- ✓ 24V sensor supply
- ✓ Integral on/off or trickle boost function from remote switch e.g. PIR occupancy detector
- ✓ The unit shall be controlled by the 'Sentinel' control devices (enablers and sensors) as detailed in the schedule or on the drawings
- ✓ Fully automatic summer bypass
- ✓ Switched Live input with adjustable 'delay-on' feature
- ✓ Fan failure or component failure indicated via individual fault code display
- ✓ Running time counter
- ✓ Control panel PIN number lock
- ✓ Automatic frost protection effective to -20°C
- ✓ The unit shall incorporate ('H' models) an integral humidity sensor with the following features:

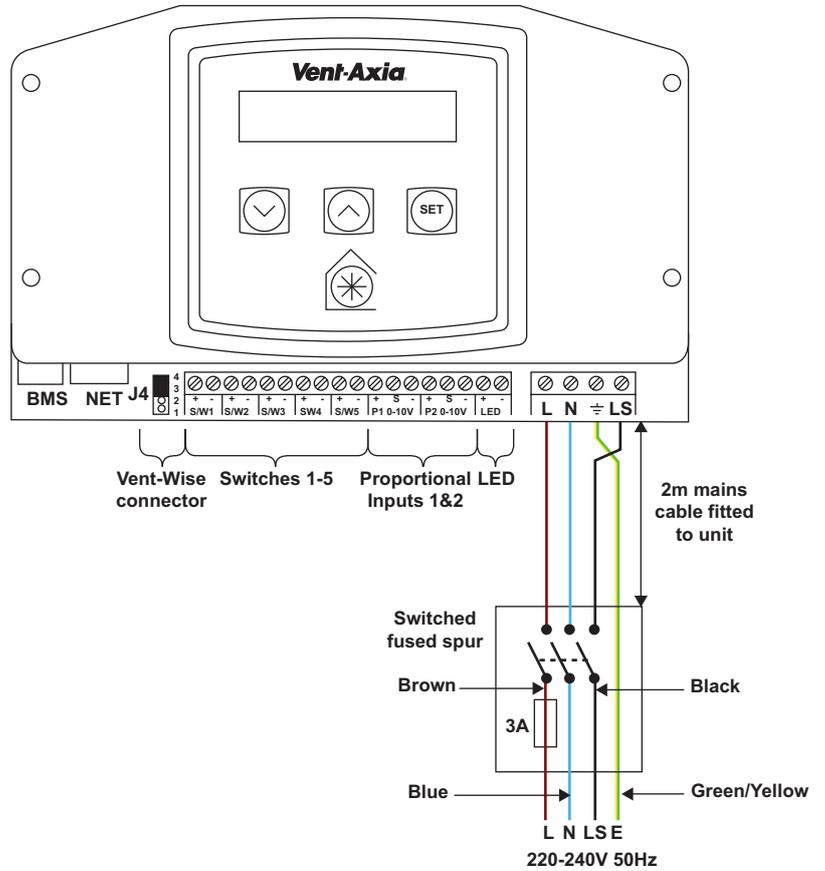

- Ambient Response; Raises the humidity trigger point as dwelling temperature reduces
  - Rapid Response; Monitors the rate of change in humidity and triggers increased airflow even if the humidity trigger threshold is not reached
  - Proportional Response; Incrementally increases the fan speed to reduce noise and reduce energy consumption
- ✓ Tool free filter access

## Airflow Direction & Condensate Connection (RH Supplied)

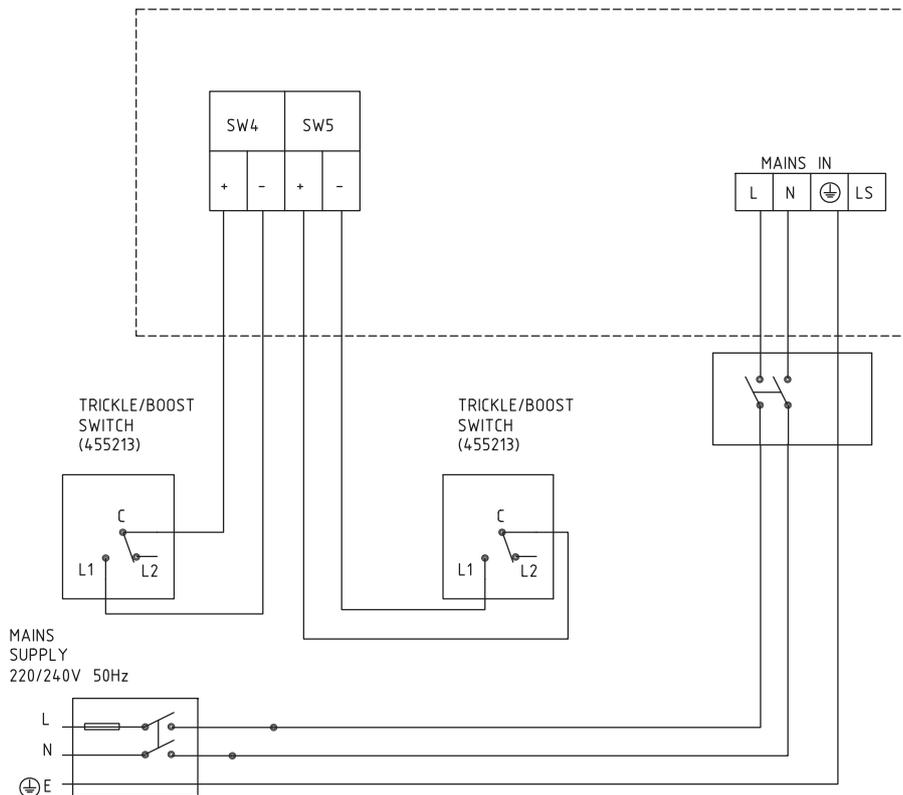

**Electrical Connection**

Please note: Electrical connection should be carried out by an appropriately qualified person and in accordance with current wiring regulations.

**Trickle to Boost by Trickle/Boost switch**

# Lo-Carbon Sentinel Kinetic® Plus MVHR Unit

## Features & Benefits

- Recognised in SAP Appendix Q
- Ultra quiet
- Horizontal duct option for space-saving installations
- High airflow and ideal for student accommodation clusters
- Unique folding filter for removal when access is restricted
- Integrated digital controller for simple and accurate commissioning
- Lightweight for easy installation
- Plug and play controls; Humidistat, Ventwise, Wireless remote
- BMS connectivity
- LS inputs/(Light Switch)
- Volt-free inputs
- Self diagnosis for simplified fault finding
- Adjustable delay On/delay Off timer
- Summer bypass and frost protection

## Increased Performance

The Kinetic Plus benefits from the latest high efficiency, backward curved impeller design, ensuring the lowest possible energy consumption, ultra quiet operation and an exceptional performance range covering small one bed apartments to the largest of houses.

## Care Homes & Student Accommodation

The Kinetic Plus is ideal for larger homes and multiple occupancy units such as nursing homes and student accommodation. Capable of 400m<sup>3</sup>/hr at 150Pa, the unit can extract from up to ten bathrooms and a communal kitchen while still achieving almost 90% heat recovery. The fully automatic capability of the Kinetic range means that adequate ventilation is always achieved.

The Kinetic's BMS capability is also ideal for those commercial applications where landlords or property managers want to monitor and optimise building performance and maintenance. The Kinetic BMS can provide status information and its self diagnostics can report if any fault is found.

## Spigot Options

Spigots may be re-positioned to give horizontal connection or a combination of vertical and horizontal connection.

Optional 180mm/200mm spigots can simplify connection in commercial installations where larger diameter duct work has been used.

## Quick Change Filter

As many systems are placed within cupboards the unique filter design folds as you remove it to ensure easy access in restricted spaces.

## Integral Humidity Sensor

The integral humidity sensor increases speed in proportion to relative humidity levels, saving energy and reducing noise. The sensor also reacts to small but rapid increases in humidity, even if the normal trigger threshold is not reached. This unique feature ensures adequate ventilation, even for the smallest wet room. The night time relative humidity setback feature suppresses nuisance tripping as humidity gradually increases with falling temperature.

# Lo-Carbon Sentinel® Kinetic Plus

## Consultants Specification

### Operation

The supply and extract ventilation unit shall be as Sentinel Kinetic Plus as manufactured by Vent-Axia and shall be sized as indicated on the drawings and shall be in accordance with the particular specification.

Supply air to the room shall be pre-heated by the extract air via the integrated composite plastic counterflow heat recovery cell. The Sentinel Kinetic Plus shall automatically vary the ventilation rate via EC/DC motors, as it receives signals from one of the optional interconnected sensors.

When a signal is received, the fans shall either vary their speed proportionally or on a trickle and boost principle.

The unit shall have the facility to commission the supply and extract fans individually via in-built minimum and maximum speed adjustment, or alternative wired remote control unit. The fans themselves shall have independent, infinitely variable speed control.

### Unit specification

The unit shall be manufactured with an ABS outer case construction, and incorporate a reversible core to allow for left or right hand mounting.

The unit shall have a high efficiency composite plastic counterflow heat exchanger, supply and extract filters, automatic summer bypass, integral minimum and maximum infinitely variable speed controls with fascia mounted failure indication.

The unit shall have low energy, high efficiency EC/DC fan/motor assemblies with sealed for life bearings. The impellers shall be high efficiency backward curved centrifugal type.

The unit shall have a heat exchanger cell with a thermal efficiency of up to 92% when tested to EN 308. This shall be protected by G3 grade synthetic filters on supply and extract. Complete with a condensate drip tray and drain connection.

The unit shall be constructed with a removable Core allowing full maintenance access. The removable Core shall provide access to the following:

- ✓ Supply and extract filter
- ✓ Heat exchanger
- ✓ Access to the electrical connections

Access shall be provided for wiring termination and setup/ commissioning. The backlit LCD user interface therein may be duplicated for remote mounting if required. Units shall be as manufactured by Vent-Axia Ltd.

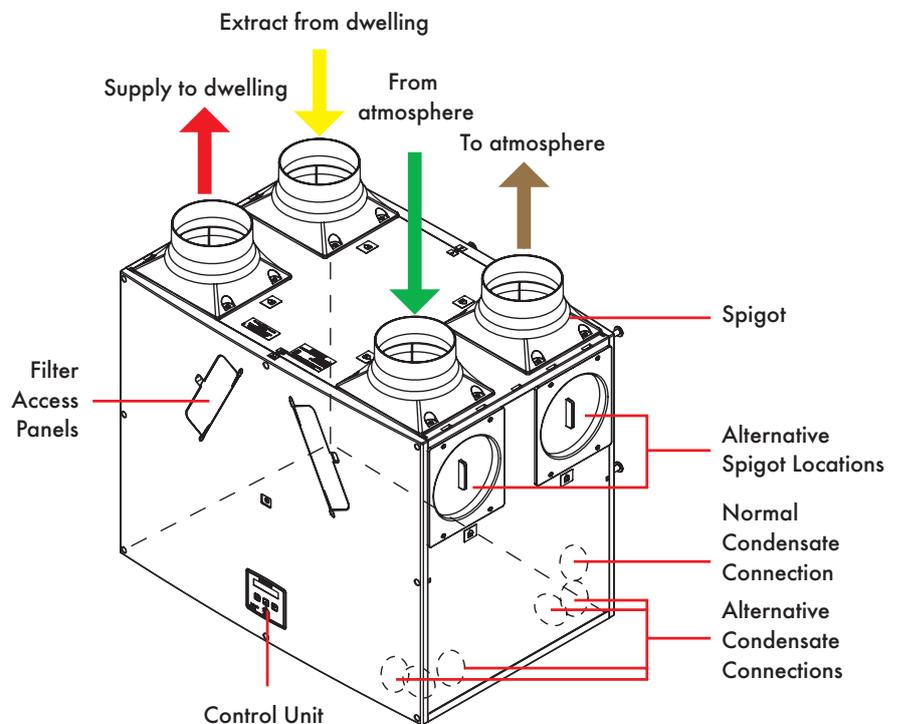

### Standard controls

All Sentinel Kinetic units shall incorporate the following functions integrally mounted, pre-wired and factory fitted by the manufacturer:

- ✓ Integral infinitely variable fan speed control on supply and extract
- ✓ Integral min/max ventilation control/set point
- ✓ Integral BMS input/output interfaces - control and status indication
- ✓ Heating interlocks
- ✓ 0-10V proportional speed adjustment
- ✓ Volt free contacts
- ✓ 24V sensor supply
- ✓ Integral on/off or trickle boost function from remote switch, e.g. PIR occupancy detector
- ✓ Fully automatic summer bypass
- ✓ Switched Live input with adjustable 'delay-on' feature
- ✓ Fan failure or component failure indicated via individual fault code display

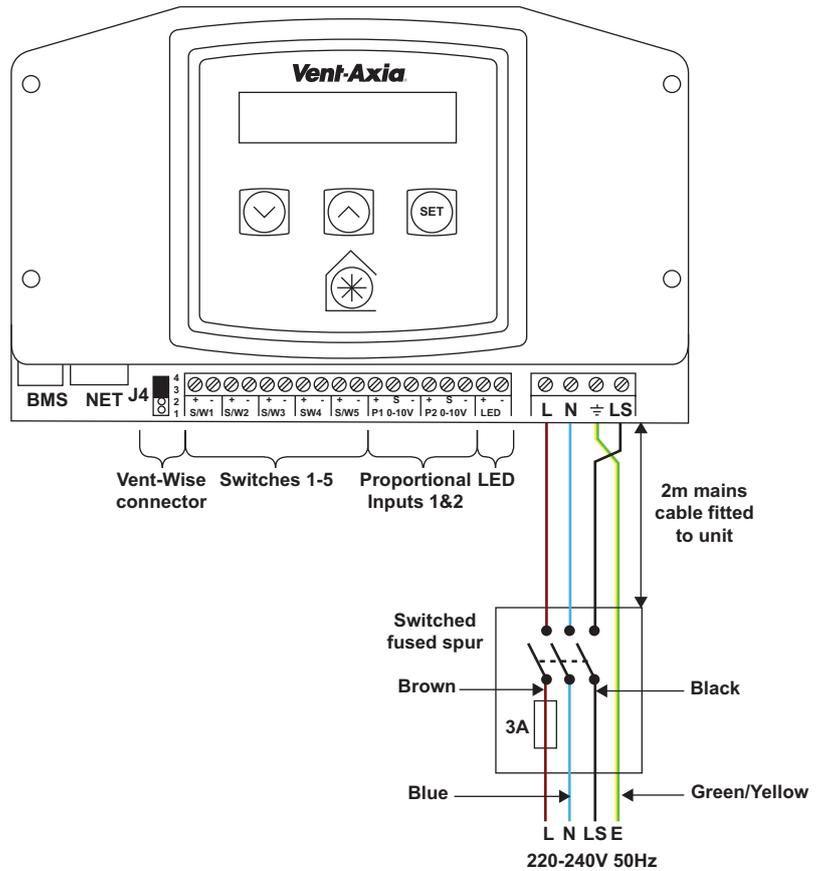

- ✓ Running time counter
- ✓ Control panel PIN number lock
- ✓ Automatic frost protection effective to -20°C
- ✓ The unit shall incorporate an integral humidity sensor with the following features:
  - Ambient Response; Raises the humidity trigger point as dwelling temperature reduces
  - Rapid Response; Monitors the rate of change in humidity and triggers increased airflow even if the humidity trigger threshold is not reached
  - Proportional Response; Incrementally increases the fan speed to reduce noise and reduce energy consumption
- ✓ The unit shall be controlled by the 'Sentinel' control devices (enablers and sensors) as detailed in the schedule or on the drawings.
- ✓ Tool free filter access

## Airflow Direction & Condensate Connection (RH Supplied)

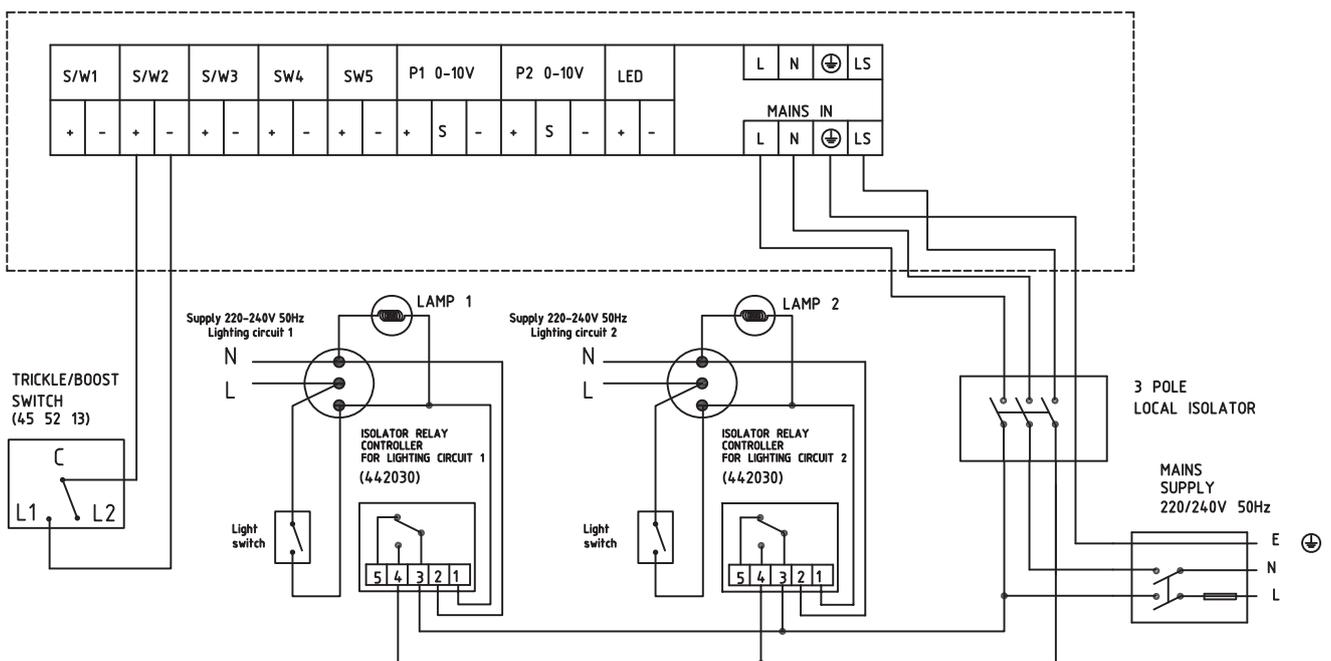

## Electrical Connection

Please note: Electrical connection should be carried out by an appropriately qualified person and in accordance with current wiring regulations.

## Trickle to Boost by two lighting circuits or Trickle/Boost switch

# Lo-Carbon

# Sentinel Kinetic® Cooker Hood

## MVHR Unit

### Features & Benefits

- Recognised in SAP Appendix Q
- Includes Cooker Hood Canopy
- Ultra quiet
- Horizontal duct option for space-saving installations
- Fits within a 600mm wide aperture (300mm deep)
- Integrated digital controller for simple and accurate commissioning
- Plug and play controls; Humidistat, Ventwise, Wireless remote
- BMS connectivity
- LS inputs/(Light Switch)
- Volt-free inputs
- Self diagnosis for simplified fault finding
- Adjustable delay On/delay Off timer
- Summer bypass and frost protection

### Easy Installation

Ducting can be attached to the unit horizontally, vertically or both. Minimum internal depth of kitchen cupboard: 300mm.

**Horizontal and vertical spigots:** The combination of spigot options allows installation in confined locations. If vertical and horizontal connection is required on the same outlet/inlet, additional spigots can be supplied.

The condensate connection can be taken through the rear of the unit or through the side of the unit into an adjacent cupboard prior to connection into pre-installed domestic waste water system.

### Cooker Hood Unit

The Sentinel Kinetic Cooker Hood is designed to fit in a 600mm aperture above a hob. The telescopic hood incorporates two flat removable metal grease filters, low energy light bulbs and is available with a White or Brushed Aluminium front trim.

The hood contains an integral fire damper in accordance with BRE Digest 398 and is connected to the heat recovery unit by a galvanised steel duct with access for cleaning. When the hood is opened,

the heat recovery unit goes to boost speed and the summer bypass automatically opens to prevent cooking by-products entering the heat recovery cell. As an additional safety feature, the duct also contains a thermal cut-out fuse which turns off the MVHR unit in the event of excessive temperature in the airway. Cooker Hood units cannot be handed on-site and must be purchased as left hand (L) or right hand (R) models.

# Lo-Carbon Sentinel® Kinetic Cooker Hood

## Consultants Specification

### Operation

The supply and extract ventilation unit shall be a Sentinel Kinetic as manufactured by Vent-Axia and shall be sized as indicated on the drawings and shall be in accordance with the particular specification.

Supply air to the room shall be pre-heated by the extract air via the integrated composite plastic counterflow heat recovery cell. The Sentinel Kinetic shall automatically vary the ventilation rate via EC/DC motors, as it receives signals from one of the optional interconnected sensors. When a signal is received, the fans shall either vary their speed proportionally or on a trickle and boost principle.

The unit shall have the facility to commission the supply and extract fans individually via in-built minimum and maximum speed adjustment, or alternative wired remote control unit. The fans themselves shall have independent, infinitely variable speed control.

### Unit specification

The unit shall be manufactured with an ABS Outer case construction, and incorporate a metal duct to the cooker hood, intumescent fire damper and thermal switch, in accordance with BRE Digest 398.

The unit shall have a high efficiency composite plastic counterflow heat exchanger, supply and extract filters, automatic summer bypass, integral minimum and maximum infinitely variable speed controls with fascia mounted failure indication. The unit shall have low energy, high efficiency EC/DC fan/motor assemblies with sealed for life bearings. The impellers shall be high efficiency forward curved centrifugal type.

The unit shall have a heat exchanger cell with a thermal efficiency of up to 92% when tested to EN 308. This shall be protected by G3 grade synthetic filters on supply and extract. Complete with a condensate drip tray and drain connection.

The unit shall be constructed with a removable Core allowing full maintenance access. The removable Core shall provide access to the following:

- ✓ Supply and extract filter
- ✓ Heat exchanger
- ✓ Access to the electrical connections

Access shall be provided for wiring termination and setup/ commissioning. The backlit LCD user interface therein shall be removable for remote mounting if required.

Units shall be as manufactured by Vent-Axia Ltd.

### Standard controls

All Sentinel Kinetic units shall incorporate the following functions integrally mounted, pre-wired and factory fitted by the manufacturer:

- ✓ Integral infinitely variable fan speed control on supply and extract
- ✓ Integral min/max ventilation control/set point
- ✓ Integral BMS interfaces - control and status indication
- ✓ Heating interlocks
- ✓ 0-10V proportional speed adjustment
- ✓ Volt free contacts
- ✓ 24V sensor supply
- ✓ Integral on/off or trickle boost function from remote switch e.g. PIR occupancy detector
- ✓ The unit shall be controlled by the 'Sentinel' control devices (enablers and sensors) as detailed in the schedule or on the drawings
- ✓ Fully automatic summer bypass
- ✓ Switched Live input with adjustable 'Delay-On' feature
- ✓ Fan failure or component failure indicated via individual fault code display
- ✓ Running time counter
- ✓ Control panel PIN number lock
- ✓ Automatic frost protection effective to -20°C
- ✓ The unit shall incorporate ('H' models) an integral humidity sensor with the following features:
  - Ambient Response; Raises the humidity trigger point as dwelling temperature reduces
  - Rapid Response; Monitors the rate of change in humidity and triggers increased airflow even if the humidity trigger threshold is not reached

- Proportional Response; Incrementally increases the fan speed to reduce noise and reduce energy consumption
- ✓ Tool free filter access

### Integral Cooker Hood Specification

The Sentinel Kinetic Cooker Hood shall consist of a telescopic Hood and galvanised steel duct connection to the MVHR Unit.

The Hood construction shall be of grey powder coated steel with Brushed Aluminium or White painted fascia.

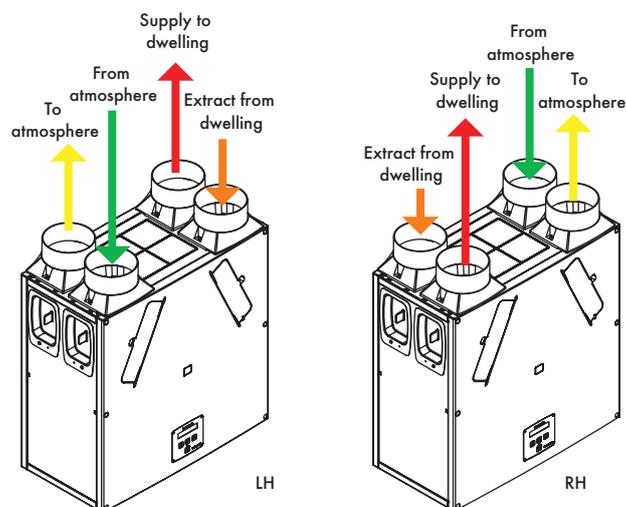

The Hood shall trigger the MVHR unit to a pre-defined boost speed and open the summer bypass when opened, and shall have two low-energy lamps illuminating the hob top.

Filter shall be a flat metal grease filter, removable for cleaning.

The galvanised steel ductwork shall provide a continuous fire barrier between the Hood and the MVHR unit. It shall contain an Intumescent fire damper, thermal cut-out and volume balancing damper. The thermal cut-out shall switch off the MVHR unit at a pre-defined safety temperature.

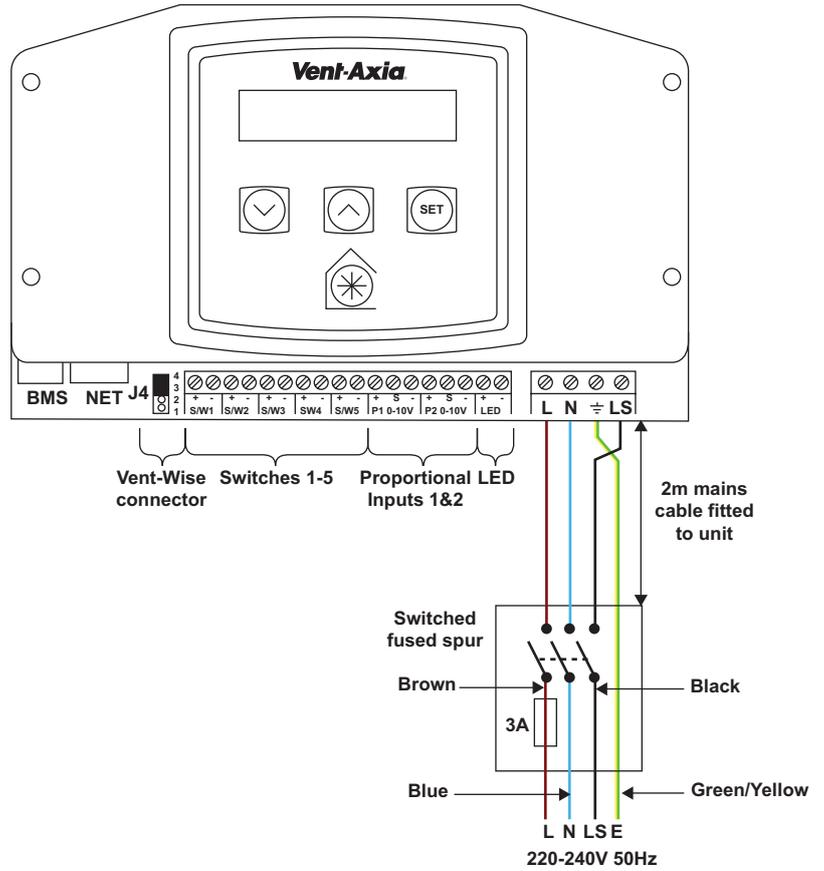

The duct shall have an access panel for cleaning by the end-user.

## Airflow Direction

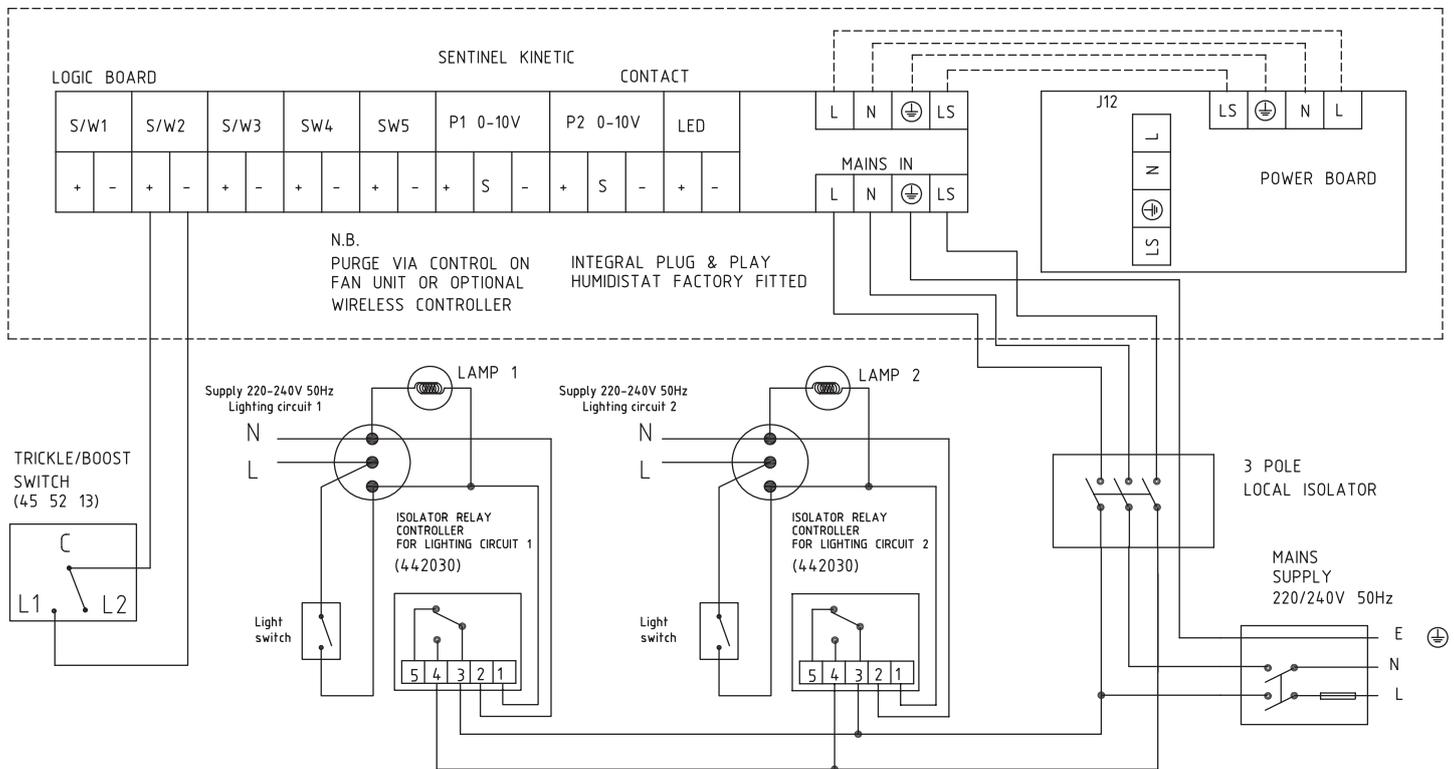

## Electrical Connection

Please note: Electrical connection should be carried out by an appropriately qualified person and in accordance with current wiring regulations.

## Trickle to Boost by a light circuit

# Lo-Carbon Kinetic® E MVHR Unit

## Features & Benefits

- Compact and quiet
- Lightweight for easy installation
- Easy access filters
- External condensate connection
- Compatible with a range of controls: PIR, Humidistat
- Horizontal spigot option
- Energy saving EC/DC motors
- Quiet operation
- Manufactured in the UK
- Switched live inputs (Light switch control)

A wholehouse heat recovery system with 91% energy efficiency. An easily accessible heat recovery cube protected by two removable EU3 filters. Two Lo-Carbon Energy Saving EC/DC fans ensure long life (typically over double the life of AC motors) and lowest possible energy use. Fully insulated construction with built in condensation drain.

Lo-Carbon Kinetic E meets the latest requirements of the Building Regulations Approved Document F and L for wholehouse system ventilation.

The Lo-Carbon Kinetic E model has two adjustable speeds, normal and boost. On the front of the unit is the controller that can be used to preset the speeds to any required performance, up to 38l/s (135m<sup>3</sup>/hr) 100Pa. Offering 'Close Control' to prevent over ventilating. Acoustically lined - low noise levels from only 20dB(A) @3m.

## Left or right hand installation

Units are supplied as RH version with duct spigots to outside on the right hand side. These can be reversed onsite by simply removing the control panel, rotating the unit 180 degrees and re-attaching the control panel.

## Horizontal and vertical spigots

The combination of spigot options allows installation in confined locations. If vertical and horizontal connection is required on the same outlet/inlet, additional spigots can be supplied.

## Filter Check

An LED on the control panel illuminates at six month intervals to remind users to check and clean the filters.

## Frost Protection

The Kinetic E range benefits from an automatic frost protection system which manages the airflows to prevent the heat recovery cell freezing in very cold weather, while at the same time maintaining ventilation down to -20°C.

## Control options

There are two LS (Switched Live) inputs allowing the unit to be connected to a number of sensors and controllers such as Ventwise, Timespan, Ambient Response Humidistat. One of the LS connections also benefits from a 'Delay On' feature which prevents the unit boosting unnecessarily.

- **Compatible with a range of controls: PIR, Humidistat**
- **Horizontal spigot option**
- **Up to 94% heat recovery**
- **Quiet operation**
- **Manufactured in the UK**
- **Switched live inputs (Light switch control)**

A wholehouse heat recovery system with 94% energy efficiency. An easily accessible heat recovery cube protected by two removable EU3 filters. Two Lo-Carbon Energy Saving EC/DC fans ensure long life (typically over double the life of AC motors) and lowest possible energy use. Fully insulated construction with built in condensation drain.

Lo-Carbon Kinetic Plus E meets the latest requirements of the Building Regulations Approved Document F for wholehouse system ventilation.

The Lo-Carbon Kinetic Plus E model has two adjustable speeds, normal and boost. On the front of the unit is the controller that can be used to preset the speeds to any required performance, up to 111l/s (400m<sup>3</sup>/hr) 150Pa. Offering 'Close Control' to prevent over ventilating. Acoustically lined - low noise levels from only 20dB(A) @ 3m.

### Left or right hand installation

Units are supplied as RH version with duct spigots to outside on the right hand side. These can be reversed onsite by simply removing the control panel, rotating the unit 180 degrees and reattaching the control panel.

### Horizontal and vertical spigots

The combination of spigot options allows installation in confined locations. If vertical and horizontal connection is required on the same outlet/inlet, additional spigots can be supplied.

### Filter Check

An LED on the control panel illuminates at 6 month intervals to remind users to check and clean the filters.

### Frost Protection

The Kinetic E range benefits from an automatic frost protection system, effective down to -20°C, which manages the airflows to prevent the heat recovery cell freezing in very cold weather, while at the same time maintaining ventilation.

### Control options

There are two LS (Switched Live) inputs allowing the unit to be connected to a number of sensors and controllers such as Ventwise, Timespan, Ambient Response Humidistat. One of the LS connections also benefits from a 'Delay-On' feature which prevents the unit boosting unnecessarily.

# Lo-Carbon Kinetic Plus E

## Consultants Specification

### Operation

The supply and extract ventilation unit shall be as Kinetic Plus E as manufactured by Vent-Axia and shall be sized as indicated on the drawings and shall be in accordance with the particular specification.

Supply air to the room shall be pre-heated by the extract air via the integrated composite plastic counterflow heat recovery cell. The Kinetic Plus E shall automatically vary the ventilation rate via EC/DC motors, as it receives signals from one of the optional interconnected sensors. When a signal is received, the fans shall vary their speed on a trickle and boost principle. The unit shall have the facility to commission the supply and extract fans individually via in-built minimum and maximum speed adjustment. The fans themselves shall have independent, infinitely variable speed control.

### Unit specification

The unit shall be manufactured with an ABS outer case construction, and incorporate a reversible core to allow for left or right hand mounting. The unit shall have a high efficiency composite plastic counterflow heat exchanger, supply and extract filters, integral minimum and maximum infinitely variable speed controls with fascia mounted failure indication.

The unit shall have low energy, high efficiency EC/DC fan/motor assemblies with sealed for life bearings. The impellers shall be high efficiency backward curved centrifugal type. The unit shall have a heat exchanger cell with a thermal efficiency of up to 94% when tested to EN 308. This shall be protected by G3 grade synthetic filters on supply and extract. Complete with a condensate drip tray and drain connection.

The unit shall be constructed with a removable Core allowing full maintenance access. The removable Core shall provide access to the following:

- ✓ Supply and extract filter
- ✓ Heat exchanger
- ✓ Access to the electrical connections

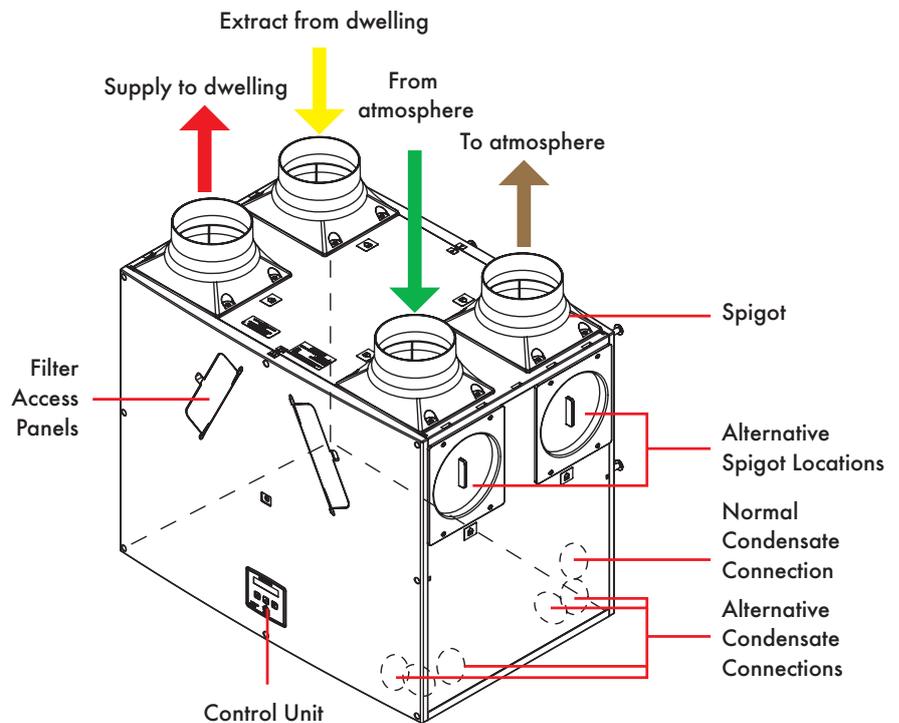

Access shall be provided for wiring termination and setup/ commissioning.

### Standard controls

All Kinetic Plus E units shall incorporate the following functions integrally mounted, pre-wired and factory fitted by the manufacturer:

- ✓ Integral infinitely variable fan speed control on supply and extract
- ✓ Integral min/max ventilation control/set point
- ✓ Integral on/off or trickle boost function from remote switch, e.g. PIR occupancy detector
- ✓ Switched Live input with adjustable 'delay-on' feature
- ✓ Tool free filter access
- ✓ Frost protection down to -20°C degrees
- ✓ LED 'filter check' indicator

## Airflow Direction & Condensate Connection (RH Supplied)

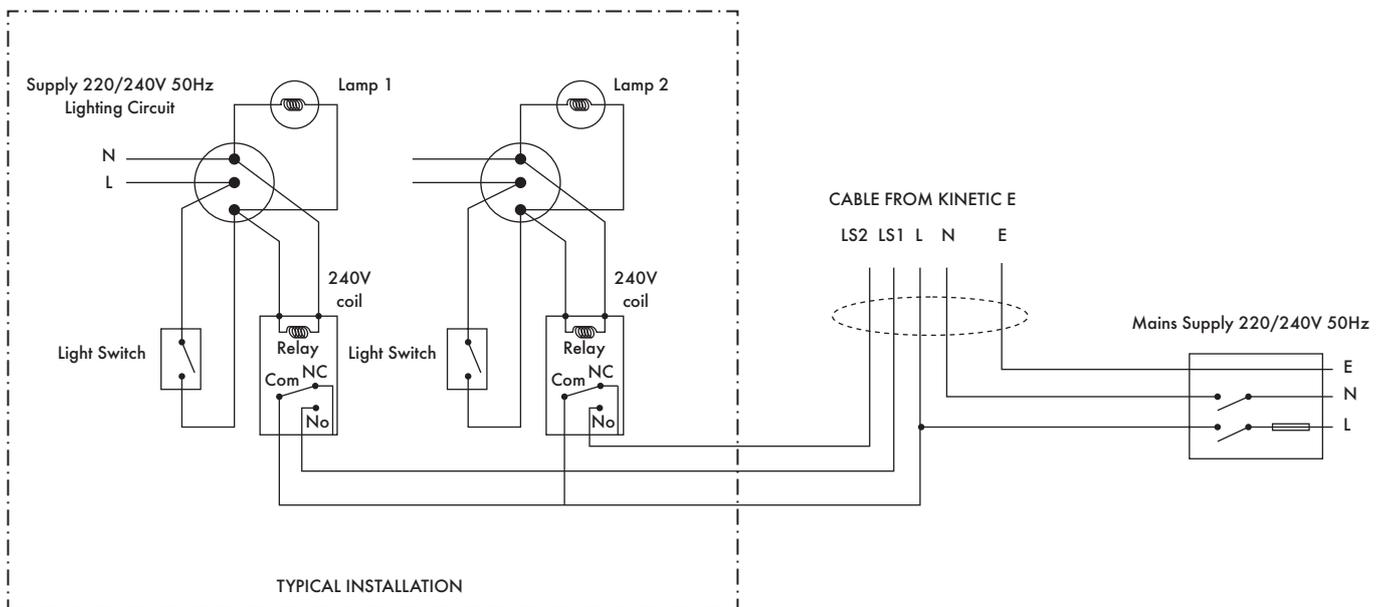

### Electrical Connection

The unit can be switched to boost by applying 230 V to the LS1 or LS2 inputs. Alternatively, the boost button on the control unit may be used.

#### Mains Cable Connections

Terminal No.	Name	Description
L	Mains Live	220-240 V AC, 50 Hz input
N	Mains Neutral	220-240 V AC, 50 Hz input
EARTH	Mains Earth	Earthing connector
LS1	Switched Live 1	220-240 V AC, 50 Hz input
LS2	Switched Live 2	220-240 V AC, 50 Hz input

# Lo-Carbon Sentinel Kinetic® Horizontal MVHR Unit

## Features & Benefits

- **Manufactured in the UK**
- **Building Regulations ADF compliant**
- **Recognised in SAP Appendix Q**
- **Energy Savings Trust best practice compliant**
- **Up to 81% heat recovery whilst controlling condensation**
- **Programmable Summer bypass**
- **Digital controller for simple and accurate commissioning**
- **External condensate connection**
- **Plug and play controls; Humidistat, Ventwise, Wireless remote**
- **LS inputs/(Light Switch)**
- **Volt-free inputs**
- **Self diagnosis for simplified fault finding**
- **Adjustable delay on/delay off timer**

## The Sentinel Kinetic Horizontal Range

A wholehouse heat recovery system with up to 81% heat exchange efficiency. An easily accessible heat recovery cube protected by two removable EU3 filters. Two Lo-Carbon Energy Saving EC/DC fans ensure long life (typically over double the life of AC motors) and lowest possible energy use. Fully insulated construction with built in condensation drain. Specifically designed for new build constructions with a high level of insulation.

Lo-Carbon Sentinel Kinetic meets the latest requirements of the Building Regulations ADF for wholehouse system ventilation: System 4. Continuous mechanical supply and extract with heat recovery. The Lo-Carbon Sentinel Kinetic models have three fully adjustable speeds and a purge setting (maximum flow). Supplied with the unit is a digital controller that can be used to pre-set the speeds to any required air-flow within the performance range.

## Integral Humidity Sensor

The integral humidity sensor ('H' models) increases speed in proportion to relative humidity levels, saving energy and reducing noise. The sensor also reacts to

small but rapid increases in humidity, even if the normal trigger threshold is not reached. This unique feature ensures adequate ventilation, even for the smallest wet room. The night time relative humidity setback feature suppresses nuisance tripping as humidity gradually increases with falling temperature. Acoustically lined - low noise levels from only 20dB(A) @ 3m.

## Models

Model	Stock Ref
Kinetic 200Z	448733
Kinetic 200ZH (humidity sensor)	449540
Kinetic 300Z	447801
Kinetic 300ZH (humidity sensor)	449536

## Optional Controls

Model	Stock Ref
Wireless enable kit (includes one switch)	441865
Wireless boost switch (max 3 switches)	437827
Ventwise Controller (also requires sensors, see Accessories & Controllers section)	441780

## Multiple control options:

Five Voltfree pairs of switch terminals for sensor inputs allow boosting from a full range of Vent-Axia controllers - humidistats, PIR, timers.

Two terminals with 0-24V outputs allow 0V to 10V proportional control by sophisticated controllers such as CO<sub>2</sub> sensors and proportional humidistats.

The optional Ventwise controller senses temperature rise in a bath/shower hot water supply and/or current in a cooker/hob electrical circuit to activate boost, ensuring additional ventilation when needed. Switch-live for boosting via light switches (220-240V AC) or manual Normal/Boost switches. This connection has the advantage of Delay-On and Delay-Off facility. Delay-On enables you to prevent the Boost airflow between 0 and 10 minutes after a light switch has been activated. Delay-Off allows the Boost airflow

to continue after a light switch is turned off to ensure effective clearance of humidity. This timer is adjustable between 0 and 25 minutes.

## Summer Bypass

An internal damper is activated when the outside temperature is less than the room temperature. The damper opens allowing cooler fresh air to bypass the Heat Recovery Cell and reduce the internal temperature towards the pre-set 'Comfort Temperature'. When the inside air temperature reaches the pre set 'Comfort Temperature' the bypass damper closes.

## Frost Protection

In cold climates there is a possibility of frost building up on the intake side of the heat exchanger. In order to prevent damage, the Kinetic reduces supply flow while maintaining extract flow at temperatures down to -20°C.

# Lo-Carbon Sentinel® Kinetic Horizontal

## Consultants Specification

### Operation

The supply and extract ventilation unit shall be as Sentinel Kinetic Z as manufactured by Vent-Axia and shall be sized as indicated on the drawings and shall be in accordance with the particular specification; 200Z - 200mm deep, 300Z - 300mm deep.

Supply air to the room shall be pre-heated by the extract air via the integrated aluminium counterflow heat recovery cell. The Sentinel Kinetic Z shall automatically vary the ventilation rate via EC/DC motors, as it receives signals from one of the optional interconnected sensors. When a signal is received, the fans shall either vary their speed proportionally or on a trickle and boost principle.

The unit shall have the facility to commission the supply and extract fans individually via the wired remote control unit. The fans themselves shall have independent, infinitely variable speed control.

### Unit specification

The unit shall be manufactured with a galvanized steel outer case construction and shall be suitable for horizontal ceiling void/slab mounting.

The unit shall have a high efficiency aluminium counterflow heat exchanger, supply and extract filters, automatic summer bypass, integral minimum and maximum infinitely variable speed controls with failure indication via the wired remote controller.

The unit shall have low energy, high efficiency EC/DC fan/motor assemblies with sealed for life bearings. The impellers shall be high efficiency backward curved centrifugal type.

The unit shall have a heat exchanger cell with a thermal efficiency of up to 81% when tested to EN 308. This shall be protected by G3 grade synthetic filters on supply and extract. Complete with a condensate drip tray and drain connection.

The unit shall be constructed with a removable access panel allowing full maintenance access from below. The removable panel shall provide access to the following:

- ✓ Supply or extract fan
- ✓ Supply and extract filter
- ✓ Heat exchanger
- ✓ Access to the electrical connections

Access shall be provided for wiring termination and setup/ commissioning.

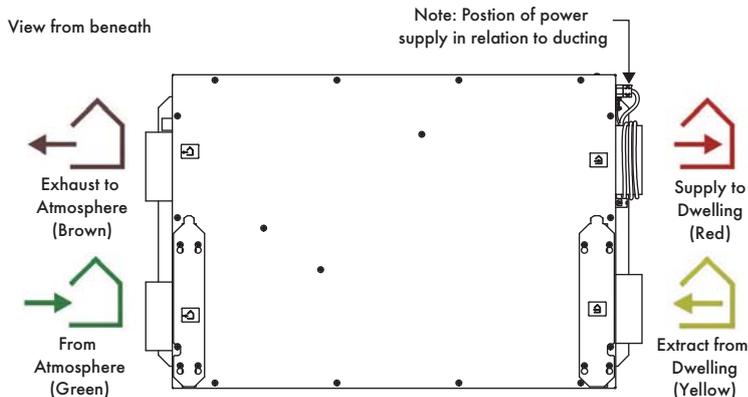

### Standard controls

All Sentinel Kinetic Z units shall incorporate the following functions integrally mounted, pre-wired and factory fitted by the manufacturer:

- ✓ Infinitely variable fan speed control on supply and extract
- ✓ Min/max ventilation control/set point
- ✓ Heating interlocks
- ✓ 0-10V proportional speed adjustment
- ✓ Volt free contacts
- ✓ 24V sensor supply
- ✓ On/off or trickle boost function from remote switch, e.g. PIR occupancy detector
- ✓ The unit shall be controlled by the 'Sentinel' control devices (enablers and sensors) as detailed in the schedule or on the drawings
- ✓ Fully automatic summer bypass
- ✓ Switched Live input with adjustable 'Delay-On' feature
- ✓ Fan failure or component failure indicated via individual fault code display
- ✓ Running time counter
- ✓ Control panel PIN number lock
- ✓ Automatic frost protection effective to -20°C
- ✓ The unit shall incorporate ('H' models) an integral humidity sensor with the following features:
  - Ambient Response: Raises the humidity trigger point as dwelling temperature reduces
  - Rapid Response: Monitors the rate of change in humidity and triggers increased airflow even if the humidity trigger threshold is not reached
  - Proportional Response: Incrementally increases the fan speed to reduce noise and reduce energy consumption

The unit shall be controlled by the 'Sentinel' control devices (enablers and sensors) as detailed in the schedule or on the drawings.

## Airflow Direction & Condensate Connection

# Integra®

## Ducted MVHR Unit

### Features & Benefits

- Powered heat recovery unit for smaller residential or commercial applications up to 180m<sup>2</sup>
- Up to 70% heat recovery
- Low power consumption
- Effective condensation control

The Integra heat recovery unit has been specially designed to provide ventilation for flats or rooms in residential, commercial, educational or leisure applications. Balanced ventilation is achieved by using nominal 100mm diameter rigid ducting.

Using a high performance, polymeric heat exchange cube, together with two powerful fans, the Vent-Axia Integra achieves efficiencies of up to 70%.

The compact cube interleaves outgoing moist air with incoming fresh air, allowing the heat from one to warm the other without the two air streams mixing. Energy is saved on room heating, with no power being used by the cube itself.

Performance of Integra: Up to 49l/s FID. Ideal for installation in the ceilings voids or cupboards.

The 150VA Transformer enables the selection of trickle settings to match dwelling volume.

## Ducted MVHR Unit

### Features & Benefits

- Powered heat recovery unit for larger residential or commercial applications
- Up to 70% heat recovery
- Low power consumption
- Effective condensation control
- 3 speed control

### Easy Installation

The Vent-Axia Integra Plus is designed for mounting in ceiling voids, lofts and above a suspended ceiling mounting. Four 150mm spigots are provided for simple connection to insulated flexible or rigid ventilation ducting. The unit comes complete with a 22mm condensate outlet.

# HR100R/RS

## Ducted MVHR Unit

### Features & Benefits

- Controls condensation and odours - saves energy
- Eliminates mould growth
- Up to 70% Heat Recovery
- Extremely quiet operation
- Two speed settings

The HR100R and HR100RS are ideal for single bedrooms/bathroom applications situated in hotel rooms, nursing homes and residential care homes.

The HR100R features top access and is ideal for loft installations.

The HR100RS features bottom access and is ideal for installation on the ceiling slab above a suspended ceiling.

The HR100R/RS is a self-contained heat recovery unit for mounting in lofts and suspended ceilings. The unit is supplied without controls to allow for the unit to be tailored to suit the individual requirements.

Compatible with standard 100mm ducting for connection to internal grilles and external cowl.

The unit comes fitted with a single 2-speed motor, and provides continuous low volume ventilation with a boost option. A variety of control devices are available for manual or automatic speed control.

An integral heat exchanger transfers heat from the outgoing stale air to the fresh air supply, raising the supply air temperature whilst at the same time reducing its relative humidity.

Up to 18l/s FID capacity. The unit provides superior control of condensation and odours, ideal for bathrooms or small internal rooms.

## Ducted MVHR Unit

### Features & Benefits

- Powered heat recovery module for smaller commercial applications
- Up to 70% heat recovery
- With 150mm duct connection
- Extremely quiet on low speeds
- Low power consumption
- Washable heat exchanger
- Pre-wired to a flexible cable

A ducted heat recovery unit for rooms in residential or commercial applications. Self-contained and includes two mixed flow speed controllable fans. Using a high performance, polymeric heat exchange cube together with two power fans, the HR200V can boast a temperature efficiency of up to 70%. Low speed for trickle ventilation mode.

Specially designed to provide ventilation for small internal rooms in commercial, educational and leisure applications. Ventilation is achieved by using nominal 150mm diameter ducting. The unit includes two mixed flow speed controllable fans plus a high efficiency polymeric heat exchanger.

HR200V to be used with a 150VA Transformer for maximum controllability.

### Dimensions (mm)

Weight : 15.5kg fan box, 5kg controller

# HR500

## Single Room Heat Recovery Unit

### Features & Benefits

- Efficient 550m<sup>3</sup>/h heat recovery ventilation unit or high performance 900m<sup>3</sup>/h extract fan
- Lightweight, compact and easy to install
- Integral shutters on X type model
- Easy to clean
- 70% heat recovery
- Controller with sensor mode, allows a range of sensors to be used in conjunction with the HR500 and HR500X units
- IPX5 rated

### Heat Recovery Ventilation

HR500 heat recovery ventilation units for through wall installation, which exhaust stale air whilst introducing warmed fresh air from the outside.

### Performance

Model	Airflow performance (l/s)		Watts (max)	Sound dB(A) @ 3m (max)
	Heat recovery mode	Extract mode (max)		
HR500	153l/s	250l/s	200	53
HR500X	153l/s	250l/s	220	53

Ideal for computer rooms, classrooms, offices and the health and leisure industries. The Vent-Axia HR500 unit is the perfect solution to commercial areas that require a high performance balanced intake/extract scheme. As a heat recovery ventilation unit it moves a useful 153l/s of air.

The compact heat recovery cube interleaves outgoing warm air with incoming fresh air and allows the heat from one to warm the other without the two streams mixing. Energy is saved on room heating with no power being used by the cube itself.

The HR500 and HR500X consist of a tough telescopic wall sleeve into which the main body of the unit is housed. Walls of up to 670mm thick can be easily accommodated. Behind the neat deflecting fascia grilles are the filters, the heat exchange cube and fan units. All wall sleeve components, the heat exchange cube and the fascia grilles are made of tough polymeric materials.

### Electrical

Maximum ambient temperature +40 °C.  
Supply Voltage 220-240V/1/50Hz.

### Models

#### HR500 Commercial

Wall-mounted intake/extract ventilation unit with built-in heat recovery facility. For commercial and leisure areas. Lightweight, compact and easy to install.

**Stock Ref**  
**14101010**

#### HR500X

As HR500 with shutters.

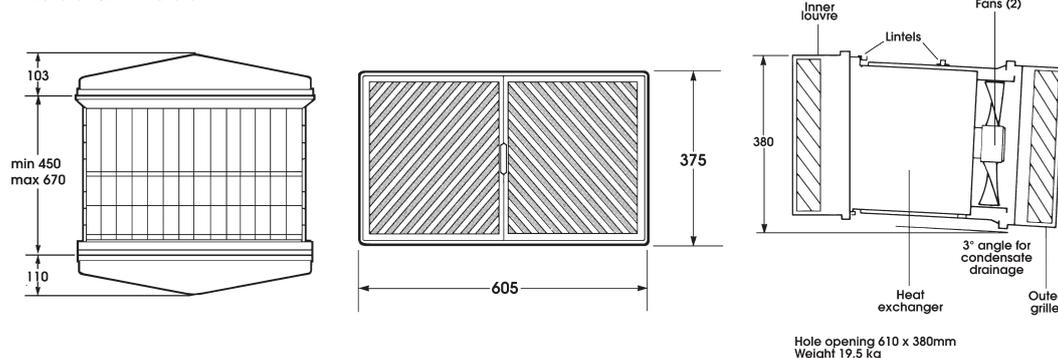

**Stock Ref**  
**14101070**

#### HR500 Controller

Surface mounting. On/Off remote sensor mode. Heat exchange, single fan extract or twin fan extract modes. Infinitely variable speed. Minimum speed setting. Suitable for controlling up to 2x HR500.

**Stock Ref**  
**W14301010**

### HR500 & HR500X

# HR500D

## Ducted MVHR Unit

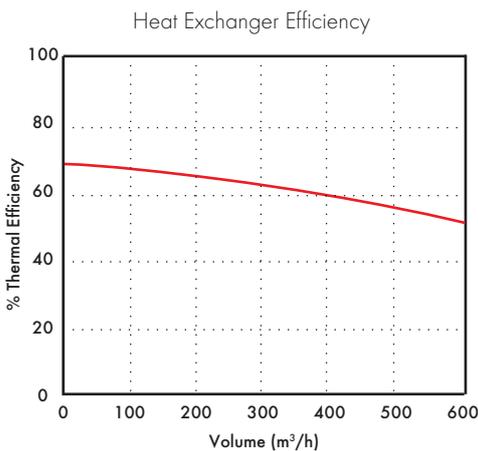

### Features & Benefits

- Self-contained unit with integral fans
- Up to 70% heat recovery
- Compatible with 315, 250 and 200mm Ø, ducting and accessories
- External wall mounting
- Speed Controller W14301010

The HR500D is a self-contained unit with integral extract and supply fans to provide balanced ventilation and heat recovery via supply diffusers and extraction grilles. The unit is fully speed controllable.

The compact heat recovery cube interleaves outgoing warm air with incoming fresh air and allows the heat from one to warm the other without the two streams mixing.

### Performance

Airflow performance l/s (max)	Watts (max)	dB(A) @ 3m (max)	Weight kg
174 l/s	210	53	19

Energy is saved on room heating with no power being used by the cube itself.

Performance of HR500D: Supply and extract up to 174l/s FID capacity on heat recovery mode. Ideal for offices, computer rooms, pubs and clubs, etc.

### Model

Surface mounting. On/Off remote sensor mode. Heat exchange, single fan extract or twin fan extract modes. Infinitely variable speed. Minimum speed setting. Suitable for controlling up to 2x HR500.

## Passive MVHR Unit

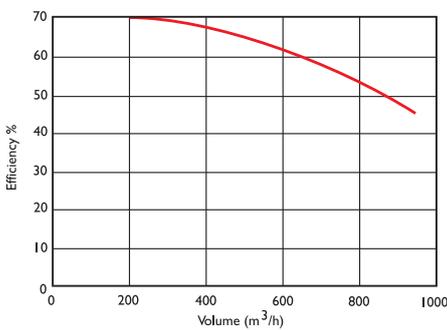

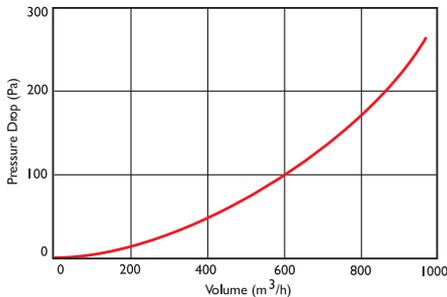

### Features & Benefits

- **Passive - no fans**
- **Lightweight - easy installation**
- **Compatible with 315, 250 and 200mm Ø ducting and accessories**
- **Saves Heat - 70% heat recovery**
- **Internal wall mounting**
- **HR500IP**
- **External wall mounting HR500EP**

### Performance

Pressure Drop over Heat Exchange Unit

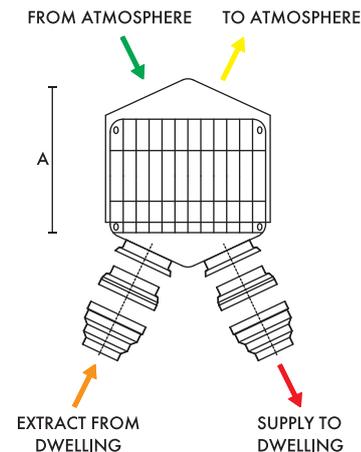

Thermal Efficiency Graph

The unit is a semi-remote heat exchange unit with 70% heat recovery, designed for mounting in internal walls (HR500IP) and external walls (HR500EP) for installations using ducted extraction and fresh air supply. The HR500 units provides air

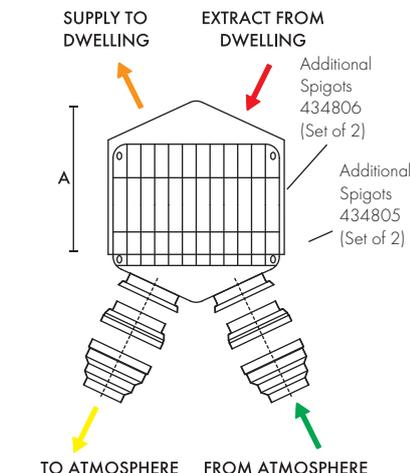

movement via two independent in-line duct fans to suit length and configuration of ducting systems. The unit is ideal for use with in-line centrifugal type fans and compatible accessories. Performance of HR500EP and HR500IP: Up to 244 l/s FID capacity (balanced airflow Ideal for computer rooms, classrooms, offices and the health & leisure industries.

## Passive MVHR Unit

### Features & Benefits

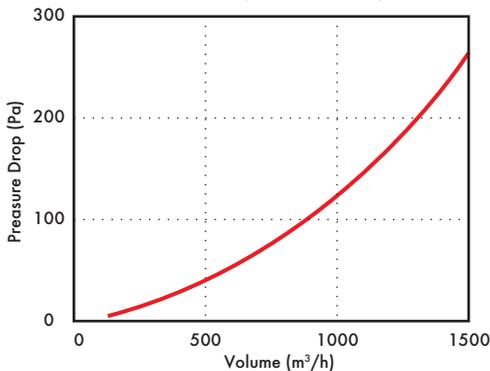

- **Passive - no fans**
- **Lightweight, compact and easy to install**
- **Up to 70% heat recovery**
- **Easy to clean**

A 'stand alone' heat exchange module which will transfer up to 70% of the outgoing heat to incoming air. Polymeric construction with spigots to suit 200, 250 and 315mm Ø flexible ductwork.

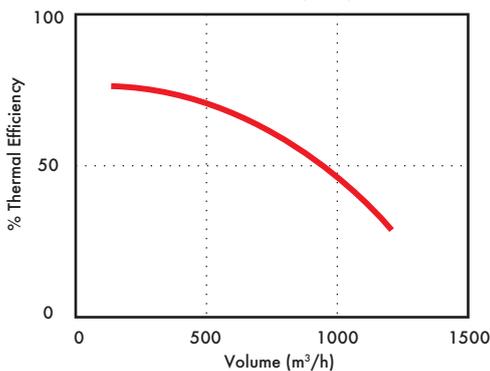

Module accessible for routine cleaning. Condensate outlet provided. Ideal for use in air conditioned environments.

### Performance

Heat Exchange Resistance Graph

Thermal Efficiency Graph

The heat exchanger works at the same high efficiency, automatically keeping a cool room cool. Performance of the Heat Exchange Unit: At 180l/s achieves 70% temperature efficiency (balanced airflow). Ideal for schools, pubs, offices and leisure industries.

# Ducting & Fittings

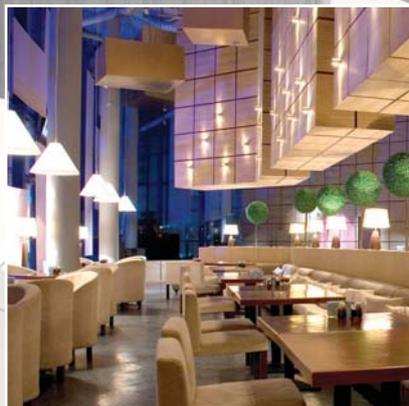

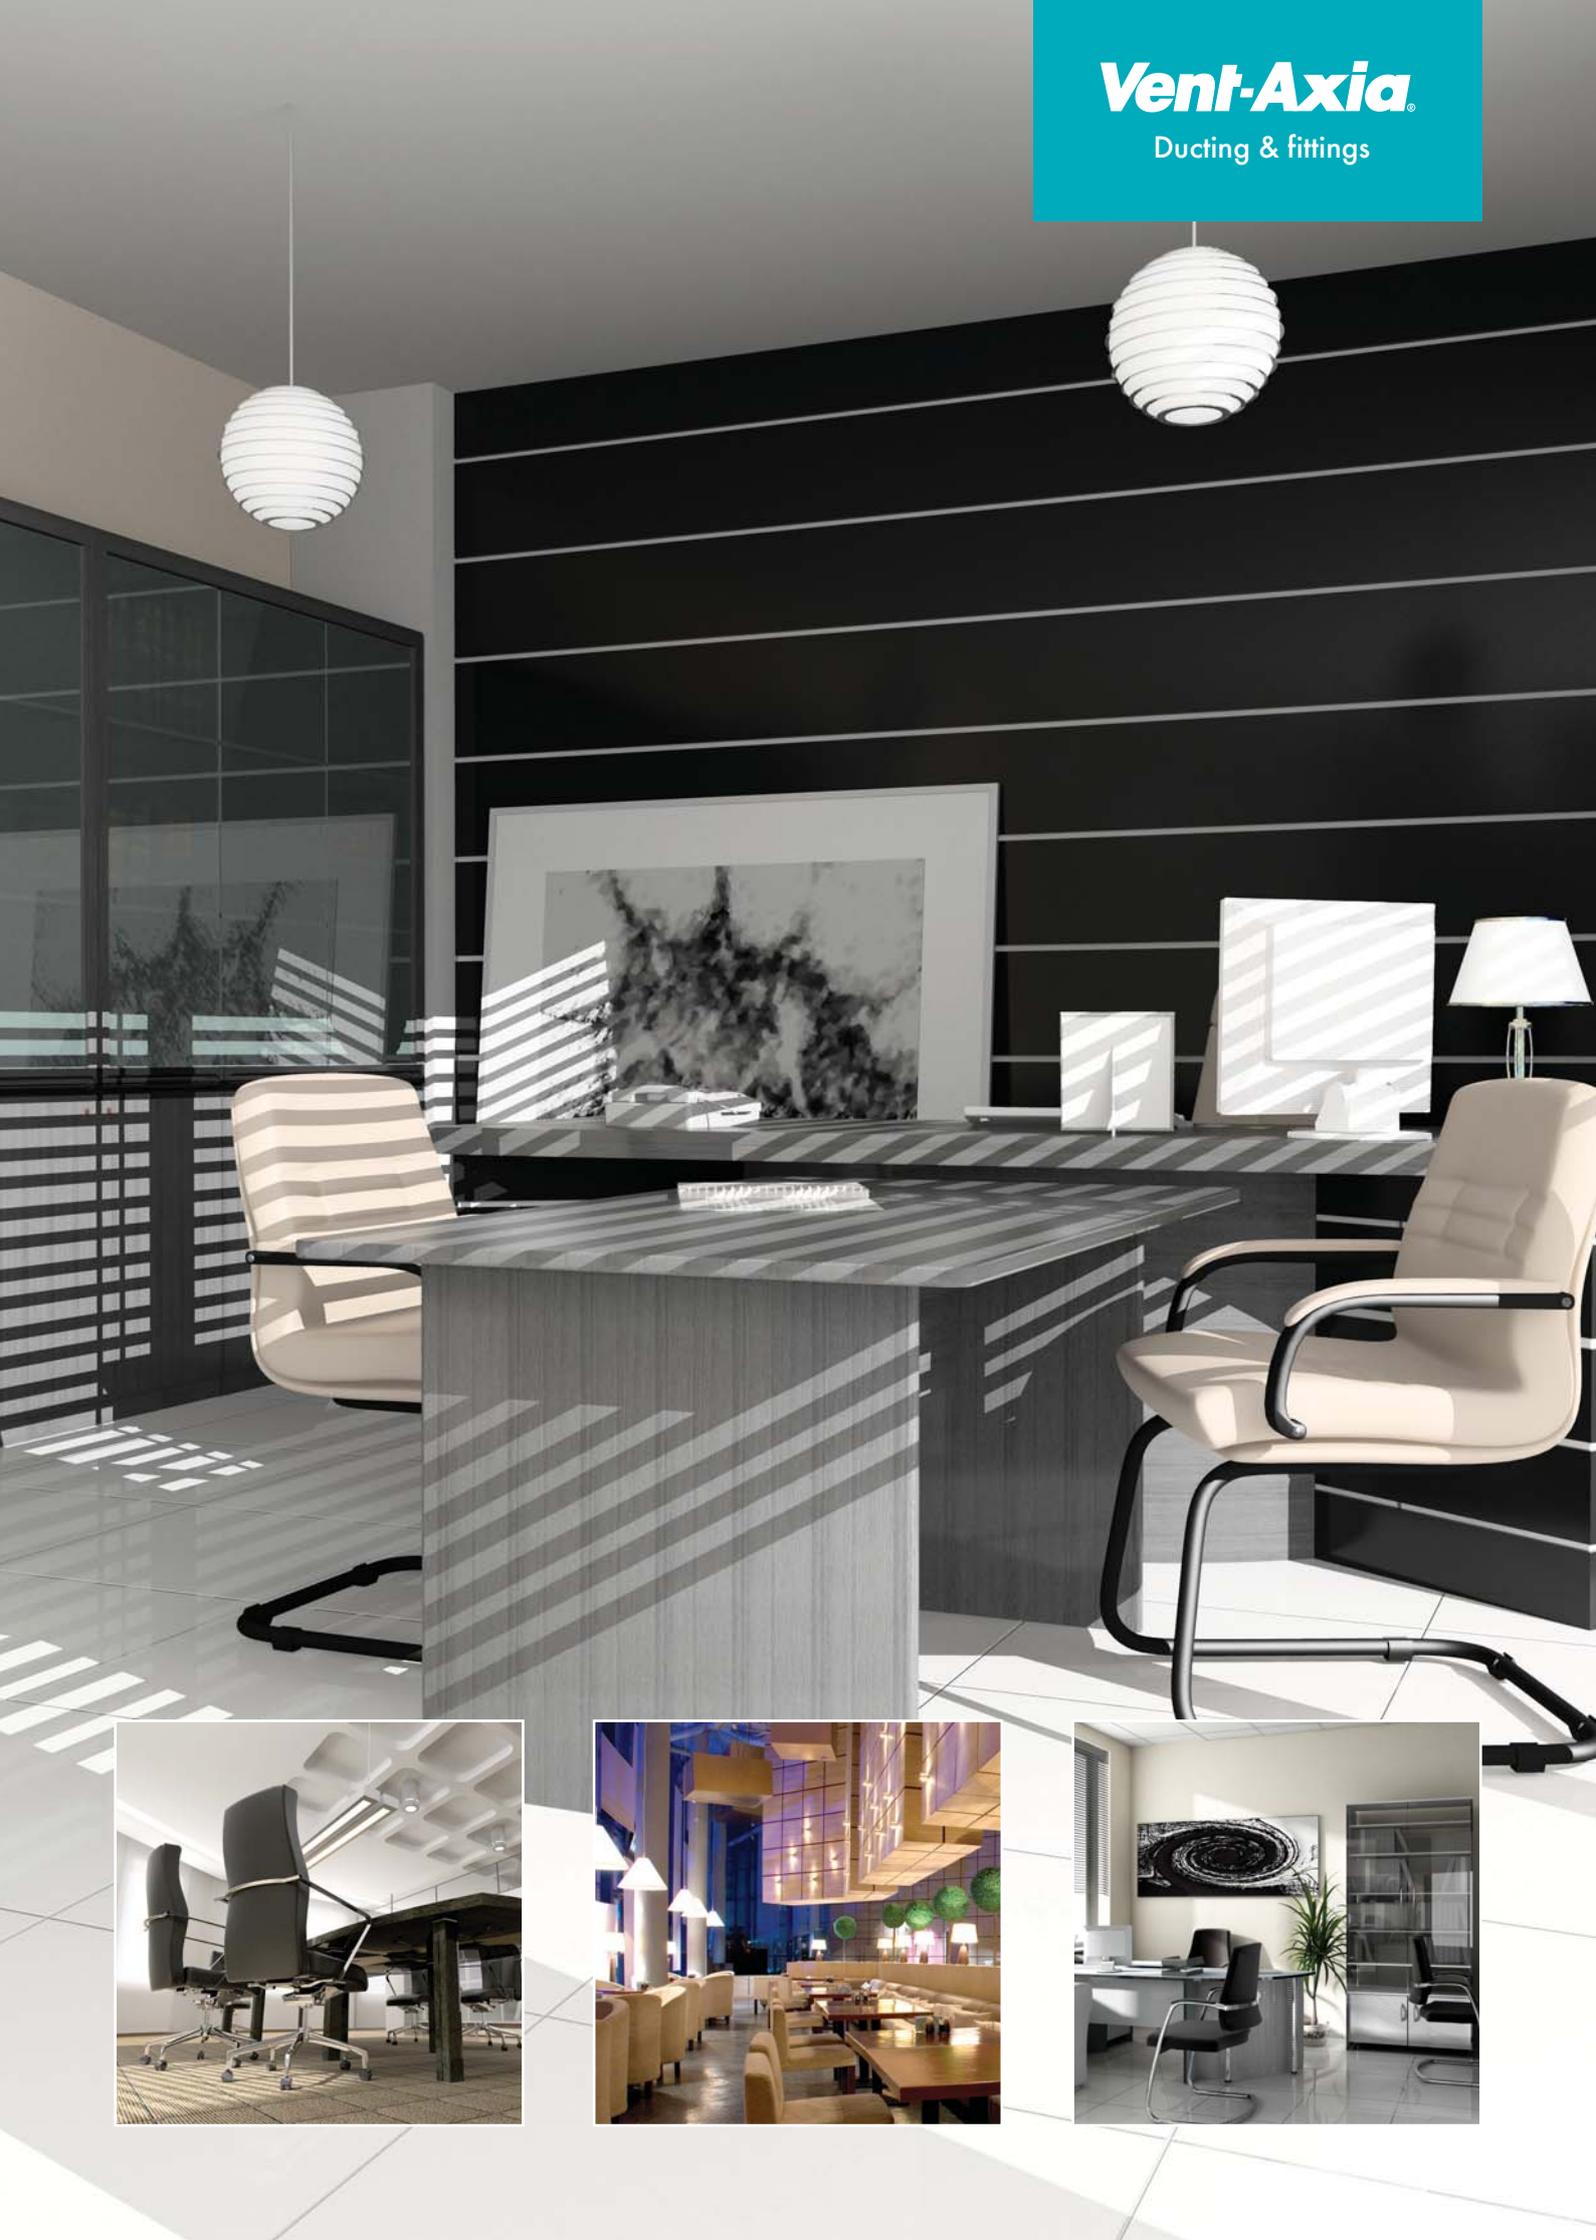

Since 1936, Vent-Axia have been known for providing a complete ventilation solution. To ensure all of our systems reach their maximum levels of efficiency, Vent-Axia now offer one of the widest ranges of ventilation ancillaries available today.

Regardless of the size or shape of your project, we will be able to advise you on all of the ducting and fittings required to optimise the performance of your ventilation system.

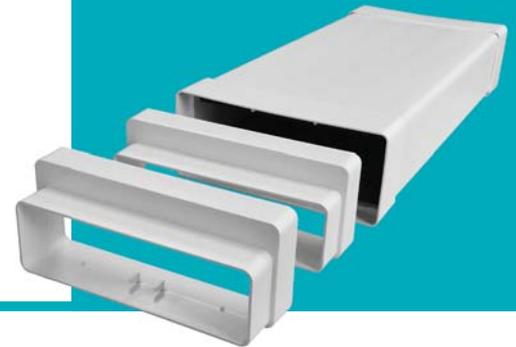

**Vent-Axia**

Ducting & fittings

# Rigid Duct Attenuator

Suitable for 204mm x 60mm duct

## Features & Benefits

- Reduces noise levels within rigid ducting
- Tested up to 150l/s (540m<sup>3</sup>/hr)
- Reduces noise level by up to 55%
- Sturdy lightweight construction
- Easy installation
- Closed cell, Class O fire rated acoustic material
- Microban anti-microbial protection
- Corrosion proof
- Suitable for most installations
- Available in two lengths; 600mm and 1000mm
- Compatible with 204x60mm ducting

## The Product

The Vent-Axia Rigid Duct Attenuator has been developed as a cost effective and compact way of reducing noise within a ventilation system. The light weight, low profile construction also provides corrosion resistance over metal silencers.

## Technical Details

The acoustic lining of the attenuator contains Microban anti-microbial protection, offering enhanced resistance against mould growth and also dust, fibre and formaldehyde free.

The Vent-Axia Rigid Duct Attenuator is suitable for residential and commercial applications including schools and offices.

## Noise Reduction

The Vent-Axia Rigid Duct Attenuator offers excellent sound reduction over a range of frequencies and is available in two lengths depending on the noise suppression requirements. For MVHR systems the Attenuator can be fitted on the supply side to habitable rooms, reducing airborne in-duct noise. For MVHR and extract-only systems, the Attenuator may be placed on the extract side to limit 'cross-talk' through ductwork between rooms.

# Low Resistance Inlet/Outlet Air Brick

## Features & Benefits

- Provides over 90% free area of duct
- Easier to install than a double air brick
- UV stabilised polymer
- Guide vanes for improved duct connection
- Optional first fix duct section

Available in five colours, this low resistance air brick has been designed to comply with the latest Building Regulations Approved Document F, which requires a ventilation outlet to achieve a minimum of 90% of the cross sectional area of the ductwork. Installing a single air brick is much simpler than a double air brick and offers more versatility for locations.

Suitable for 100mm and 125mm, dia', and 204 x 60 ducting.

Attaching duct to the air brick is simplified by the use of guide vanes which help locate the duct onto the spigot.

A 500mm section of 204 x 60 duct is available for first fix which ensures that connections are accessible after completion of building works.

Five colour options ensure that the low resistance air brick will be a match for almost any application.

Size 7	225mm	<b>566609</b>
Size 9	300mm	<b>566612</b>
Size 12	400mm	<b>566616</b>

### Aluminium Flexible Ducting

Lightweight, easy to install ducting made of 5 layer aluminium foil/ polyester on a steel wire helix. The strength of the helix resists distortion and damage due to rough handling.

#### 10 metre lengths

Duct Dia	Stock Ref
100mm	<b>10539100</b>
125mm	<b>10539125</b>

250mm	<b>10539250</b>
315mm	<b>10539315</b>
400mm	<b>10539400</b>

### Insulated Flexible Ducting

Insulated ducting should be used when duct passes through an unheated area. Minimised heat loss when used with heat recovery fans. Available in 6 diameters. An additional benefit is that thermally insulated duct offers some measure of acoustic attenuation.

Fire Rating: When assessed against the integrity criterion of BS476: Part 20; 1987, the ducting is capable of providing in excess of 25 minutes integrity from inside to outside.

### Air Grille

Louvre grille for external termination of 100mm diameter rigid ducting. Consists of wall mounting piece and grille with 2 fixing screws.

Colour: White or Brown  
Dimensions: 155 x 155 x 32mm  
Material: ABS plastic

Colour	Stock Ref
White	<b>563511</b>
Brown	<b>563500</b>

### Termination Set

Used as a decorative inlet grille or soffit termination set in conjunction with 100mm or 125mm diameter ducting. Two fixing screws supplied to secure grille to the spigot through material up to 25mm thick. Dimension 155mm x 155mm.

Colour: White  
Material: ABS plastic

Stock Ref  
**563513**

### Decoration Frame

A decoration frame that converts old Centrif to new Centrif Duo without the need to redecorate. The frame can be used with Quadra and Centrif Duo Plus.

The frame is simply installed using two wall fixing screws, allowing the fan to be mounted via its standard mountings. Finished in a high moulded material plastic colour matched to the fan.

Color: White  
Size: 386mm x 296 x 32 mm deep

Stock Ref  
**442551**

### Quick Fit 100mm Airflow Shutter

Shutter with gravity flaps to protect against backdraught. The spigot connects to 100mm rigid ducting using quick fix grips provided.

Dimensions: 155 x 155 x 20mm  
Material: Plastic

Colour	Stock Ref
White	<b>563522</b>
Brown	<b>563542</b>

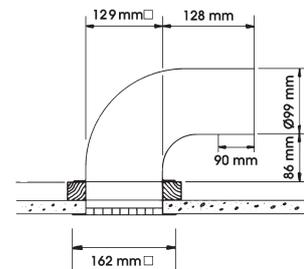

### Terminal Connector & Grille

Used for the termination of 100mm flexible ducting to the ceiling or wall of small areas, such as internal toilets.

Connector: Manufactured in flame-retardant high impact thermoplastic  
Colour: Grey  
Grille: ABS plastic eggcrate, white finish

Description	Stock Ref
Grille	<b>560846</b>
Connector	<b>560856</b>

### 100mm Wind Cowl

Wind baffle for high rise, coastal or exposed areas.

Colour	Stock Ref
White	<b>457845</b>

### 100mm & 150mm Accessories

#### Quick Fit 100mm Grille

Terminates a rigid duct on an outside wall using the 'quick fix' side grips without the need for additional fixings.

<b>Colour</b>	<b>Stock Ref</b>
White	<b>563521</b>
Brown	<b>563541</b>

#### Vent Cowl

External termination for 100mm diameter rigid ducting through roofs and walls in exposed situations. Overall diameter 200mm. Not suitable for use with flexible ducting.

<b>Material</b>	<b>Stock Ref</b>
Grey PVCu	<b>561403</b>

#### VA140/150 Window wind cowl

Wind baffle for exposed areas.

<b>Stock Ref</b>
<b>455262</b>

#### Ducting Pack

Consists of 1 x 3 metre length aluminium foil flexible ducting of 100mm diameter, 2 x cable ties and 1 x 100 diameter spigoted fixed grille with built-in screen.

<b>Stock Ref</b>
<b>563517</b>

#### Air replacement Set

Bathroom and toilet ventilation is only effective when there is adequate air replacement into the room. This is often most effectively achieved by fitting a pair of air replacement grilles at low level in a door. Consists of a two piece telescopic set which fits unobtrusively on either side of the door panel.

<b>Minimum fixing thickness:</b>	30mm.
<b>Dimensions:</b>	454 x 90mm.
<b>Hole size:</b>	435 x 76mm.
<b>Material:</b>	High impact thermoplastic.
<b>Free area:</b>	115cm <sup>2</sup>

#### Quick Fix Termination

The quick fix termination is designed to be installed from inside the building to a nominal 117mm or 165mm diameter core-cut hole, saving time and cost. Four sealing rings ensures a weather tight fit to the wall external leaf. Effective length 370mm.

<b>Duct Size</b>	<b>Stock Ref</b>

## In-Line Mixed Flow Fans Models

### Features & Benefits

- Quietest on the market
- Designed and manufactured in UK
- Two speed selectable motor
- Timer versions available
- Removable motor core assembly
- Rotating motor chassis assembly
- Supplied complete for installation
- IP44 rated
- Aesthetically pleasing with wipe clean polymer casing

### Ducted Ventilation

Vent Axia has designed a complete range of energy efficient Mixed Flow In-Line fans that are now quieter, offer two and half times the pressure of conventional axial fans and are dimensionally more compact making them ideal for many ducted applications.

The ACM Mixed Flow In-Line fan can operate in both horizontal and vertical positions.

### Motor

All motors are fitted with Standard Thermal Overload Protection (S.T.O.P.). Designed for ambient temperatures up to +50°C. All sizes with capacitor run motors. All sizes are Class II appliances. Supply voltage 220-240V/1/50Hz.

These units have a separate footplate for simple location mounting and detachable spigots for simple connection to ducting. The motor body chassis now rotates to provide connection in acute spaces. Cleaning the product has also become simple as all parts can be removed without removing the ducting.

### Controller

For optimum performance use a Vent-Axia 1.5 Amp electronic controller. Surface mounted providing variable speed control with an On/Off/sensor slider with indication light. There is an adjustable minimum speed setting. The controller has electrical connections for use with suitable external sensors. Cannot be used with timer models.

1.5 Amp Controller (Suitable for 100mm - 200mm models) Dimensions: 86 x 156 x 53mm (H x W x D).

Stock Ref  
**W300310**

For flush fitting a metal wall box accessory is available.

Stock Ref

## In-Line Mixed Flow Fans Models

### Features & Benefits

- Available in two sizes
- Simple Installation
- Supplied complete for installation
- Optimise fan performance by using an approved Vent Axia controller
- Diagonal impeller with stator
- Galvanized metal housing
- Integrated thermal switch
- Includes a mounting bracket
- Designed to meet IP54

### Ducted Ventilation

Vent Axia has designed a complete range of energy efficient Mixed Flow In-Line fans that are now quieter than any other product on the market. The ACM range of six products have been designed for use with rigid and flexible ducting.

In-line Mixed Flow fans offer two and half times the pressure of conventional axial fans and are dimensionally more compact making them ideal for many ducted applications.

The ACM Mixed Flow In-Line fan can operate in both horizontal and vertical positions and can be mounted to meet its optimum performance.

### Motor

All motors are fitted with Standard Thermal Overload Protection (S.T.O.P.). Designed for ambient temperatures up to +50°C. All sizes with capacitor run motors. ACM 250 and 315 are Class I appliances. Supply voltage 220-240V/1/50Hz.

### Models

Model	Stock Ref
ACM250	17110010
ACM315	17112010

### Controller

For optimum performance use a Vent-Axia electronic controller. Surface mounted providing variable speed control with an On/Off/sensor slider with indication light. There is an adjustable minimum speed setting. The controller is radio suppressed to BS EN 55014 and electrical connections for use with suitable external sensors are provided.

1.5 Amp Controller - Suitable for 250mm model  
Dimensions: 86 x 156 x 53mm (H x W x D).

Stock Ref  
**W300310**

Used in conjunction with speed controllable fans to provide 5 stepped speed without electronic motor 'hum'. Several fans can be connected to one transformer provided their combined load does not exceed the controller rating.

Single phase: 3.0amp. Rotary switch giving On/Off and five speeds.

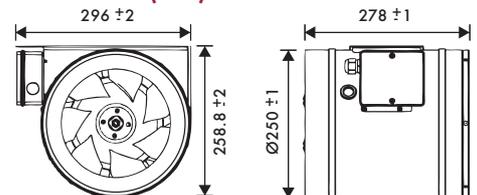

Output voltages at 240V/1PH/50Hz 0, 90, 115, 140, 175, 240 volts.

Neon indicator. Enclosures are protected to IP54.

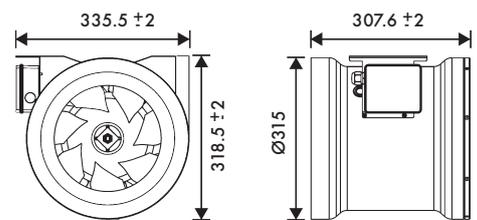

Dimensions: 135 x 170 x 117mm (H x W x D).

## In-Line Duct Fans Models

### Features & Benefits

- Tough plastic in-line range in eight models
- 50-80mm long ribbed spigots
- Flame retardant casing
- All models speed controllable
- Fitted with Standard Thermal Overload Protection (S.T.O.P.)
- For the best performance from your fan, use a Vent-Axia controller
- IP44 Rated

### Ducted Ventilation

Powerflow models provide a compact yet versatile range designed with the installer in mind, combining the acoustic benefits of a tough plastic casing with the pressure characteristics of a centrifugal fan.

A range of eight models from 100 to 315mm dia. duct sizes. The 315mm dia. model has been specifically developed for use with rigid ductwork. Air volumes from 59l/s to 420l/s in free air and capable of pressure development up to 550 Pa.

Powerflow has 50-80mm long inlet and discharge spigots allowing easy installation and fixing. The adjustable mounting foot allows the terminal box to be rotated to any angle and allows plenty of space and adjustment for screw fixing. The robust fire retardant polymeric casing combined with internal guide vanes ensures optimum airflow management through the unit.

### Electrical

Motors are 220-240V single phase 50Hz. Capacitor start and run. The terminal box is integral with the case moulding. All motors are fitted with Standard Thermal Overload Protection (S.T.O.P.).

### Motor/Impeller

All models are fitted with an external rotor motor and backward curved impeller assembly for long life and reliability.

All sizes are IP44 according to BS EN 60529. Ball bearings are greased for life and designed to run at any angle. Insulation is Class 'B' (from -30°C to +40°C). Manufacture is controlled to BS EN ISO 9001.

# Lo-Carbon T-Series® Window Models

## Features & Benefits

- Reduces your carbon footprint
- Extract/intake model in 2 sizes: 9" and 12"
- Long life Lo-Carbon motor lasts twice as long as conventional motors
- Up to 70% energy saving
- Wired or Wireless fan models available
- Easy fit connector Top Socket, standard on all models

## UK's No. 1 Commercial Fan

The Lo-Carbon T-Series range is fitted with a low energy DC motor, developed to improve performance, lower running costs and maintain T-Series' rugged reliability.

Designed for installation through single or double glazing and material up to 32mm thick. Greater thicknesses can be accommodated using extended fixing rod sets. Alternatively, the Lo-Carbon T-Series range can be used in conjunction with Vent-Axia ventilation accessories in flexible and rigid ducting systems to suit individual requirements. The fan can also be mounted in a fixing plate on walls or above ceilings.

## Instantaneous Shutter

With energy saving in mind, units are supplied complete with an integral instantaneous automatic louvre shutter concealed behind the interior grille. It operates on both extract and intake and at any angle of mounting.

The shutter is electronically controlled by an actuator with a damped action giving quiet operation during instant opening and closing. The interlocking edges of the shutter blades provide maximum back draught protection. When the ventilating unit is used with the Lo-Carbon T-Series controller, the shutter can be set open with the fan motor switched Off to provide natural ventilation without the security risk of an open window.

# Lo-Carbon T-Series® Wall Models

### Features & Benefits

- Long life Lo-Carbon motor lasts twice as long as conventional motors
- Reduces your carbon footprint
- Extract/intake model in 2 sizes: 9" and 12"
- Up to 70% energy saving
- Wired or Wireless fan models available
- Easy fit connector Top Socket, standard on all models

### UK's No. 1 Commercial Fan

Behind the grille of the Lo-Carbon T-Series Wall model is a high performance extract/intake ventilating unit designed to fit through most wall thicknesses using the telescopic liner supplied. For walls of exceptional thickness additional liners can be used. Conduit entry is provided for concealed wiring.

### External Brick Walls

Lo-Carbon T-Series wall models are designed to fit directly into double brick, solid and cavity walls. The two part telescopic liner accommodates wall thicknesses from 240 to 315mm. For thicker walls additional liner sections are available. Lo-Carbon T-Series wall models are provided with internal and external wall frames which fit flush with both faces of the wall.

### Instantaneous Shutter

Lo-Carbon T-Series models are supplied complete with an integral instantaneous automatic louvre shutter which will operate on both intake and extract and at any angle of mounting.

When the ventilating unit is used with a Lo-Carbon T-Series controller, the shutter can be set open with the fan motor switched Off to provide natural ventilation without the security risk of an open window.

### Electrical

Motor purpose-designed. Suitable for running at any angle. Quiet running. Suitable for operation in ambient temperatures from -40°C to +50°C.

Fitted with self resetting Standard Thermal Overload Protection (S.T.O.P.).

Supply voltage 220-240V/1/50Hz.

### Top Socket

### Features & Benefits

- Reduces your carbon footprint
- Extract / intake model in 2 sizes: 9" and 12"
- Long life Lo-Carbon motor lasts twice as long as other conventional motors
- Up to 70% energy saving
- Wired or Wireless fan models available
- New easy fit connector Top Socket, standard on all models

### UK's No. 1 Commercial Fan

Designing ventilation systems with the fan mounted in a skylight or a flat roof is easy. With a low profile cowl, the Lo-Carbon T-Series Roof model is suitable for installation in horizontal, angled and vertical glass and for fixing plates in roofs. For vertical windows or walls in exposed areas and single and double glazing including most types of glass up to 32mm thick. Greater thicknesses can be accommodated using extended fixing rod sets. Both sizes of Vent-Axia roof plate assemblies can be fitted easily into flat roofs.

### Instantaneous Shutter

With energy saving in mind, Lo-Carbon T-Series models are supplied complete with an integral, instantaneous, automatic louvre shutter concealed behind the interior grille.

It will operate on both intake and extract and at any angle of mounting. The shutter is electronically controlled by an actuator with a damped action giving quiet operation during instant opening and closing.

When the ventilating unit is used with a Lo-Carbon T-Series controller, the shutter can be set open with the fan motor switched off to provide natural ventilation without the security risk of an open window.

### Top Socket

A connector Top Socket is now standard on all T-Series fans. Allowing fast and trouble-free mains connection.

### Electrical

Motor purpose-designed. Suitable for running at any angle. Quiet running, enclosed. Suitable for operation in ambient temperatures from -40°C to +50°C.

Fitted with self resetting Standard Thermal Overload Protection (S.T.O.P.).

Supply voltage 220-240V/1/50Hz.

# Lo-Carbon T-Series® Panel Models

### Features & Benefits

- Reduces your carbon footprint
- Extract / intake model in 2 sizes: 9" and 12"
- Long life Lo-Carbon motor last twice as long as other conventional motors
- Up to 70% energy saving
- Wired or Wireless fan models available
- New easy fit connector Top Socket, standard on all models

### UK's No. 1 Commercial Fan

Lo-Carbon T-Series panel/ceiling models are suitable for mounting at any angle in internal partitions, ceilings, ducts and, with louvre grilles, through external walls. When installed only the louvre grille is visible.

### Instantaneous Shutter

With energy saving in mind, Lo-Carbon T-Series models are supplied complete with an integral instantaneous automatic louvre shutter concealed behind the interior grille. With a Lo-Carbon T-Series Controller the fan will operate on both extract and intake, suitable for any angle of mounting. When the ventilating unit is used with a Lo-Carbon T-Series controller, the shutter can be set open with the fan motor switched off to provide natural ventilation without the security risk of an open window.

### Wireless Control

Every Lo-Carbon T-Series Wireless FM Controller uses unique digital signals to ensure trouble free operation. The controller will transmit through walls and floors allowing complete flexibility of design to control fans up to 30m away.

### Top Socket

A connector Top Socket is now standard on all T-Series fans. Allowing fast and trouble-free mains connection.

### Electrical

Suitable for operation in ambient temperatures from -40°C to +50°C.

Fitted with self resetting Standard Thermal Overload Protection (S.T.O.P).

Supply voltage: 220-240V/1/50Hz.

### Easy Cleaning

Integrated component design allows all parts to be dismantled for cleaning without the use of specialist tools.

# Traditional T-Series® Roof Models

## Features & Benefits

- Extract/intake model in 4 sizes: 6", 7", 9" and 12"
- Patented electronic shutter system ensures quiet, trouble free operation
- For the very best from your fan use the Ecotronic controller
- T-Series controllers and sensors save energy by only switching on the units when you want them to, either manually or automatically
- Easy fit connector Top Socket, standard on all models

## UK's No. 1 Commercial Fan

With a low profile cowl, the T-Series Roof model is suitable for installation in horizontal, angled and vertical glass and for fixing plates in roofs. For vertical windows or walls in exposed areas and single or double glazing including most types of glass up to 32mm thick. Greater thicknesses can be accommodated using extended fixing rod sets. All four sizes of Vent-Axia roof plate assemblies can be fitted easily into flat roofs.

T-Series features a unique speed control pack which enables high, medium or low speed to be preset to suit room size or required duty. When used with a T-Series TSC controller, the speed control pack is removed from the T-Series ventilating unit and fitted into the 3-pin socket in the back of the controller. The Vent-Axia Ecotronic controller gives even greater running economy with its minimum speed setting and 'E' mode. When using the Ecotronic controller the speed control pack remains in the fan.

## Shutter

With energy saving in mind, TX models are supplied complete with an integral instantaneous automatic louvre shutter concealed behind the interior grille. It will operate on both intake and extract and at any angle of mounting.

When the ventilating unit is used with a T-Series controller, the shutter can be set open with the fan motor switched off to provide natural ventilation without the security risk of an open window.

## Electrical

# Traditional T-Series® Darkroom Models

## Features & Benefits

- Extract/intake models in 4 sizes: 6", 7", 9" and 12"
- Specially designed to provide extract/intake ventilation in darkrooms, X-ray areas, etc
- Patented electronic shutter system ensures quiet, trouble free operation
- For the very best from your fan use the Ecotronic controller
- Integrated component design allows all parts to be dismantled for cleaning without the use of specialist tools
- Easy fit connector Top Socket, standard on all models

## UK's No. 1 Commercial Fan

A range designed for photographic, medical, dental and veterinarian applications - used also for opticians and other specialist applications. Most darkrooms need a minimum of ten air changes per hour for comfort and efficiency. For rooms containing heat producing equipment (eg: print glazers) a higher rate of air change may be desirable.

The Darkroom model has two cowls, the interior cowl being designed to give light protection. It can be installed in windows, partitions, external walls or roofs. Extended fixing rods for fixing thicknesses up to 370mm are supplied with the unit. Provision should be made for adequate air replacement through Vent-Axia non-vision grilles.

## Performance

# Traditional T-Series® In-Line Models

### Features & Benefits

- Extract/intake model in 3 sizes: 6", 9" and 12"
- Patented instantaneous electronic shutter system ensures quiet, trouble free operation
- For the best from your fan use the Ecotronic controller
- T-Series controllers and sensor save energy by only switching on the units when you want them to, either manually or automatically
- Easy fit connector Top Socket, standard on all models

### UK's No. 1 Commercial Fan

No other range of high performance in-line duct fan offers a combination of 3 impeller diameters, reversibility, low sound level, speed control and built-in electric shutter. T-Series features a unique speed control pack which enables high, medium or low speed to be preset to suit room size or required duty. Designed for use with rigid or flexible ducting, T-Series In-Line models can be plate mounted or fixed through partitions and in ceiling voids.

T-Series controllers may be used with this model to obtain a choice of speeds, extract/intake airflow direction and automatic sensor operation. The Vent-Axia Ecotronic controller gives even greater running economy with its minimum speed setting and 'E' mode.

### Performance

Model	Extract performance m <sup>3</sup> /h (l/s)			Watts (high)	Sound dB(A) (med) @ 3m	Amps @ 240V
	low	medium	high			
TX6IL	318 (88)	398 (110)	444 (123)	30	45	0.24
TX9IL	703 (195)	966 (268)	1050 (292)	85	47	0.42
TX12IL	1674 (465)	2000 (556)	2230 (620)	100	51	0.51

### Top Socket

A connector Top Socket is now standard on all T-Series fans. Allowing fast and trouble-free mains connection.

### Shutter

The shutter is electronically controlled by an actuator with a damped action giving quiet operation during instant opening and closing. The interlocking edges of the shutter blades provide maximum back draught protection.

When the ventilating unit is used with a T-Series controller, the shutter can be set open with the fan motor switched off to provide natural ventilation without the security risk of an open window.

### Arrangements

Where ducts pass through an unheated roof void, the duct should be insulated. Horizontal ducts should fall away from the fan unit. In circumstances where an excessive amount of moisture is present, a condensation trap should be installed in the exhaust duct. The fan unit should be accessible for regular maintenance.

### Electrical

Suitable for operation in ambient temperatures from -40°C to +50°C.

Fitted with Standard Thermal Overload Protection (S.T.O.P.).

Supply voltage 220-240V/1/50 Hz.

# Super T-Series®

## Powerful Heavy Duty Wall Fans

### Features & Benefits

- 4 impeller diameters 355, 400, 450, 500mm
- Complete with telescopic wall sleeve and shutter, ready for installation
- IP54 motor and terminal box
- Smart internal grille and external shutter with flange trim
- Super quiet operation
- For the very best performance from your fan, use the Vent-Axia 25 Amp electronic controller

### Powerful Ventilation

Vent-Axia's Super T-Series 355, 400, 450 and 500mm fans provide efficient, quiet powerful ventilation with performances up to 4940m<sup>3</sup>/h. Tough heavy duty internal grilles and external weather shutters ensure longevity, performance and peace of mind.

### Construction

The axial fan at the heart of the Super T range is based on an integrated impeller and internal rotor motor design which produces a very compact unit. A specially designed bellmouth inlet and mounting plate ensures an excellent performance to sound level ratio.

### Electrical

Single phase 220-240V 50Hz. Capacitor start and run. An IP54 terminal box is supplied with all models with conduit entry from the side of the wall liner. All motors are fitted with Standard Thermal Overload Protection (S.T.O.P.), which should be wired via the controller.

# Traditional Standard Range®

## Window Models

### Features & Benefits

- Extract / intake model in 4 sizes: 6", 7", 9" and 12"
- IPX4 Rated
- Colour: White
- Manufactured in weather-resistant polymeric materials
- For the best performance from your fan, use an Ecotronic controller
- Suitable for glass or panels up to 10mm thick

### Classic Retro-Style Ventilation

This ever popular range of extract/intake ventilating units continues to satisfy the most demanding requirements for efficient ventilation. The Vent-Axia Standard Range unit is supplied without a shutter. The shutter is available as an accessory, which can be easily fitted within the unit.

Standard Range Window fans are suitable for most forms of single glazing or can be wall mounted in a Vent-Axia fixing plate. Vent-Axia's patented spigot and ring method of fixing ensures easy installation and weather proof joint. The simple integrated component design makes installation and servicing easy.

### Performance

Model	Extract Performance m <sup>3</sup> /h (l/s) F.I.D.	Watts MAX.	Sound dB(A) @ 3m	Amps @ 240V

S9WW	710 (197)	53	39	0.24
S12WW	1560 (433)	84	42	0.36

### Motor

Purpose designed enclosed motor. Suitable for running at any angle. Quiet running, enclosed.

Supply voltage 220-240V/1/50 Hz. Suitable for operation in ambient temperatures from -40° to +50°C. Fitted with Standard Thermal Overload Protection (S.T.O.P.).

### Shutter Type SD/R

This extract/intake shutter fits inside the Vent-Axia unit and closes against unwanted back draughts. It can be fitted at the same time as the unit or at a later date if required.

Airflow operated for extract use, cord operated lock for intake use. For all models mounted in vertical surfaces only.

### Controller

The Ecotronic controller is recommended for use with this model to provide full function control of the fan plus the option of sensor mode using a selection of electro-mechanical switches to provide automatic switching of the fan.

Alternatively, single speed extract is achieved using a normal On/Off switch.

### Easy Cleaning

Integrated component design allows all parts to be dismantled for cleaning without the use of specialist tools.

### Protective Grilles

Where Standard Range units are installed in low positions, finger guards provide extra protection to VDE, DIN 31001.

## Features & Benefits

- Extract model in 4 sizes: 6", 7", 9" and 12"
- IPX4 Rated
- Colour: White
- Wide range of sensors available
- Manufactured in weather-resistant polymeric materials
- For the best performance from your fan, use an Ecotronic controller

## Classic Retro-Styled Ventilation

A versatile and robust range of roof extract ventilating units designed to satisfy the requirements of efficient ventilation in commercial and industrial applications. The simple, proven design of Standard Range makes installation and routine cleaning easy.

Featuring a low profile cowl, the unit is ready for fitting into horizontal, angled and vertical glass, fixing plates on roofs and in vertical windows or walls in exposed areas. With Vent-Axia roof plate assemblies, all four sizes can be fitted easily into flat roofs. Suitable for roof installation plus window and wall installation in exposed areas (eg: coastal positions). Vent-Axia's spigot and ring method of fixing ensures easy installation and weather proof joint. We recommend the use of sealing compound under the upper part of the unit when fitted in roofs.

## Motor

Purpose designed enclosed motor. Suitable for running at any angle. Quiet running, continuous rated motor with sealed for life ball bearings.

Suitable for operation in ambient temperatures from -40°C to +50°C. Fitted with Standard Thermal Overload Protection (S.T.O.P.).

Supply voltage 220-240V/1/50Hz.

All Standard Range roof models are designed to fit directly into horizontal and sloping windows including wired cast, up to 10mm thick.

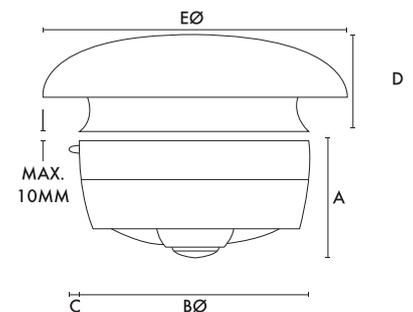

In solid roofs, install using a roof plate assembly and, if required, and eggcrate grille in the ceiling below. A suitable sealing compound should be used between the glass/roof plate and the exterior seal.

## Wall Models

### Features & Benefits

- Extract/intake models in 4 sizes: 6", 7", 9" and 12"
- IPX4 Rated
- White fascia, wall sleeve and black external weather louvre
- Optional shutter available
- Manufactured in weather-resistant polymeric materials
- For the best performance from your fan, use an Ecotronic controller

### Classic Retro-Styled Ventilation

The proven Standard Range Wall models are designed to fit flush into most double brick walls using the rigid wall liner supplied with the unit. Provision is made within the liner for conduit entry. When installed, only the ivory fascia is visible on the internal wall face. The external weather louvre fits flush to the outside. A shutter is available as an accessory which can be easily fitted within the unit.

On new building work the installation and wiring of the wall liner can be completed prior to the final installation of the unit and controller. Fully shrouded connectors on the fascia automatically connect the wiring to the motor when fitted to the wall liner.

# Hygiene

## New Ergonomic JetDry3 Hand Dryer

The innovative new hand dryer JetDry3®, features the latest drying technology. The patented ergonomic hand dryer boasts a unique ceramic plate that absorbs water then evaporates it, as well as an impressive 10-second dry time.

A cost effective alternative to conventional hand dryers and paper towels, the ergonomic Jet Dry3® has been designed to allow users to dry their hands in a more comfortable way – horizontally, just like they wash them. At the same time users will be able to watch while the water disappears from their hands into the unique ceramic plate.

## Anti-bacterial Properties

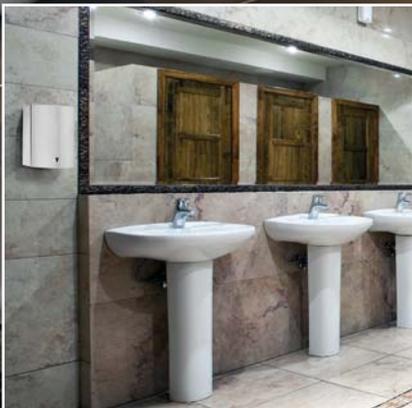

The JetDry3® also cleans up when it comes to hygiene. The combination of a built-in NSF certified anti-bacterial protection on its surface as well as a HEPA filter, eliminates over 99% of any present bacteria. By hygienically drying hands the JetDry3® will help to protect users against winter colds and flu.

## Maintenance

The fast-speed hand dryer is easy to maintain and service. The absorbent ceramic plate has the capacity to take a continuous full load approximately 280 times – that's with no break in use! The ceramic plate evaporates water meaning the drip tray will need emptying less often. During normal use, water will be evaporated continuously and the ceramic plate will keep absorbing the excess water. Maintenance simply requires clearing its surface and replacement of the HEPA filter.

## Handdryers

### Ultradry® SX

Automatic 'no-touch', vandal resistant hand and face dryer for offices, shops, restaurants, pubs, clubs and hospitals. Fast drying feature.

- Cover: LM24 pressure die cast aluminium
- Finish: epoxy/polyester powder coating
- Motor: 5,500rpm, suppressed brushed motor
- Insulation Earthed Class 1
- 264 x 275 x 177mm (H x W x D)
- Weight: 6.0kg (6.6kg packed)
- Sound level: 79 dB(A) at 1m
- Rated at: 2.4kW at 230V
- BEAB Approved
- **IP24** Rated

Stock Ref  
**20101800SX**

### Powerdry® SX

Push button operated hand and face dryer for heavy duty applications in public lavatories, factories, railway stations and schools, etc. Fast drying feature.

- Cover: LM24 pressure die cast aluminium
- Finish: epoxy/polyester powder coating
- Motor: 5,500rpm, suppressed brushed motor
- Insulation: Earthed, Class 1
- 264 x 275 x 177mm (H x W x D)
- Weight: 6.0kg (6.6kg packed)
- Sound level: 79 dB(A) at 1m
- Rated at: 2.4kW at 230V
- BEAB Approved
- Supply voltage: 220-240V/1/50-60Hz
- **IP24** Rated

Stock Ref  
**20101600SX**

### Dryline +

Automatic 'no-touch' operation compact hand dryer. Suitable for smaller office washrooms, kitchens and clinics.

- Cover: ABS. Motor: 2450rpm shaded pole induction
- Double insulated appliance
- BEAB approved
- 280 x 275 x 143mm (H x W x D)
- Weight: 2.97kg (3.3kg packed)
- Sound level: 46 dB(A) at 3m
- Rated at: 1.7kW at 230V
- Supply voltage: 220-240V/1/50Hz
- **IP21** Rated

Stock Ref  
**453915**

### Ultradry® SX Stainless Steel

Automatic 'no-touch' hand dryer specially designed for high performance hand drying in food preparation areas and hospital applications and eminently suitable for prestige installations. Fast drying feature.

- Cover: Satin polished stainless steel
- 264 x 275 x 177mm (H x W x D)
- Weight: 6.0kg (6.6kg packed)
- Sound level: 79 dB(A) at 1m
- Rated at: 2.4kW at 230V
- BEAB Approved
- **IP24** Rated

Stock Ref  
**20101840SX**

### Prepdry-Stainless Steel

Designed for food preparation areas and hospital applications where the highest levels of hygiene have to be observed. Automatic 'no-touch' hand dryer.

- Cover: Satin polished stainless steel
- Motor: External Rotor Brushless Motor 2700 rpm
- Insulation Earthed Class 1
- 280 x 270 x 148mm (H x W x D)
- Weight: 4.0kg (4.5kg packed)
- Sound level: 65 dB(A) at 1m
- Rated at: 2.0 kW at 240V
- Supply voltage: 220-240V/1/50Hz
- BEAB Approved
- **IP24** Rated

Stock Ref  
**20101440**

### Professional E®

Automatic 'no-touch' hand dryer for smaller office washrooms, kitchens and clinics.

- Cover and base: high gloss, fire retardant ABS/polycarbonate alloy
- Motor: 2700rpm external rotor, brushless motor
- Double insulated appliance
- 262 x 261 x 141mm (H x W x D)
- Weight: 3.09kg (3.52kg packed)
- Sound level: 65 dB(A) at 1m
- Rated at: 2.0 kW at 240V
- BEAB Approved
- Supply voltage: 220-240V/1/50Hz
- **IP24** Rated

## De-Stratification Unit

### Features & Benefits

- Available in two sizes
- Speed controllable
- High velocity fans
- Supplied with a grey coated finish - other colours available to special order
- Available with built-in thermostat

### Air Movement Fans

The Vent-Axia Jupiter range of de-stratification units is based on direct drive axial fans, housed in a neat and sturdy casing complete with eyebolts for suspension from chains or steel wires. Ideal for applications where the proposed mounting height requires higher velocity fans or where open bladed ceiling fans are considered unsuitable. Jupiter fans can be used in stores, warehouses, factories, workshops, as well as many other industrial applications. The unit provides effective and positive air movement to improve the working environment, particularly during summer months. In addition Jupiter fans can be used during the winter to re-circulate hot air from ceilings and roofs down to living and working areas.

### Electrical

Supply voltage 220-240V/1/50Hz. Direct drive axials with speed controllable motors. The motor hub and impeller are statically and dynamically balanced for smooth operation and optimum performance. Class F insulation, suitable for operating in atmospheres of up to 95% RH and ambient temperature of up to +60°C.

### General Installation

For cooling effect circulation of air is required in any given area. As a guide, mount Jupiter fans 4.5-6m apart, in tropical climates 3m apart. Fans should be mounted so that they do not interfere with lighting installations in any way. Mount fans away from walls or pillars where possible to avoid obstruction of airflow.

### Heat Saving

Heat savings are largely dependent on the difference between the roof level and the working level temperatures, the ventilation rate and the geographical position.

# Vent-Axia Hi-Line Plus® Ceiling Sweep Fans

### Features & Benefits

- Suitable for winter De-stratification applications or summer cooling
- Three sweep diameters: 900mm, 1200mm, and 1400mm
- Two down rod lengths included
- Easy to install
- Quiet running
- Can be installed for either upward or downward airflow
- Reversible electronic controller available

### De-stratification Fans

Hi-Line Plus ceiling fans can be used in offices, stores, shops, foyers, schools, hospitals, kitchens, restaurants and many industrial applications such as warehouses, factories, tanneries, and workshops. Hi-Line Plus fans will provide effective and positive air movement to improve the working environment particularly during Summer months. In addition, Hi-Line Plus fans can be used during the Winter to re-circulate hot air from ceilings and roofs down to living and working areas thus helping to conserve energy.

An infinitely variable speed controller is available for use with one or a combination of models up to 5 units. Alternatively, Hi-Line Plus fans may be wired directly to a normal On/Off switch. For maximum benefit, good ventilation is vital, we advise that Hi-Line Plus fans are used in conjunction with Vent-Axia T-Series or Standard Range ventilation units.

Hi-Line Plus blades are produced from sheet steel and individually weighed to produce matched sets.

### Motor

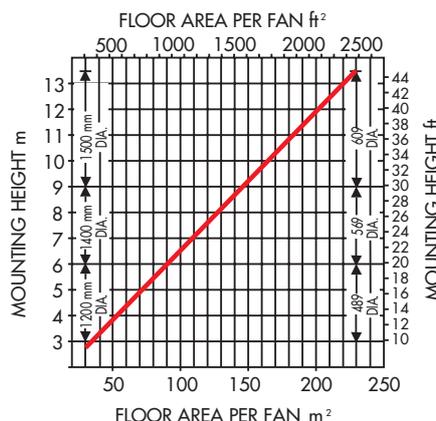

The motor is totally enclosed, capacitor start and run. Suitable for temperatures up to +40°C. Supply Voltage 220-240V/1/50Hz.

### Fan Selection

For energy conservation fan selection is dependent upon area and mounting height. Estimate the height at which the fan can be mounted and then calculate the relevant fan size from the table below. Move to meet the diagonal line and then read down to find out how much floor area per fan is suitable.

### Down Rods

The Hi-Line Plus fans include both a long and short down rod packaged as standard. The total drop length of the short down rod including motor is 360mm. The total drop length of the long down rod including motor is 610mm.

### Models

Model	Stock Ref
HL 90	428049
HL 120	428050
HL 140	428051

### Ceiling Fan Controller

#### SAC5 Reversible Controller

The Vent-Axia ceiling fan controller adds extra flexibility to all Hi-Line Plus installations. Fan speeds can be selected to suit varying conditions. This is of particular benefit where mounting height is low. The controller is designed to be used with a single fan or up to 5 Hi-Line fans.

The controller is infinitely variable, has solid state components, an insulated spindle, white cover plate and can be flush or surface mounted. Suitable for commercial environments.

Hi-Line Plus fans should be used only with a Vent-Axia ceiling fan controller or an On/Off switch.

Supply Voltage 220-240V/1/50Hz.

#### Stock Ref

428238

For completely silent running we recommend the use of a 5 step transformer. Suitable for up to 9 ceiling sweep fans.

#### Stock Ref

# Portable Air Conditioner

### Features & Benefits

- Environmentally friendly, R410A refrigerant
- Does not require specialist installation
- Built-in 24 hour timer
- Effective cooling for homes and offices
- Double insulated cable with moulded UK plug

### Compact Cooling

Portable Air Conditioning units from Vent-Axia provide mobile comfort air-conditioning, dehumidifying or heating anywhere, anytime. Simply plug in and switch On. Perfect for domestic and light commercial use such as offices, shops and reception areas where permanently installed air conditioning systems may be too inflexible and expensive.

### Model

#### 3 in 1 Portable Air Conditioner

The 3 in 1 unit is a floor standing portable air conditioner, which is self contained. Does not require a separate outdoor unit or specialist installation.

- 3 in 1 - choose from cooling, dehumidifying and fan only options
- 16°C-30°C temperature setting
- 24 hour timer
- Micro-processor control
- R410A CFC free refrigerant
- 12,000 btu/h cooling
- Double insulated cable with moulded UK plug

**Stock Ref**  
**448919**

### Specifications

Model	3 in 1
Cooling capacity kW (btu/hr)	3.46 (12,000)
Dehumidification - litres/hr	0.95
Condensate disposal	Tank or Hose
Power Input - Watts	1340

# Electric Heating

**Vent-Axia heating is ideal for residential or commercial applications. So whether it's a bedroom or hallway, office or shop, we can provide the solution.**

The simplicity of installing electric heating, particularly in high rise apartments means it is the natural choice for your project.

Comfort Heating products with innovative charge and zone control features can provide energy savings for the occupier and property owner, without compromising comfort in the home. This, coupled with low capital outlay ensures that Vent-Axia are able to offer a cost effective heating solution for both parties.

## **New Generation Heating from Vent-Axia**

With a slim, stylish design our Opal Aluminium Radiator range offers households attractive, energy efficient comfort. Featuring an advanced digitally controlled thermostat, the Opal range gives you one of the most cost effective and energy efficient electric heating systems available.

Heating Range

# Underfloor Heating

## Bluethermal™ Mat Thin twin conductor heating mat

### Renovating with Heating Mats

Minimum floor thickness can be important in renovation processes in order to avoid extra work on doors and thresholds. For these projects our Bluethermal™ Mat range is the ideal product. The heating mat consists of a thin twin conductor heating cable attached to an adhesive flexible glass fibre net. The thin heating cable has a total thickness of only 4mm, is delivered with a 2.5m cold lead and has a width of 0.5m.

The 100W/m<sup>2</sup> mat can be installed on any type of levelled and stable sub floor, and can also be used under parquet or other wooden floor coverings. The 150W/m<sup>2</sup> must be installed on a non-combustible levelled and stable sub floor. With all our products we recommend the use of a thermostat with a temperature limiting function such as our Bluethermal™ Thermostatic Controller.

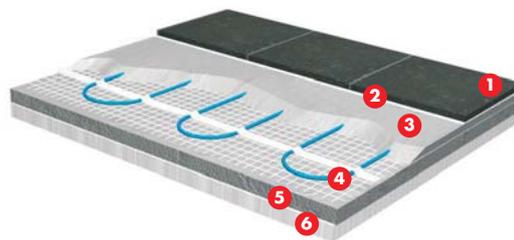

### Construction:

- Solid resistance wires
- FEP insulation
- Solid copper earth wire
- Fibre-glass net
- PVC outer jacket
- Aluminium sheath
- Total thickness is 4mm
- Width 0.5m (19.7")

### Technical data:

- Area load 100 or 150W/m<sup>2</sup> (9.3 or 14.0W/sq.ft.)
- Loads from 100W to 180W
- Max. continuously operating temperature outer jacket: 65°C
- Tolerance on conductor resistance: -5 / + 10 %
- Rated voltage: 230V

### Installation Detail

- 1 Tiles/floor covering
- 2 Tile adhesive
- 3 Thin screed/slab
- 4 Bluethermal™ Mat
- 5 Insulation
- 6 Non combustible sub floor

\*HS = hidden splice.

The products are delivered with a 2.5m cold lead

### Bluethermal™ Cable

#### Twin conductor cable for direct heating

#### Renovation with heating cables

When renovating with our Bluethermal™ Cable range, apply the cable to a non-combustible subfloor (minimum thickness 5mm) and take into consideration the placement of permanent installations such as showers, baths, toilets, cupboards etc. Place the end seal away from potentially wet areas of the floor. See picture illustrating the placement of a free laid heating cable. Note that the cable is not crossing or touching itself, this is to provide the best possible heat conductivity to the surroundings of the cable.

The heating cable is embedded in a screed/concrete with low overall construction height. After drying and hardening, the moisture barrier/membrane can be put on top of the screed/concrete before the floor covering is installed.

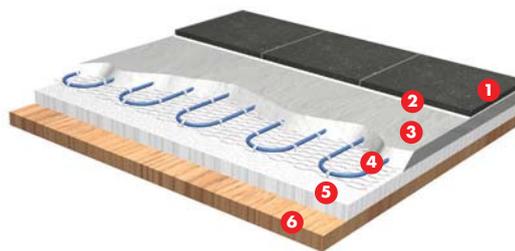

#### Construction:

- Solid resistance wire
- XLPE insulation
- Tinned copper drain wire
- Aluminium screen
- PVC outer jacket
- Overall diameter: approx 7mm (0.3")
- Width 40 and 80cm

#### Technical data:

- Series resistance, element values from 300 to 3300W
- Linear load: 17W/m (5.2W/ft)
- UV resistant
- Max. cont. operating temperature outer jacket: 65°C (149°F)
- Min. bending radius: 5 x cable diameter
- Tolerance on conductor resistance: -5 / + 10 %
- Highest system voltage: 300/500V
- Rated voltage: 230V

#### Installation Detail

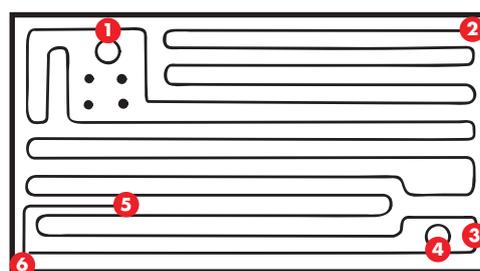

- 1 Ceramic tiles
- 2 Tile adhesive
- 3 40-60mm screed
- 4 Bluethermal™ Cable
- 5 Min 10mm solid subfloor.
- 6 Lower floor over well insulated wooden beams

#### Performance Guide

Stock Ref	Model	Load @ 230V (W)	Element length (m)	Element length (ft)	Element Nom Resistance	Outer diameter (mm)
446201	VAUFHC	300	17.6	58	176.30	7.0
446202	VAUFHC	400	23.5	77	132.30	7.0
446203	VAUFHC	500	29.3	96	105.80	7.0
446204	VAUFHC	600	35.2	115	88.20	7.0

446213	VAUFHC	3300	194.0	615	16.00	7.0

#### Installation Example

- 1 Cable laid behind the toilet to dry up condensation
- 2 End seal preferably placed in a dry zone of the floor
- 3 Put some distance between drain and cable to avoid excessive dryness of gully and odour problems
- 4 Drain/gully
- 5 Floor sensor
- 6 Transition between heating cable and cold end attachment

# Accessories

## Bluethermal™ Thermostatic Controller

### Applications

Precise and accurate temperature control is important to fully achieve the advantages of under floor heating, without using more electric energy than necessary. Heating cables in combination with an accurate thermostat is one of the most energy efficient heating systems one can have in a modern building.

The use of heating cables in combination with an accurate thermostat can provide an energy efficient and comfortable floor heating solution for most modern buildings.

### Features

- Large screen with blue backlighting
- 4-event programme or constant temperature control
- Clock: 12 hours (am/pm) / 24 hours
- Day display: Monday - Sunday
- Celsius or Fahrenheit display selection
- Frost protection setting
- 5 to 40°C working range (default)

### Specifications

- Accuracy: +0.5°C / 1°F
- Maximum load: 16A
- Power supply: 230V
- Dimensions: 86 x 86 x 13mm (WxHxD)
- IP21 rated

**Model**                      **Stock Ref**

### Bluethermal™ Insulation Boards

#### Applications

Our insulation boards limit the downward heat loss within the system directing the heat to where you need it.

Vent-Axia underfloor heating insulation boards are recommended for use with our products to increase the efficiency and minimise the warm up time of the system, saving both energy and money. They are available from 6mm to 70mm thick in packs as in the table.

#### Fixing to Wooden Floors

By Adhesive - The boards must be laid onto a level floor, with a suitable flexible rapid set cementitious tile adhesive - solvent based or ready mixed adhesives MUST NOT be used.

By Mechanical Fixing - The boards (other than 6mm boards) can be installed with mechanical fixings only to flat and level timber floors using approximately 12 fixings per 1200mm x 600mm board, with suitable screws and a 35mm fixing washer under the head. Fixing kits are available as detailed in the table below.

#### Fixing to Concrete Floors

A suitable flexible rapid set cementitious tile adhesive should be used - solvent based adhesives or ready mixed adhesives MUST NOT be used.

# Heated Towel Rails

## Features & Benefits

- IP55 rated
- Wall fixings included
- Plug and vent included
- Five year leakage warranty
- One year manufacturer's guarantee
- Heating element included
- Stylish designs
- One year surface and element warranty
- Steel construction with high quality white and chrome finishes
- Production is carried out using latest technology resulting in absolute consistency in quality
- Complete fitting set supplied
- Pressure tested to 13 bar
- Comprehensive step by step fitting instructions

Vent-Axia Heated Towel Rails quickly warm and dry towels. Their presence on the wall also adds to the overall style, temperature and comfort of the room.

This comprehensive range of white and chrome towel rails offers 10 different models across the flat, curved and designer ranges. The range offers sizes from 500 x 600mm to 500 x 1500mm available in four heat outputs of 100, 150, 250 and 400W matched to the size of the rail.

The range is complemented by an advanced controller available in white and chrome giving you control of five heat outputs. The controller also offers an eco mode ideal for use when drying your towels to ensure minimal energy use. This feature turns on the rail on full power for 30 minutes then reduces the output to the user setting for a further 90 minutes before turning the towel rail off.

## Controller

- IPX4 rated
- White or chrome finish
- Five power settings
- Eco timed function
- Two year warranty

# Radiant Heaters

## Features and Benefits

- Economical and easy to install
- Silent in operation
- No yearly maintenance cost
- Shortwave IR halogen lamp
- One second heat up time
- Precision heating directed where you need it
- Up to 5000 hours element life span
- IP65 rated (VARO model)

## Profile

Our radiant heating product range gives the flexibility to deal with large and small unheated spaces which would be uneconomical to heat using traditional space heating.

Area such as bars, restaurants, terraces, delivery areas, warehouses and churches, are some examples where our radiant heating products can provide an economical heating solution.

## Radiant heat and its advantages

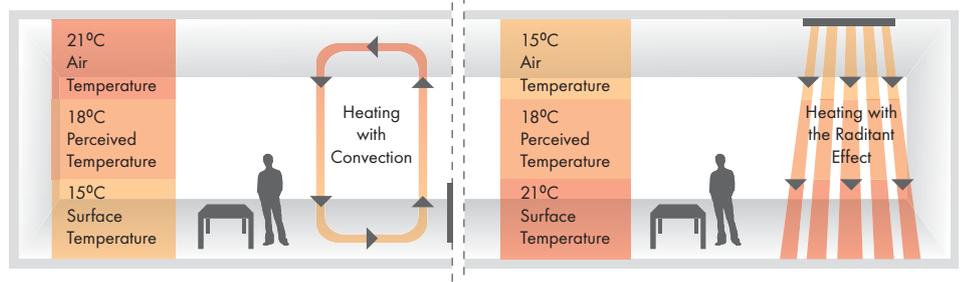

The heat we feel from the sun is called radiant heat and is part of the electromagnetic spectrum called infrared. Ultra violet and visible light also belong to the same family.

Visible light is the easiest part of this spectrum to understand, light travels in a straight line from the source is unaffected by air movement and is invisible until it hits a surface. Shadows are a good example of this and display the absence of light.

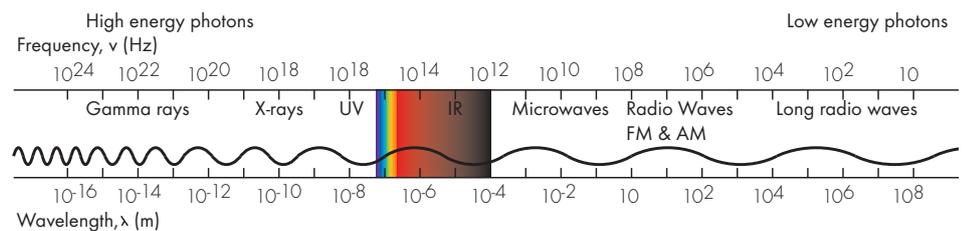

Infrared rays behave in the same way, we cannot see them but we can feel them as warmth. A good example of this is the effect created when you move from the shade into the sun, although the temperature is the same the perceived temperature when in direct sunlight is much higher. This phenomenon makes sunbathing possible during winter holidays. There are three categories of Infrared, short wave (IR A), medium wave (IR B) and long wave (IR C), the shorter the wave length the easier it travels through the air.

The advantage of using short wave infrared heating is that the rays cut through the air and are not affected by air movement, therefore only transmitting heat energy when the infrared rays collide with a solid object.

## Convection Heating and Radiant Heating Comparison

## Wave Spectrum

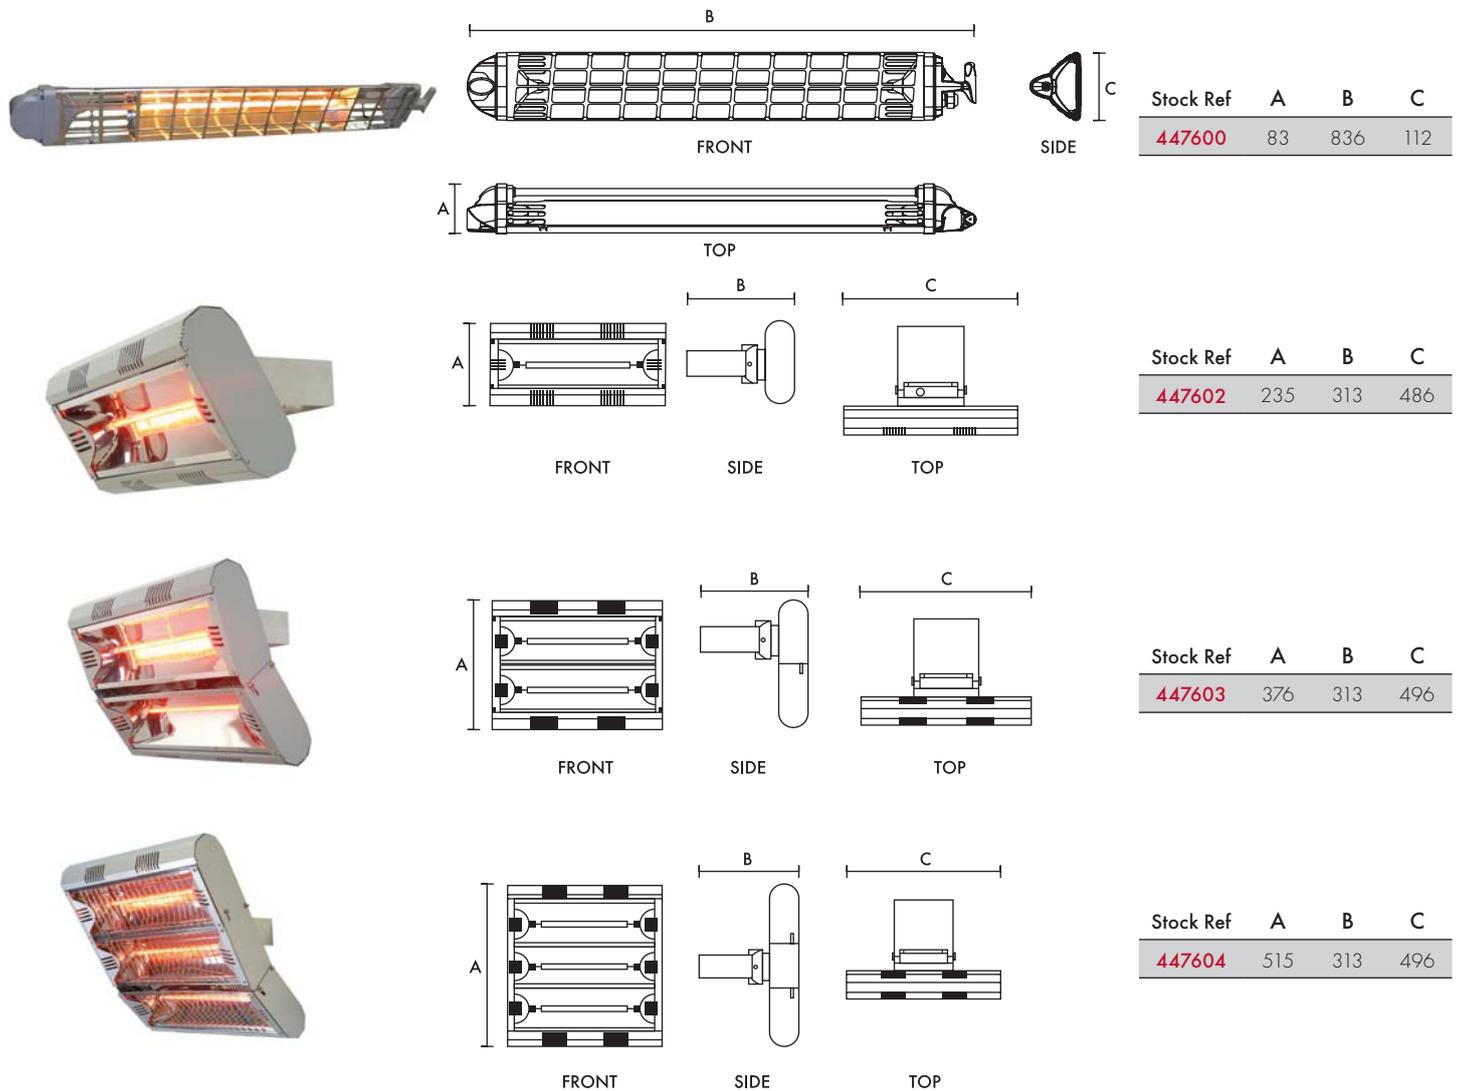

UV: Ultraviolet Radiation			VIS: Visible Radiation; Light					IR: Infrared Radiation					
UV-C 100-280nm	UV-B 280-315nm	UV-A 315-400nm	Violet	Blue	Blue/Green	Green	Yellow/Green	Yellow	Orange	Red	UV-A 800-1400nm	UV-B 1400nm - 3,0µm	UV-C 3,0µm - 1mm

## Wave Infrared Comparison

	Short Wave Infrared	Medium Wave Infrared	Long Wave Infrared
Typical Source	IR Halogen Lamp	Quartz Heat Source	Resistance
Materials	Tungsten Filament welded in a quartz tube	Filament in compound of Fe-Cr-Al in a quartz tube	Filament in compound of Fe-Cr-Al in a steel tube
Radiant efficiency	92%	60%	40%
Switch on/off times	1 second	30 second	5 minutes

# Opal

## Aluminium Radiators

### Features & Benefits

- Aluminium block with innovative curved elements
- Digitally controlled thermostat
- Dynamic fluid with high thermal inertia
- Temperature setting; Comfort, Economy, Anti-Freeze
- Seven pre-set lifestyle heating schedules, including two programmable options
- Outputs from 500W - 1500W
- Safety thermal regulator
- Ease of installation
- Safe, clean and easy to operate
- All radiators are powder coated externally in white (RAL 9016)
- No maintenance required
- These slim line radiators are 96mm deep
- All radiators are supplied with wall fixing brackets
- Each radiator is supplied with 1.6m length UK power cable

The Vent-Axia Opal range of Aluminium Radiators offers a slim stylish design with advanced digital thermostatic control giving you one of the most cost effective and energy efficient electric heating system you can have.

Popular with specifiers, contractors and home owners, the Opal range is ideal for new build and refurbishment.

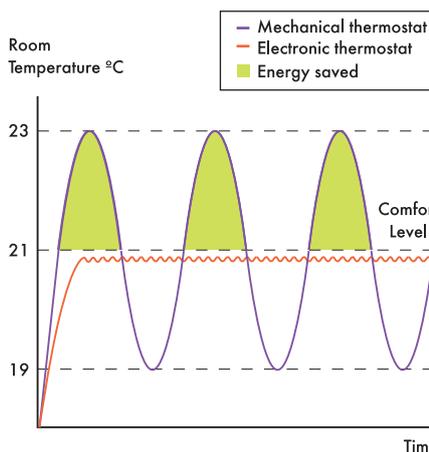

Available in five sizes, our range provides a solution for any size room with outputs from 500W - 1500W.

All of the Opal Aluminium Radiators controllers are fully programmable offering closer management of energy control with resultant costs savings. This can be measured with the on board energy monitor allowing you to see how much energy you are using to heat your room. All standard units come with all the features and controls you would expect to see on an advanced heating system.

### Energy Saving Electronic Control

Accurate, fast acting control is essential for reducing temperature overrun and minimising energy consumption.

The silent operating electronic thermostat is accurate to +/- 0.5 °C and acts quickly to maintain consistent temperature levels.

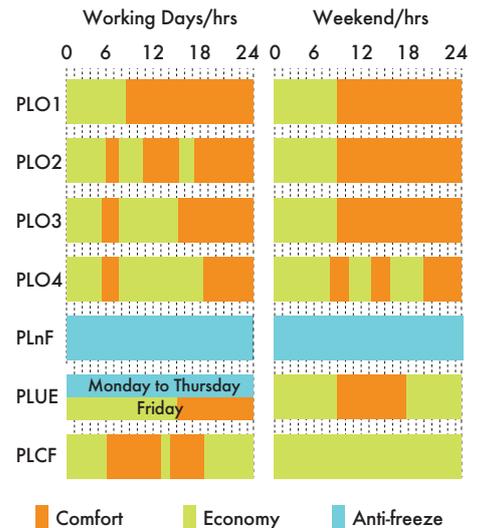

### Seven Pre-set Lifestyle Heat Schedules

The heater is pre-programmed with seven plans during its manufacture, with two of them being configurable to meet your own needs. The five invariable programmes are adapted to most heating situations. The seven plans are described in the table on the right.

Heating schedule PLnF is pre-programmed for when you are away from your home for a long period of time and would like to protect it against freezing. The green economy LED will flash.

Heating schedule PLUE is designed for weekends. With this plan the heater is pre-programmed to work from Monday to Thursday in the antifreeze position. From Friday through to Sunday you can configure the programme according to your own needs.

Should the pre-set schedules not meet your heating requirements, the PLCF heating plan enables you to create your own heating schedule.

# Optimax Plus®

## Panel Heater

### Features & Benefits

- Integral adjustable thermostat
- Optional integral timer model
- Frost protection setting of 5 °C
- BEAB approved
- Unique quick fix wall bracket
- Colour RAL 9001
- Ideal compliment to storage heaters
- Brackets for panel included

### Comfort Heating

Vent-Axia's Optimax Plus Panel Heaters are perfect for smaller rooms such as bedrooms, studies, conservatories and loft conversions.

Vent-Axia's Panel Heaters offer a wide range of heat outputs from 750W to 2000W and every model is available with or without a timer. Vent-Axia Panel Heaters look as good as they perform. Stylish and slim, they occupy minimal wall space and are finished in an attractive white finish.

Vent-Axia Panel Heaters are wall mounted and connected to the permanent electrical supply via a fused connection switched outlet. Vent-Axia Panel Heaters are supplied with mounting brackets and one metre of cable connected to the bottom right hand side of the unit.

### Adjustable Thermostat

All Vent-Axia Panel Heaters have a built-in adjustable thermostat offering a full temperature range, including a frost protection setting of 5 °C.

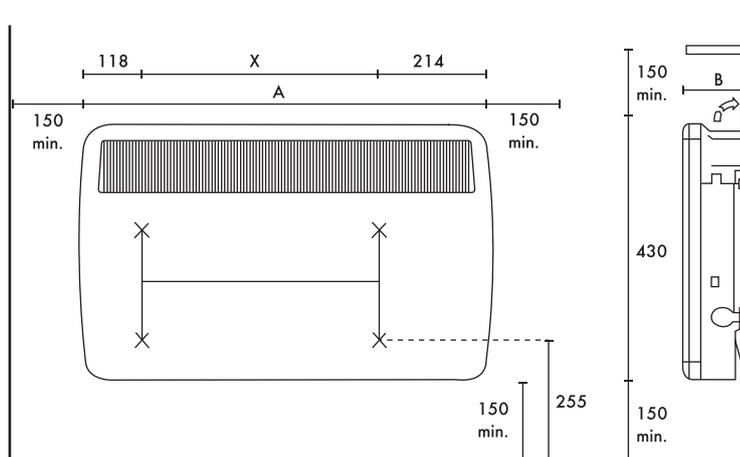

For maximum safety there is a thermal cut-out on all models to prevent overheating, should the outlet grille be accidentally covered.

### Models

## Combination Storage Heater

### Features & Benefits

- Optimised charge period offers 15% energy saving
- Reduced installation times
- Conveniently mounted controls
- Range of three heat outputs
- Colour RAL 9001
- IP20 rated
- BEAB approved

### Comfort Heating

Vent-Axia Combination Storage Heaters take advantage of low tariff night-time electricity in the same way as our domestic storage heaters.

Vent-Axia Combination Heaters combine the benefit of a domestic storage heater and a convector heater in one casing. The storage heater offers comfortable heat around the clock taking advantage of low tariff electricity.

The convector heater can be switched on at any time to offer additional heat when required, or used outside the normal heating season for instant heating.

Combination Heaters require a permanent power supply for immediate convection heating when required. The storage heater section has a separate off-peak supply.

Features such as snap-on feet, simple wall fixings and quick assembly mean that new installations or replacement of existing units are completed with minimum disruption. The cable entry is located at the back of the unit on the bottom right hand side.

Automatic models incorporate an ambient thermostat which optimises the charge to suit room conditions, typically saving an additional 15% in energy costs.

Vent-Axia Combination Heaters are slim, compact and aesthetically pleasing. Their attractive neutral finish blends in with a variety of decors.

The controls are conveniently positioned on top of the heater for ease of use. Once the optimum settings are selected, no further adjustment is necessary. A separate convector heater On/Off switch is situated on the side of the casing together with a thermostat for temperature control.

## Storage Heater

### Features & Benefits

- Perfect for offices and homes
- Optimised charge period offers 15% energy saving
- Reduced installation times
- Conveniently mounted controls
- Range of four heat outputs
- Colour RAL 9001
- IP20 rated
- BEAB approved

### Comfort Heating

Vent-Axia Storage Heaters are often an economic alternative for new build or in existing properties, particularly where no other fuel source is available.

Vent-Axia Storage Heaters are simple to install, economical to run and virtually maintenance free. Ideal for use in living rooms, hallways and landings.

The range can be installed in bathrooms outside Zone 2, provided that the installation complies with IEE regulations.

Vent-Axia Storage Heaters offer comfortable warmth around the clock taking advantage of low-tariff electricity.

### Ease of Installation

Simple to install wall fixings and quick assembly mean that new installations or replacement of existing units are completed with minimum disruption. The cable entry is located at the back of the unit on the bottom right hand side.

Manual models charge throughout the low-tariff period. Automatic models incorporate an ambient thermostat which optimises the charge to suit room conditions, typically saving an additional 15% in energy costs.

Vent-Axia Storage Heaters are slim, compact and aesthetically pleasing. Their attractive neutral finish blends in with furnishings.

The controls are conveniently positioned on top of the storage heater for ease of use. Once the optimum settings are selected, no further adjustment is necessary.

## Plinth Heaters

### Features & Benefits

- Ideal for where wall space is at a premium
- Fits neatly into plinths
- Finishes: W-White, B-Brown & S - Stainless Steel
- Optional thermostatic control
- 5-30 °C
- Can be used with remote switch VARSU 436494
- Two heat settings 1kW & 2kW

Vent-Axia Plinth Heaters are designed for use in kitchens and bedrooms. They fit neatly into most types of fitted furniture, fascias, display units and false walls.

When installed in a corner with an adjacent cupboard to the right, a distance of at least 150mm must be maintained between the right hand end of the heater and the front of the adjacent cupboard door.

Vent-Axia Plinth Heaters are supplied with 1.5m of 1.5mm<sup>2</sup> 3 core cable, terminating on the right hand side of the unit.

## Warm Air Curtains

### Features & Benefits

- Integral Switching for faster installation
- Three heat settings and fan only mode
- Models to suit single and double doorways
- Suitable for use as a high level fan heater

Vent-Axia Warmair Curtains provide a heated downflow of warm air in doorways of commercial premises such as shops, offices and schools.

The robust outer case is made from painted steel with an off white epoxy finish. Accommodating varying door widths is easily achieved by installing Warmair units 'Side by Side'.

Vent-Axia Warmair Curtains are supplied with 0.75m of 3 core cable, and mounting brackets.

Three Warmair models are available offering heat outputs & fan only :

Warmair 3 - 3 kW, 2 kW, 1 kW  
Warmair 4.5 - 4.5 kW, 3 kW, 1.5 kW  
Warmair 6 - 6kW, 4 kW, 2 kW

## Downflow Heater

### Features & Benefits

- Stylish compact design
- Two heat settings, 1kW and 2kW
- Pullcord operation
- Overheat protection
- Fan only option
- IP23 rated

The IP23 rated Downflow Heater operates via a pull cord and is suitable for use within Zone 2 of the bathroom. The Downflow Heater has two heat settings; 1kW/2kW plus a fan only option and is designed to be permanently wall mounted for use with an AC electrical supply.

Function	Indication

## Portable Heating

### Convector Heater

#### Features & Benefits

- Silent operation
- Ideal for use where occasional heating is required
- Three heat outputs
- Thermostatic control
- Safety thermal cutout
- BEAB Approval

The Vent-Axia Convector Heater is ideal for use in any domestic or commercial room where extra or occasional heating is required. The heater is suitable for use in the home, offices, shops and workshops, but is not recommended for use in bathrooms.

The unit offers three heat outputs; 0.75kW, 1.25kW and 2kW, and is supplied with a thermostatic control.

The Vent-Axia Convector Heater is lightweight, portable and is supplied with a cable and plug. Stylish and versatile, the heater may be wall mounted or installed as a floor standing unit using the feet included. This gives the benefit of moving the heater to an area where you want, when you want.

For maximum safety the heater includes a thermal cut-out feature to prevent overheating.

# Accessories & Controllers

## Sentinel Controller

For ventilation systems to be truly efficient it is important for them to operate only when needed. Our range of Sentinel demand ventilation systems along with our controls and sensors help respond to the exact ventilation requirements of a room at any one time. Providing airflow only when it is required and at the level that it is required ensures that only the energy that is needed is used; no more, no less.

Approved Document L now recognises the value that controls can offer and you will find Vent-Axia offer a range of solutions to ensure that you can maximise the benefit of automation wherever you chose to use it.

# Controllers & Sensors

## Ecotronic Controller Surface Mounting

An electronic controller for use with all T-Series and Standard Range models to give extract/intake and speed variation. Where a controller is used with T-Series, 5-core flexible cord is required.

- 'E' running position for optimum efficiency.
- Finger-tip sliders.
- Infinitely variable speed control.
- Double pole On/Off switching.
- Extract/intake airflow direction.
- Neon indicator.
- Sensor mode for use with suitable electromechanical switches, eg. ThermoSwitch, HumidiSwitch to give automatic fan operation.
- Adjustable minimum speed setting.
- Knockouts for recessed wiring.
- Ambient operating temperature range 0°C to +40°C.
- Dimensions: 86 x 156 x 53mm (H x W x D).
- Supply voltage 220-240V/1/50Hz.
- Maximum load: Ecotronic - 400 Watts.
- Designed to meet IP20.
- BEAB Approved.

**Stock Ref**  
**W362320**

## T-Series® Controller Surface Mounting

A single unit controller for use with all T-Series ventilating units. With knockouts for recessed wiring. Where a controller is used with T-Series, 5-core flexible cord is required.

- 3-speed operation. High, medium or low.
- Finger-tip sliders.
- Double pole On/Off switching.
- Extract/intake airflow direction.
- Sensor mode for use with suitable electromechanical switches, eg. ThermoSwitch, HumidiSwitch to give automatic fan operation.
- Unique shutter open, fan Off setting.
- Neon indicator on controller.
- Knockouts for recessed wiring.
- Ambient operating temperature range 0°C to +40°C.
- Dimensions: 86 x 156 x 53mm (H x W x D).
- Supply voltage 220-240V/1/50Hz.
- Designed to meet IP20.
- BEAB approved.

**Stock Ref**  
**W361119**

## TimeSpan® Controller

Adjustable timer with overrun facility for fans ventilating WCs and other small rooms.

For use with any Vent-Axia fan within maximum rating below. The fan is switched On with the light and keeps running for a pre-set period after the light is switched Off.

- Fits to any single gang box.
- Adjustable time delay 5-25 minutes from the back.
- Ambient operating temperature range 0°C to +40°C.
- Maximum load 250W inductive.
- BEAB Approved.
- Dimensions Controller only: 87 x 87 x 33mm (H x W x D).
- Supply voltage 220-240V/1/50Hz.

**Stock Ref**  
**563519**

**Surface Mounting Box**  
A surface mounting back box is available.  
**Stock Ref**  
**410020**

Registered design numbers: 1 030 207 Surface Mounting Controller, 1 030 208 Flush Fitting Controller. Patented Remote Speed Control Circuit. European Patent number EP 0180311.

Manufacturers of some fluorescent/low energy lighting systems indicate that these can interfere with other electronic/timing circuits. For reliable operation of these circuits we recommend therefore that a tungsten filament light is used.

### Air Quality Sensor

Automatically reacts to the depletion of air quality, sensing unpleasant smells and toilet odours to regulate mechanically ventilated areas such as cinemas, pubs, clubs, restaurants, kitchens, toilets and conference rooms. This is not a CO<sub>2</sub> sensor.

The sensor switches the fan On when the air quality declines below an adjustable preset level. This is registered by the ceramic sensing head which is self-cleaning, a process which occurs every time the unit is triggered. When the atmosphere has returned to normal, the fan will continue to run for a pre-set period (adjustable between 1-25 minutes) and then switch Off.

The air quality sensor should not be used for the detection of combustible gases and is not designed for use as a smoke detector in an alarm system.

For use with various Vent-Axia fans within maximum rating below.

The AQS is also able to switch between trickle and boost speed on the appropriate ventilation units.

- Ambient operating temperature range 0°C to +50°C.
- Dimensions: 87 x 157 x 47mm (H x W x D).
- Maximum switched load: 2A inductive at 240V.
- Sensor consumption: 25mA at 240V.
- Supply voltage 240V/1/50Hz.

**Stock Ref**  
**563506**

### Electronic 1.5A Controller

Surface mounting. It will provide infinitely variable speed control and features an On/Off/sensor slider with neon indicator. There is an adjustable minimum speed setting. The controller is radio suppressed to BS EN 55014 and electrical connections for use with suitable external sensors are provided.

86 x 156 x 53mm (H x W x D). For flush fitting a metal wall box accessory is available.

Hole for wall box:  
80x150x150mm (H x W x D).

# Controllers & Sensors

## Ambient Response Humidity Sensor

The latest self programming electronic On/Off wall mounted humidity sensor which reacts to any rapid increase in humidity and temperature by switching a Vent-Axia fan 'On' for rapid removal of moisture laden air in domestic bathrooms and kitchens. Can be wired into controller 'Auto' mode connections. Night time RH increment setback feature suppresses nuisance tripping when the humidity level gradually rises as the temperature falls.

- Pullcord override and neon indicator.
- Changeover relay switch.
- Operating range: 30%-90%RH.
- Ambient operating temperature +5°C to +40°C.
- Dimensions Controller only: 87 x 87 x 33mm (H x W x D).
- Will fit single gang box for surface mounting.

**Stock Ref**  
**563550** 240VAC 50Hz

European Patent No: 2298057

## Ambient Response SELV 12 Humidity Sensor

12V Safety Extra Low Voltage version for use with VA100 SELV, Solo SELV, LuminAir SELV and HR100 SELV range.

The latest self programming electronic On/Off wall mounted humidity sensor which reacts to any rapid increase in humidity and temperature by switching a Vent-Axia fan 'On' for rapid removal of moisture laden air, in domestic bathrooms and kitchens. Can be wired into controller 'Auto' mode connections. Night time RH increment setback feature suppresses nuisance tripping when the humidity level gradually rises as the temperature falls.

- Pullcord override and neon indicator.
- Changeover relay switch.
- Operating range: 30%-90%RH.
- Ambient operating temperature +5°C to +40°C.
- Dimensions Controller only: 87 x 87 x 33mm (H x W x D).
- Will fit single gang box for surface mounting.

**Stock Ref**  
**563551** 12VAC 50Hz

## Lo-Carbon Ambient Response Humidity Sensor

Designed specifically for the Lo-Carbon product range. The latest self programming electronic On/Off wall mounted humidity sensor which reacts to any rapid increase in humidity and temperature by switching a Vent-Axia fan 'On' for rapid removal of moisture laden air in domestic bathrooms and kitchens. Night time RH increment setback feature suppresses nuisance tripping when the humidity level gradually rises as the temperature falls.

- Pullcord override and neon indicator.
- Changeover relay switch.
- Operating range: 30%-90%RH.
- Ambient operating temperature +5°C to +40°C.
- Dimensions Controller only: 87 x 87 x 33mm (H x W x D).
- Will fit single gang box for surface mounting.

**Stock Ref**  
**563552** 12VDC

All of these Sensors can be wired for either On/Off or Trickle/Boost operation.

Manufacturers of some fluorescent/low energy lighting systems indicate that these can interfere with other electronic/timing circuits. For reliable operation of these circuits we recommend therefore that a tungsten filament light is used.

### Ecotronic Humidity Sensor Surface Mounting

An adjustable set point, solid state On/Off sensor. A pullcord provides manual override, indicated by lamp. Adjustable from 65 to 90%RH. Can be wired into controller 'Auto' mode connections. Incorporates changeover switch to select low/high speed.

- Setting range 65% - 90%RH.
- Maximum switching load 1 Amp inductive.
- Pullcord override indicated by lamp.
- Ambient operating temperature 0°C to +40°C.
- Dimensions: 87 x 87 x 33mm. (H x W x D)
- Supply voltage 220-240V/1/50Hz.

**Stock Ref**  
**563532**

### Ecotronic® SELV 12 Humidity Sensor

12V Safety Extra Low Voltage version for use with VA100 SELV, Solo SELV, and LuminAir SELV range. Incorporates changeover switch to select low/high speed.

- Setting range 65% - 90%RH.
- Maximum switching load 5.6A @ 12V AC.
- Pullcord override indicated by lamp.
- Ambient operating temperature 0°C to +40°C.
- Dimensions: 87 x 87 x 33mm. (H x W x D).
- Supply voltage 12V AC.

**Stock Ref**  
**563531**

Although suitable for siting within reach of a shower or bath we recommend this model is located out of the spray zone of a bath or shower.

### Vent-Axia HumidiSwitch

Operates Vent-Axia ventilating units on either a rise or a fall in humidity to control the damaging effects of condensation.

- Concealed adjustment.
- Setting range 20% to 80% RH.
- Ambient operating temperature 0°C to +50°C.
- Dimensions: 82 x 132 x 40mm (H x W x D).
- Rating 2A (1A inductive).
- Switching range 120-240V.
- Designed for use with controllers with 'Auto' mode facility.
- Single pole changeover contacts.

**Stock Ref**  
**563501**

The Ecotronic and Ecotronic SELV 12 Sensor can be wired for either On/Off or Trickle/Boost operation.

## Controllers & Sensors

### 7 Day TimeSwitch

For applications where regular switching is required at fixed periods or at different times on different days of the week, eg: offices, shops, pubs and restaurants.

The 7-day TimeSwitch gives twelve On or Off positions per day and can be set for 7 days. The cycle will repeat until changed.

- Analogue clock display and integral time switches for ease of setting.
- Manual override.
- Removable clear plastic cover protects TimeSwitch face.
- Volt free changeover contacts.
- Time base: 7 days.
- Shortest switching time: 2 hours.
- Maximum load: 16amp resistive (8amp inductive).
- Ambient operating temperature range -20°C to +85°C.
- Dimensions: 104 x 74 x 52mm (H x W x D).
- Supply voltage 220-240V/1/50Hz.

**Stock Ref**  
**563515**

### Vent-Axia ThermoSwitch

Automatically switches On fans on either a rise or fall in air temperature. The ThermoSwitch can be used with all Vent-Axia fans (via switch gear if appropriate) for the removal of warm air from buildings. It can also be used to switch On Hi-Line ceiling fans for Summer cooling and to move high level warm air down to the working level during Winter.

- Setting range: +6°C to +30°C.
- Two internal range limit/locking rings are included to allow setting within a limited temperature range or locking at a fixed set-point.
- IP20 rated.
- Sealed sensing mechanism.
- Snap-action, single pole, changeover contacts.
- Mounting direct on surface only.
- Electrical connection to screw type terminals with rear or side cable entry.
- Dimensions: 80 x 104 x 36mm (H x W x D).
- Contact rating: 1.5 Amp (inductive).
- 16 Amps (resistive).
- Maximum voltage 250V

**Stock Ref**  
**563502**

### Guardian Personnel Detector (PIR Sensor)

Suitable for controlling a range of Vent-Axia fans. Continuously monitors an area and activates when a moving body is detected.

- Supplied complete with wall mounting bracket.
- Adjustable timer overrun (5 seconds to 20 minutes).
- Supplied with lens to provide 15m (max) range, 200° detection area.
- Designed to meet IP55.
- Ambient operating temperature range -20°C to +50°C.
- Maximum load: 10 Amp resistive (5 Amp inductive).
- Suitable for use with fluorescent lighting up to 500W.
- Internal/External use.
- Supply voltage 220-240V/1/50Hz.

**Stock Ref**  
**563548**

### Vent-Axia Visionex PIR

A wall or ceiling mounted movement detector for use with any domestic Vent-Axia mains voltage product. Also suitable for use with Vent-Axia T-Series controllers on 'Auto' setting and ITC controllers on sensor mode.

- Fits any UK single gang mounting box.
- Adjustable timer overrun (5-25 minutes).
- Range of detection up to 10 metres.
- Designed to meet IP43.
- Ambient operating temperature range 0°C to +50°C.
- Maximum load: 2.5 Amps/600W inductive. Not suitable for use with lighting.
- Internal use only.
- No switched live required for internal rooms and toilets.
- Double insulated.
- Volt-free contacts.
- Supply voltage 220-240V/1/50Hz.

**Stock Ref**  
**459623**

Surface fitting wall mounting box

**Stock Ref**  
**410020**

### Vent-Axia Visionex SELV 12 PIR

A wall or ceiling mounted movement detector for use with any domestic Vent-Axia SELV 12 product.

- Fits any UK single gang mounting box.
- Adjustable timer overrun (5-25 minutes).
- Range of detection up to 10 metres.
- Designed to meet IP43.
- Ambient operating temperature range 0°C to +50°C.
- Maximum load: 5.6 Amps inductive @ 12V.
- Internal use only.
- No switched live required for internal rooms and toilets.
- Class III product.
- Volt-free contacts.
- Supply voltage 12V/1/50Hz.

### 3 Pole Isolator

Isolates Live, Neutral and Switched Live for integral timer fans. 6 Amp, 3 pole isolator complying to the 3mm contact separation requirement for routine maintenance repair.

**Stock Ref**  
**563518**

### Remote Delay Timer

A remote delay timer for use with all domestic products gives the option of offering a 2 minute delay before the fan starts. Once the fan has started the overrun timer is adjustable between 5-25 minutes.

**Stock Ref**  
**457986**

# Controllers & Sensors

## Fan Speed Adjuster

5 step speed adjuster for domestic kitchen extract fans, that can reduce the speed to 40% of its maximum performance.

**Stock Ref**  
**458153**

## Push Button Timer

The Vent-Axia Push Button Timer is ideal for applications that require an accurate timing period. Pushing the button activates the circuit, and starts the timing period. The timer has been designed for general purpose loads, a neutral feed is required at the switch position. This will allow the timer to be used in various applications from incandescent, fluorescent and compact fluorescent lighting to heating and ventilation loads. Adjustable timing range between 1 second and 2 hours.

Three different modes of operation can be set on the timer to provide a variety of options to suit particular applications.

**On/Off Mode:** Operating the unit will start the timing sequence. Operating the unit again during operation will stop the sequence immediately. If the unit is not pressed again after initial operation, the timer will switch Off after the adjustable preset time period has elapsed.

**Resetting Mode:** Operating the unit will start the timing sequence. Operating the unit again during operation will restart the timing sequence.

**Non-Resetting Mode:** Operating the unit will start the timing sequence. Operating the unit again during operation will have no effect.

**Stock Ref**  
**426416**

## 5 Step Auto Controller

Used in conjunction with speed controllable fans to provide 5 stepped speed without electronic motor 'hum'. Several fans can be connected to one transformer provided their combined load does not exceed the controller rating.

Single phase: 3.0, 5.0 and 7.5amp. Rotary switch giving On/Off and five speeds.

Output voltages at 240V/1PH/50Hz 0, 90, 115, 140, 175, 240 volts.

Neon indicator. Enclosures are protected to IP54.

91mm x 176mm x 85mm (WxHxD).

Dimensions	Stock Ref

167x219x108	10314105
200x253x170	10314107

### PIR Timer Switch

The Vent-Axia PIR Timer has been designed to control heating and ventilation when body heat is no longer detected. Adjustable timing range between 10 seconds and 1 hour. As these timers have been designed for general purpose loads, a neutral feed is required at the switch position. Suitable for incandescent, fluorescent and compact fluorescent lighting, heating and ventilation loads. Electric heating can be controlled, either directly or via the heater control circuit. Several timers can be wired in parallel to control the same load if required.

**Stock Ref**  
**426418**

### Ventwise Controller

The award winning Ventwise controller has been designed to fully automate a ventilation system. The unit can be used on intermittent or continuous systems, switching a fan between Off and On or from trickle to boost speed. The controller saves energy by only switching when cooking is taking place or condensation is being generated. The current sensor detects when the power supply to an oven or hob is switched on. The temperature sensor detects the rise in temperature in the hot feed to a bath or shower. A combination of up to three sensors may be used with one controller. Suitable for 240V single phase, the Ventwise is capable of switching 2 Amps or 500 Watts. Ideal for student accommodation, social and sheltered housing, the Ventwise maintains indoor air quality without the need for manual switching.

160mm x 85mm x 45mm (WxHxD).

### Weatherproof Touch Activated Timer

The Vent-Axia Weatherproof Touch Activated Timer is designed for outdoor applications, with a 103 x 103 x 65mm smooth wall enclosure. This timer can accommodate general purpose loads, and will require a Neutral feed at the switch position. This will allow the unit to be used on various applications from incandescent, fluorescent or compact fluorescent lighting to heating and ventilation loads.

The unit has two functions; it can either be used as a Timer, or as a conventional switch.

Two different modes of operation can be set on the unit:

- **Timing Mode:** Pressing the touch plate will start the timing sequence. Pressing the touch plate again during operation will stop the sequence immediately.
- **Switch Mode:** Pressing the touch plate will switch the unit on. Pressing the touch plate again will switch the unit off. The timer function is disabled in this mode.

Output is via a Single Pole Change Over Relay Contact, giving the option of a normally open or normally closed contact for switching purposes. The 'temporary' neon indicator is only illuminated when the unit is timing out. IP65 rated enclosure.

# Controllers & Sensors

## Normal Boost Switch

A single gang switch to boost from high to low speeds on all heat recovery systems.  
85 x 85 x 10mm (H x W x D).

**Stock Ref**  
**455213**

## VCON6

A double gang switch to boost from high to low speeds.  
85 x 145 x 10mm (H x W x D).

**Stock Ref**  
**370356**

## Normal Boost Purge Switch

A single gang switch to operate between normal, boost and purge speeds.  
85 x 85 x 10mm (H x W x D).

**Stock Ref**  
**5108454**

## Momentary Push Switch

Compatible with Sentinel Kinetic range, the momentary switch boosts the unit for 30 minutes.  
85 x 85 x 10mm (H x W x D).

**Stock Ref**  
**448929**

## LED Indicator

Compatible with the Sentinel Kinetic range, the LED indicator illuminates when the MVHR unit requires a filter check or if the unit has a fault.  
Supplied with 15 metres of cable.  
85 x 85 x 10mm (H x W x D).

**Stock Ref**  
**448356**

## Normal Boost Switch - Stainless Steel

A single gang switch to operate normal/boost functions on MVHR systems. Brushed stainless steel finish.

90 x 90 x 18 (H x W x D).

**Stock Ref**  
**437320**

## Normal Boost Switch with Light Indicator

Single gang switch with LED illumination when in the Boost condition.  
85 x 85 x 10mm (H x W x D).

**Stock Ref**  
**449060**

### 2-Way Switch and Neons

A double gang switch to boost from high to low speeds on all heat recovery systems, incorporating neon lights to indicate speed settings. Suitable changeover relay required.  
85 x 145 x 10mm (H x W x D).

**Stock Ref**  
**459746**

### 3 Speed Controller

A three position rotary control which enables the unit to be manually switched from permanent trickle ventilation to either medium or boost speed.  
85 x 85 x 25mm (H x W x D).  
85 x 85 x 37mm (H x W x D): with rotary switch.

**Stock Ref**  
**563533**

### TIM2 Overrun Timer

The TIM2 is a remote mounting electronic overrun timer with a relay output. 2 Amp indication load maximum. Adjustable overrun 2-30 mins. Ideal for where fans are to be controlled in conjunction with a lighting circuit or activated by remote sensors.  
76 x 76 x 41mm. (H x W x D).

**Stock Ref**  
**370346**

### HR500 Controller

Surface mounting. On/Off remote sensor mode. Heat exchange, single fan extract or twin fan extract modes. Infinitely variable speed. Minimum speed setting.

**Stock Ref**  
**W14301010**

### 150VA Transformer

Surface Mounting Transformer with six voltage selections for trickle settings to match dwelling volume. Provides Boost/Trickle ventilation when used with humidity sensors or a manual switch.  
95 x 225 x 75mm (H x W x D).

**Stock Ref**  
**563538**

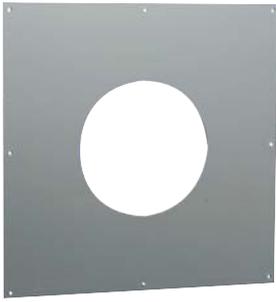

### Isolator Relay Controller

Allows fan unit to be isolated from other mains circuit when used with TIM2, Trickle/boost switch or light switch control.

**Stock Ref**  
**442030**

# Ventilation Accessories

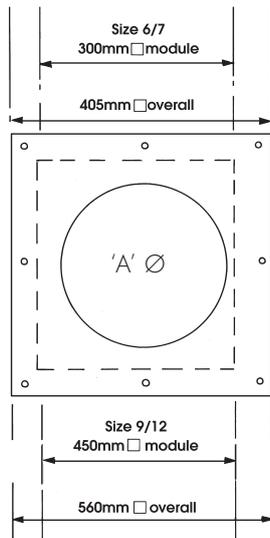

## Fixing Plates

A single plate available in 300mm and 450mm square modular sizes for permanent fixing on walls or for use with other modular components.

Manufactured in high impact recyclable thermoplastic.

# Ventilation Accessories

## Air Replacement Non-Vision Door Grilles with Matching Flanges

Non-vision grilles consist of a single row of overlapping chevron vanes to prevent through-vision, supplied with matching flanges. The grille is fitted to one side of the door with the matching flange on the other side.

Suitable for door thicknesses of 19-49mm.

Available in Silver or Brown finish, in two sizes, 600 x 150 and 600 x 300mm.

### Satin finish

Size	Stock Ref
600 x 150mm	<b>561390</b>

600 x 300mm	<b>560901</b>

## Heavy Duty T-Series Wall Grilles

Tough aluminum construction for accessible public areas. Fits T-Series wall models in place of existing external grille. Finish T-Series grey.

Size	Stock Ref
6	<b>452725</b>
7	<b>452726</b>
9	<b>452727</b>
12	<b>452728</b>

## External Louvres Mill and Brown Finish

Weather resistant external louvres are suitable for air intake or discharge and for use with ducting on external walls.

The narrow blade construction has a 38mm pitch set at 45° with a depth of 41mm and an integral rain lip.

Standard 32mm wide undrilled outer flanges in aluminium have fully welded mitre corners as standard.

Size 6/7 fits 300mm square modular size and size 9/12 fits 450mm square modular size.

Size 6/7 - 345cm<sup>2</sup> free area  
Size 9/12 - 824cm<sup>2</sup> free area

## Louvre Grilles

Louvre grilles can be used for air replacement, for extract purposes and as an external louvre. Available in four sizes, the assembly fits over rather than into the aperture making it especially useful where there are space restrictions within the duct.

Manufactured in thermoplastic. Choice of three colours: White, Brown and Grey.

Size 6	- 190cm <sup>2</sup> free area
Size 7	- 335cm <sup>2</sup> free area
Size 9	- 415cm <sup>2</sup> free area
Size 12	- 705cm <sup>2</sup> free area

### Grille Dimensions (mm)

Size	w x h
Size 6	= 310 x 303
Size 7	= 352 x 345
Size 9	= 391 x 388
Size 12	= 470 x 467

The grilles and surrounds are moulded in ABS plastic to tone with building materials, therefore an equivalent BS or RAL colour reference cannot be given.

## Roof Plate Assemblies

Vent-Axia roof plate assemblies are manufactured in high impact recyclable thermoplastic. They consist of a strong one piece moulded plate with extended sides to assist flashing and weather protection. A separate sub-frame is provided for permanent fixing to the roof kerb. The Vent-Axia Roof model is then fitted to the plate using a suitable sealing compound between the Cowl and plate, ensuring a weather-tight seal.

## Standard Range Adaptor Kits

Used for Standard Range Window models in secondary double glazing, Roof models in secondary double glazing in exposed areas and Roof models through roofs.

Adaptor kits allow units to be installed on two surfaces.

Adaptor kits consist of an additional shroud and gasket, locking ring and seal. The shroud and gasket fit to the outside part of the unit, the locking ring and seal going to the inside part.

Fitting through holes in both Fixing Plates or glass, Vent-Axia's spigot and ring method of fixing allows simple installation separately to both parts.

Colour: Ivory.

## Roof Units from Vent-Axia

The Roof Units™ name has long been associated with high quality ventilation products at affordable prices. With ERP 2013 compliance assured from you can be certain of high quality ventilation products meeting the exact demands of today.

The extensive Roof Units™ product range includes the Euroseries™ Axial plate, short cased & roof fans, as well as inline centrifugal extract fans and twin fans. When matched with the Roof Units™ and Vent-Axia ranges of controllers, flexible ducting and other accessories you can be certain of fulfilling the complete installation from one supplier.

Characterised by design excellence, Roof Units™ fans are purpose designed to deliver controllable outputs of up to 15m<sup>3</sup>/s, plus the right balance of airflow, pressure development, quietness and energy efficiency for every type of project.

The Euroseries™ range of Axial bladed fans cover plate, short cased & roof variants, all fully speed controllable, incorporating modern high efficiency external rotor motors with single piece die-cast aluminium rotor/impellers offering smoother running & giving longer reliable service life.

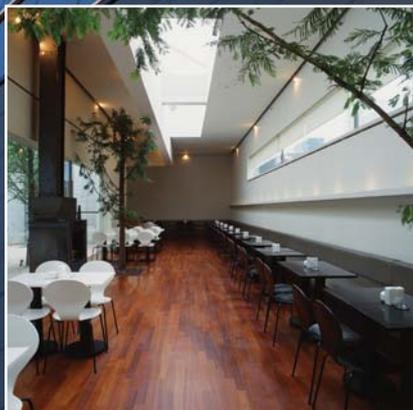

Its all in this fully illustrated catalogue, which includes full performance data and specifications – facilitating your selection for the right ventilation solution.

# Vent-Axia®

Industrial Range

# Energy Recovery Range (ERV)

from Vent-Axia

## Features and Benefits

- 2 model sizes covering 500 to 1500m<sup>3</sup>/hr
- Choice of 90% or 55% efficient aluminium energy recovery cell
- High performance EC/DC motors
- Compact low profile unit (360mm high)
- Internal or External mounting as standard
- Robust aluminium cell construction
- Simple control functionality

## Construction

The unit is manufactured with a frameless construction, and incorporates single skinned Aluzinc panels with a highly thermal and acoustically efficient internal insulating foam. The unit is suitable for internal or external mounting as standard.

The unit is constructed with removable top and bottom access panels allowing full maintenance access.

The removable panels provide access to the following:

- ✓ Supply or extract fan
- ✓ Supply or extract filter (when fitted)
- ✓ Heat exchanger
- ✓ Frost heater (when fitted)

Within a separate side section access is provided for wiring termination and set-up/commissioning. The user control interface therein is within a separate viewing and access panel allowing commissioning without the need to access to the wiring section. This controller can be demounted for remote installation if required.

## Options

The ERV range consists of two unit sizes (ERV1000 and ERV1500) each available with two versions of control and unit functionality (Basic and Standard) and two versions of the heat recovery cell (55% and 90% efficiency) giving 8 models in total.

The frameless single skinned construction, with Aluzinc panels internally lined with a 90kg/m<sup>3</sup> high efficiency acoustic and thermally insulating foam (fire retardant to BS476 part 7 class 1 and part 6 class O), minimises noise and thermal breakout from the casing. Aluzinc construction allows for the units to be mounted either internally or externally as standard (IPX4). An optional inlet cowl is available for external applications if required.

The casing is designed to be as compact as possible for concealed false ceiling applications with access panels on both top and bottom as standard for ease of access and maintenance.

## Performance and Sound

Extensively tested in accordance with BS 848 part 1 and 2, the published dB(A) figures are free field sound pressure levels with spherical propagation at reference level of  $2 \times 10^{-5}$  Pa. The inlet and outlet sound power level spectra figures are dB with a reference of  $10^{12}$  Watts.

## Motor and impeller

All units contain a pair of Class 1 EC/DC external rotor motors with backward curved impellers carefully selected for maximum performance coupled with minimum sound and power consumption, fully compliant with the requirements for ERP 2015. The assembly is balanced to DIN ISO 1940 grade 6.3. Bearings are greased for life for maintenance free operation coupled with long service life for added peace of mind.

Electrical supply is 230V, 50Hz single phase.

## Energy Recovery Cell

The ERV range includes either an Aluminium crossflow plate heat exchanger with an efficiency of 55% on the ERV units or an Aluminium counter flow plate heat exchanger offering higher efficiencies of up to 90% on the Hi Box units.

By utilising Aluminium heat exchangers the Vent-Axia ERV range of units can be installed in most environments including those with high

humidity yet without the need to regularly maintain or replace the heat exchanger cell. The Aluminium cells are designed to be maintenance free (other than basic cleaning in situ) and to last the life of the unit.

## Internal Unit Functionality

### Flow Imbalance

The supply and extract flows on the standard unit can be offset by up to 20% to give an imbalanced flow as required.

Not available on the simplified unit.

### Summer Bypass

The Standard ERV and ERV Hi-Box include as standard a Summer Bypass facility and integral controls to control its operation. The damper operates on both the Heat Recovery route and Bypass route enabling a full 100% bypass maximising the energy recovery benefits of free cooling when available.

Not available on the Basic unit.

### Frost Protection

Integral to the standard unit is a 2 stage 2kW electric heater providing frost protection. The control for the inbuilt heaters is fully integrated and automatic ensuring the heat recovery cell does not freeze up under very low ambient conditions. The frost protection system will switch in each of the two stages as required when the ambient temperature falls below 0°C.

Not included on the Basic unit.

### Condense Drain

All versions are fitted with a gravity condensation drain. An optional condensation drain pump is available for mounting in the condensation pipework external to the unit, includes float switch.

### Filters

The ERV standard unit includes a G4 replaceable synthetic filter as standard, these are available as an optional extra on the Basic version to drop in to the pre-fitted filter slide rails.

### Control

The Standard ERV unit comes complete with an integral controller providing manual variable speed control and the ability to control the summer bypass and frost protection functions. This allows the unit to be set to the customer requirements for continuous operation. The controller is fitted to the unit but can be remotely mounted on site if required. An integral time clock also provides for scheduling of the run for the unit. A boost facility can be manually selected via the unit controller. The controller LCD display shows the hours run and filter life information during operation and is fitted as standard to the unit although this can be remotely mounted on site.

The Basic ERV controller provides a manual 3 speed control via a rotary switch with no display function. There is no frost protection or bypass included within the unit. The controller is fitted to the unit but can be remotely mounted on site if required and includes a green LED run indicator.

## Plate Mounted Axial Fans

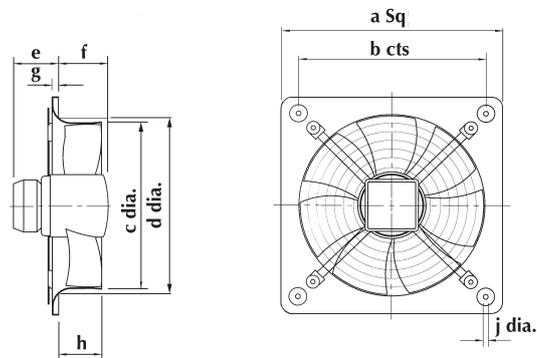

from Vent-Axia

### Features & Benefits

- Die cast aluminium impellers
- Fully speed controllable
- Air Volumes up to 13.89m<sup>3</sup>/s
- Sizes 315 to 1000 dia protected to IP54
- Operating Temperatures from -40°C up to +70°C Motor
- Insulation Class F
- Thermal overload for motor protection
- All units reversible - Supply or Extract
- Tough epoxy paint finish
- Quality Assurance to BS EN ISO 9001:1994
- Performance tested to ISO 5801

Note:

- The Standard roof cowl colour is BS 00A 05 (Goose Wing Grey), for all special B.S. or RAL colours contact Vent-Axia.
- When speed control is required a 5 step auto transformer speed controller is recommended, to ensure low noise levels.
- All 3 phase models are suitable for frequency inverter speed control.

To complement the Euroseries fans, we offer a comprehensive range of purpose made ancillary items. These can be purchased individually, or for more convenience and economy, they are also available as an ancillary pack containing:

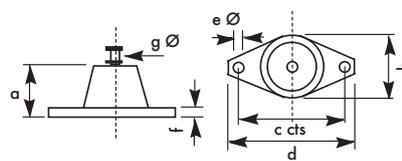

- 4 - Anti vibration mountings
- 2 - Feet per ancillary pack
- 2 - Matching flanges
- 2 - Sound barrier flexible connectors (with clips)

Note: - The Standard roof cowl colour is BS 00A 05 (Goose Wing Grey) for all special B.S. or RAL colours contact Vent-Axia.  
 - When speed control is required a 5 step auto transformer speed controller is recommended, to ensure low noise levels.  
 - All 3 phase models are suitable for frequency inverter speed control.

# EuroSeries® (ESR)

## Roof Mounting Axial Fans

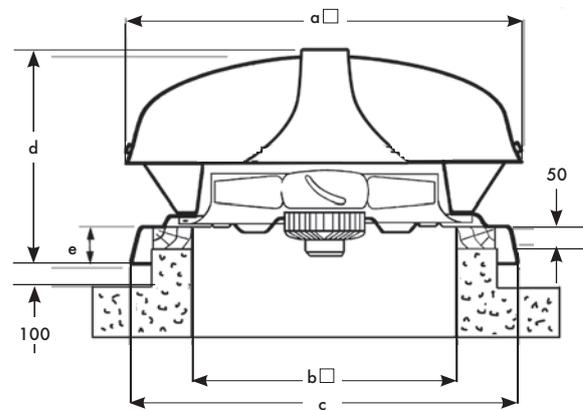

from Vent-Axia

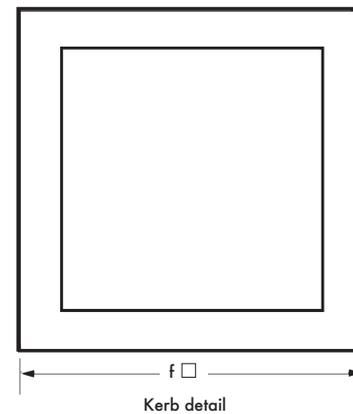

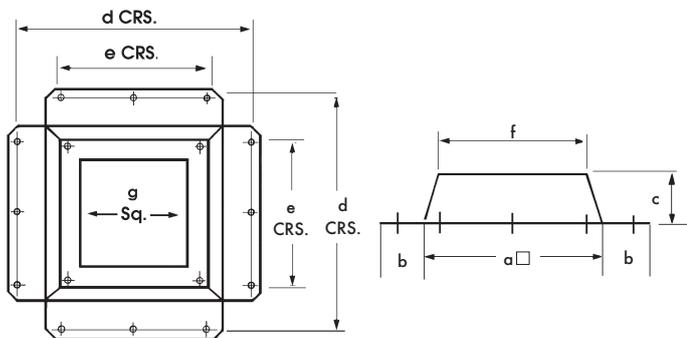

### Features & Benefits

- Cowl & base moulded from recyclable polymeric material
- All sizes resistant to UV light
- Sizes 315 to 1000 dia are protected to IP54
- Optional backdraught shutters and bird guard (250-630mm)
- All models speed controllable
- Motor Insulation Class F, -40°C to +70°C operating temperature
- Reversible for supply or extract units
- Thermal overload for motor protection
- Performance tested to BS848 part 1 1980

Note: - The Standard roof cowl colour is BS 00A 05 (Goose Wing Grey) for all special B.S. or RAL colours contact Vent-Axia.  
 - When speed control is required a 5 step auto transformer speed controller is recommended, to ensure low noise levels.  
 - All 3 phase models are suitable for frequency inverter speed control.

# Quiet Pack (QP)

## In-Line Centrifugal Duct Fans

from Vent-Axia

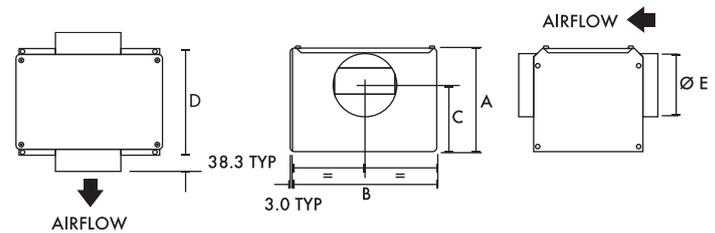

### Features & Benefits

- 20mm 'O' Class rated acoustically treated casing, ensuring minimum duct and breakout noise levels
- Air volumes up to 1.08m<sup>3</sup>/s
- Suitable for external pressures up to 430Pa
- Designed to suit duct diameters from 100 to 500mm
- Operating Temperatures from 15 °C up to +40 °C
- Speed Controllable
- Quality Assurance to BS EN ISO 9001:1994
- Performance tested to BS848 Part 1 1980

### ACOB1A Twin Fan Controller

#### Features & Benefits

- Manual or auto changeover facilities
- 2 to 24 hour adjustable duty sharing
- Diagnostic program facility on start up
- Suitable for 1 phase twin fan units up to 8 amps
- Can be wired in conjunction with speed controllers
- Volt free contacts fitted as standard
- Failure neon indicators

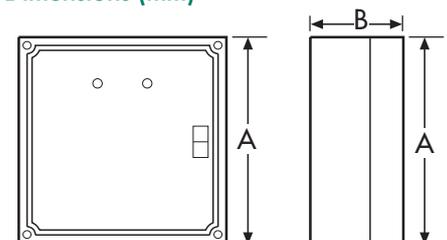

#### Specification

Supply Voltage: 230 to 240V/1ph/50Hz.  
 Maximum Current Capacity: 0.1 to 8.0 amps.  
 Operating temperature: 0°C to +40°C.  
 IP rating: IP40.  
 Fuse Size: T rated 15 amp glass fuse (5x20mm).

# Speed Controllers

## Single Phase SP & SPTK (Electronic)

### Features & Benefits

- Single Phase, electronic, infinitely variable, stepless speed control with MIN/MAX preset facility
- Separate starter not required when used with HOT SPOT protected fan (SPTK only)
- Compact and easy to install
- Suitable for surface or flush mounting (SP5010 surface only)\*
- SP type include ON/OFF switch with neon indicator
- SPTK type include ON/OFF/RESET switch and indication light fan trip indicator and built in facility for manual reset
- Complies with required statutory regulations and carries CE mark

### Single Phase RTRE (Enhanced Auto-Transformer)

### Three Phase RDTK (Auto - Transformer)

#### Features & Benefits

- Single Phase 5 step auto-transformer speed controller
- Separate starter not required when used with HOT SPOT protected fans
- Low motor noise - no magnetic hum
- Additional terminals to allow connection of remote switching device
- Allows operation via BMS interface
- Additional terminals to allow connection of remote anti-freezing thermostat

#### Features & Benefits

- Three phase 5 step auto - transformer speed controller
- Separate starter not required when used with HOT SPOT protected fans
- Low motor noise - no magnetic hum
- Compact fire retardant surface mounting enclosure
- Additional terminals to allow connection of remote switching device
- Additional terminals to allow connection of remote anti-freezing thermostat

# Starters & Overloads

### Starters

Suitable for all models. Push button Start/Stop. 240V contactor coil for single phase applications and three phase supplies where a neutral is present. 415V Contactor coil for three phase supplies where a neutral is not present or required.

Protection is given by an overload relay which is selected to match the load of the fan. Enclosures are protected to IP55.

# Sonex

## Circular Sound Attenuators

### Features & Benefits

- Low cost – exceptional performance, exstock availability
- Sheet steel casing and end plates 30 minute fire rating as standard
- Fitted spigot for direct connection to circular ductwork

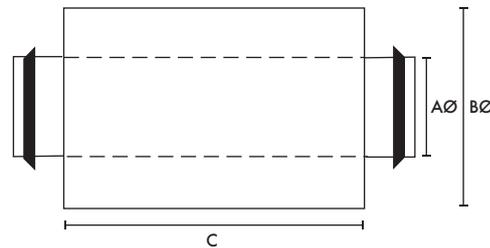

### Application Data

The effective and economic solution for sound attenuation in circular duct systems from 100 to 500mm diameter. With at least three models per size throughout the range the system designer is given complete flexibility of choice allowing a selection which is the best balance of attenuation, size and cost for any application. Sonex Attenuators are fitted with a patented duct seal which enables leak free 'plug-in' connection to rigid ductwork with consequent savings of installation costs. The excellent attenuation characteristics of the Sonex range are achieved without imposing undue system resistance. Pressure losses are little more than those which would occur over a comparable section of straight duct.

### Construction

The attenuator consists of a perforated tubular liner manufactured from sheet steel. The liner is enclosed by a thick layer of mineral wool sound absorbing material. Casing and end plates are formed from galvanised sheet steel. Standard models have a 30 minute fire rating (60 minutes also available).

# Pyrocheck

## Intumescent Fire Dampers

### Features & Benefits

- Suitable for air transfer in doors and partitions
- Complete seal achieved in approximately five minutes when tested in accordance with BS 476 pt 20 & 22
- Available in circular form
- UV Stabilised material UPVC
- Pyrocheck offer much lower resistance to airflow compared to traditional designs
- Independently tested to BS 476 pt. 22; fire integrity of 68 mins

Pyrocheck CVT Intumescent Fire Dampers are available in circular form and have a minimum fire integrity of one hour (in accordance with BS476 Part 8 1972). The fire dampers have been independently tested at the Warrington Fire Research Centre.

Intumescent fire dampers require no mechanical or external device to operate as they rely solely on an internal reaction initiated by heat. They are, therefore, especially suitable for applications where regular inspection is unlikely or difficult or where mechanical devices would be susceptible to shock or corrosion damage.

Typical applications are air transfer in fire doors or partitions.

The active material is encased in a PVC sleeve giving maximum protection against moulds, fungi, insect attack or similar biological damage, and may reasonably be expected to last for the life of the building. Unaffected by UV light, capable of withstanding freeze/thaw cycling and able to support ambient temperatures within the range -10°C to +80°C.

In a fire situation Pyrocheck CVT Dampers will rapidly expand to completely block the duct or opening thus preventing the further passage of smoke and hot gasses.

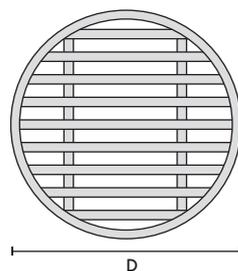

An unusually high free area means that Pyrocheck CVT Dampers offer much lower resistance to air flow compared to traditional intumescent designs.

# Pyrocheck

## Fusible Link Fire Dampers

### Features & Benefits

- Suitable for horizontal airflow, through wall mounting
- Four hour tested to BS476 Part 20
- High shut-off twin blade design
- Low cost solution for small diameter ducts
- Complete with gasket for in-duct mounting
- Low pressure drop and noise generation
- Blade locking springs

The design of Pyrocheck Series PA presents minimal obstruction to the air flow during normal operation (prior to initiation), consequently the pressure drop across the damper is extremely low.

The precision low mass fusible link is set to operate at 72°C. Operation of the fusible link releases the blades and completely blocks the duct. A feature of the PA damper is its duct sealing ring and intumescent seal. This compensates for any minor irregularities in the duct which may otherwise create gaps between the duct wall and the damper.

### Fire Rating

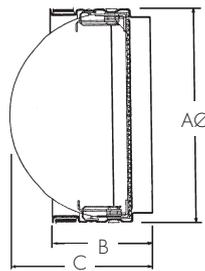

The pyrocheck range of dampers have been tested at Warrington Fire Research Centre. The dampers were assessed against the criterion for integrity as defined in BS476 Part 20 for 4 hours.

The dampers maintained their integrity successfully throughout the test, which was discontinued after 4 hours.

# Unitex

## Roof Cowl System

### Features & Benefits

- Complete weather proofing with low pressure drop
- Size 160 to 250 supplied with bird guard
- Galvanised steel construction additionally protected by a dark brown epoxy powder coat finish (100mm grey PVC only)
- Weather apron in stock aluminium
- Suitable for flat or pitched roofs up to 20° as standard
- Can be supplied in special colours to match building design (100mm grey PVC only)

The Unitex Roof Cowl System greatly simplifies the roof termination of mechanical ventilation systems. Consisting of an attractive epoxy finished cowl with a lead weather slate and a range of direct connection reducing fittings. It is suitable for connection to spiral duct, soil pipe and flexible duct from 125 to 250mm diameter.

## Wall Terminals

### Features & Benefits

- External weather louvre, wall sleeve and duct connection spigot in one unit
- Satin anodised louvre gives full weather protection
- Epoxy powder coated finish, weather louvre available as optional extra
- 280mm or 80mm wall sleeve section
- Spigot connections from 100mm to 400mm

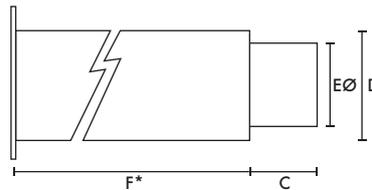

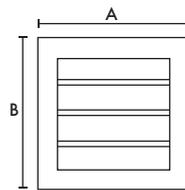

The Unitex SA Wall Terminal Module consists of a high grade satin anodised weather louvre fitted with bird guard (epoxy finish optional extra). This is located in a galvanised sheet metal 'box section' linked to a reinforced circular stub for direct connection to rigid or flexible ductwork.

Two lengths of 'box section' are available; 80mm and 280mm. An airstream operated back draught shutter can be fitted in the 280mm version. For applications where larger air volumes are involved the Unitex QSA range of wall terminals is available.

Note:

Volume Control Dampers, Speed Clamps & Backdraught Shutters available see Accessories section.

# Ventilex

## Steel Ventilation Valves

### Features & Benefits

- Supply and extract valve
- White epoxy finished steel
- Adjustable centre core
- Bayonet fixing - easy removal for cleaning

Ventilex Model VHE extract/supply valves are a new addition to the well established Ventilex range and continue the concept of elegant design combined with excellent performance characteristics.

The valves are constructed from white epoxy finished steel and are supplied complete with a bayonet action fixing frame.

This allows positive locking and sealing of the valve yet still enables, easy removal for adjustment or cleaning. The valve profile is designed to eliminate fouling of adjacent decorated surfaces - a feature common to all Ventilex valves.

The central core is adjustable and offers a wide range of settings to meet specific system designs. Datum position is achieved when core face is level with face of valve (see dimensional diagram).

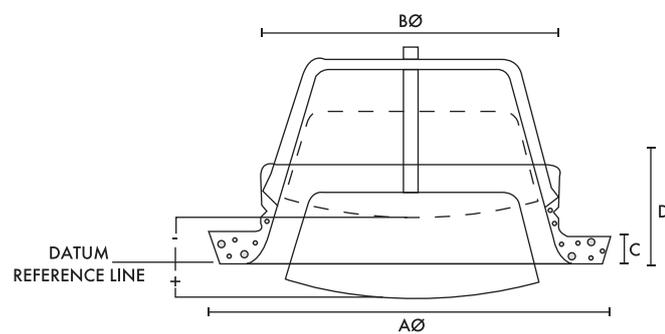

### Applications

Bathrooms, kitchens, toilets, lobby areas or any room requiring a single diffuser for up to 100m<sup>3</sup>/hr (multiple arrays can of course be utilised).
